Rosenbaum,2016-02-15 During the nineteenth and early twentieth centuries the tourism industry of Bavaria consistently promoted an image of grounded modernity This romanticized version of the present reconciled continuity with change tradition with progress and nature with science In an era of rapid and unprecedented change simultaneously nostalgic and progressive grounded modernity produced an illusion of continuity It helped make the experience of modernity more tangible by linking impersonal and abstract ideas like national identity with familiar experiences and concrete sights Bavarian Tourism and the Modern World 1800 1950 examines the connections between Bavarian tourism and the turbulent experience of German modernity during this period It gauges Germany s long and often unsettling journey to modernity using Bavarian tourism and travel as a lens Closely examining guidebooks brochures postcards and other tourist propaganda Adam

Rosenbaum argues that by pointing visitors to the past tourism illuminated the present and produced signposts to the future

*Green Wedge Urbanism* Fabiano Lemes de Oliveira, 2017-02-23 As towns and cities worldwide deal with fast increasing land pressures while also trying to promote more sustainable connected communities the creation of green spaces within urban areas is receiving greater attention than ever before At the same time the value of the green belt as the most

prominent model of green space planning is being widely questioned and an array of alternative models are being proposed. This book explores one of those alternative models the green wedge showing how this offers a successful model for integrating urban development and nature in existing and new towns and cities around the world. Green wedges considered here as ducts of green space running from the countryside into the centre of a city or town are not only making a comeback in urban planning but they have a deeper history in the twentieth century than many expect a history that provides valuable insight and lessons in the employment of networked green spaces in city design and regional planning today. Part history and part contemporary argument this book first examines the emergence and global diffusion of the green wedge in town planning in the late 19th and early 20th centuries placing it in the broader historic context of debates and ideas for urban planning with nature before going on to explore its use in contemporary urban practice. Examining their relation to green infrastructures landscape ecology and landscape urbanism and their potential for sustainable cities it highlights the continued relevance of a historic idea in an era of rapid climate change.

**European Cities, Youth and the Public Sphere in the Twentieth Century** Detlef Siegfried, 2016-12-05  
 The late nineteenth century witnessed unprecedented levels of urban growth as migration swelled the population of European cities to new heights. The resulting problems of overcrowding and inadequate civic utilities prompted the governing elites to look for new planning solutions to address the needs of an increasingly urbanised society. At the same time young people were also increasingly recognised as being adversely affected both politically and morally by the on going process of urbanization. Church groups civic authorities middle class reformers and political movements all tried to steer youth toward their own concept of respectable behaviour concepts that often tended to share many similarities in their paternalistic emphasis upon social discipline. This volume directly addresses the confluence of these issues the point at which the city government youth and public space meet and the resulting problems and tensions that were often created. Whether it be the corruption of the rural youth flooding into the cities at the beginning of the twentieth century battles between Hitler Youth and working class gangs in Nazi Germany hooliganism in 1950s Hungary or the appropriation of or withdrawal from public spaces by youths in more recent times all the chapters in this book explore ways in which authorities and adult groups have sought to control young people both directly and indirectly. Drawing on a broad selection of methods and disciplines a wide variety of case studies from across

Europe are used to investigate the interactions between youth and authority and show how these adapted and changed over time and in different countries By taking a fresh look at these issues within a comparative framework this volume furthers our understanding of modern European society during the twentieth century     *Heads of the Local State* John Garrard, 2017-11-28 In recent decades there has been increasing historical interest in various aspects of local urban politics resulting in a much better understanding of the recruitment and socio economic characteristics of municipal leadership and the exercise of power at a local level However much less is known about the highly important offices and office holders standing at the ceremonial political and executive head of towns and cities Through a comparative analysis of mayoralty since 1800 this volume explores the characteristics of the office in relation to such issues as the constitutional position of mayors their ceremonial and executive roles their representational status in relation to local regional and central authority and their public visibility which at various times has been used to highlight or blur issues of race gender politics or religion within a community Drawing on examples from contrasting national contexts in Eastern and Western Europe and North America and with contributions from both historians and political scientists this book will be welcomed as an important step in providing a much fuller international picture of the development and nature of urban governance
