German by Association Michael Gruneberg, Dr, Michael M. Gruneberg, 1994 Helps the reader to learn the German language more effectively with the method of Linkword Language System *Legal Entanglements* Sebastian Gehrig, 2021-05-14 During the division of Germany law became the object of ideological conflicts and the means by which the two national governments conducted their battle over political legitimacy *Legal Entanglements* explores how these dynamics produced competing concepts of statehood and sovereignty all centered on citizens and their rights Drawing on wide ranging archival sources including recently declassified documents Sebastian Gehrig traces how politicians diplomats judges lawyers activists and intellectuals navigated the struggle between legal ideologies under the pressures of the Cold War and decolonization As he shows in their response to global debates over international law and human rights their work kept the legal cultures of both German states entangled until 1989 The Nation as a Local Metaphor Alon Confino, 2000-11-09 All nations make themselves up as they go along but not all make themselves up in the same way In this study Alon Confino explores how Germans turned national and argues that they imagined the nation as an extension of their local place In 1871 the work of political unification had been completed but Germany remained a patchwork of regions with different histories and traditions Germans had to construct a national memory to reconcile the peculiarities of the region and the totality of the nation This identity project examined by Confino as it evolved in the southwestern state of Württemberg oscillated between failure and success The national holiday of Sedan Day failed in the 1870s and 1880s to symbolically commingle localness and nationhood Later the idea of the Heimat or homeland did prove capable of representing interchangeably the locality the region and the nation in a distinct national narrative and in visual images The German nationhood project was successful argues Confino because Germans made the nation into an everyday local experience through a variety of cultural forms including museums school textbooks popular poems travel guides posters and postcards But it was not unique Confino situates German nationhood within the larger context of modernity and in doing so he raises broader questions about how people in the modern world use the past in the construction of identity Report on Cooperation in American Export Trade United States.
