Germany Herbert Kitschelt, Wolfgang Streeck, 2003 *Germany* Herbert Kitschelt, Wolfgang Streeck, 2004-01-31 From the 1960s to the 1980s observers gave the name Model Germany to the Federal Republic They saw in Germany a political economic model that was able to weather many economic challenges Model Germany permitted political competition while coordinating public policy among interest associations and private businesses so that changes would only take place only in a balanced and positive way Since the early 1990s this German Model has faced serious troubles Authors in this book describe its disintegration in the past decade and probe into the causes of this Articles argue that it is Germany s national and European integration that has triggered the model s unravelling These processes are paralleled by tendencies in public opinion social life styles and political mobilization in parties interest groups and social movements The strains of model Germany show up in the transformation of industrial relations corporate governance structures and social and immigration policies in Germany Special Issue on Germany , 2003 *Germany* Herbert Kitschelt, Wolfgang Streeck, 2004-03-01 From the 1960s to the 1980s observers gave the name Model Germany to the Federal Republic They saw in Germany a political economic model that was able to weather many economic challenges Model Germany permitted political competition while coordinating public policy among interest associations and private businesses so that changes would only take place only in a balanced and positive way Since the early 1990s this German Model has faced serious troubles Authors in this book describe its disintegration in the past decade and probe into the causes of this Articles argue that it is Germany s national and European integration that has triggered the model s unravelling These processes are paralleled by tendencies in public opinion social life styles and political mobilization in parties interest groups and social movements The strains of model Germany show up in the transformation of industrial relations corporate governance structures and social and immigration policies in Germany **Entrepreneurial States** Yves Tiberghien, 2018-07-05 In Entrepreneurial States an innovative examination of the comparative politics of reform in stakeholder systems Yves Tiberghien analyzes the modern partnership between the state and global capital in attaining structural domestic change The emergence of a powerful global equity market has altered incentives for the state and presented political leaders with a golden bargain the infusion of abundant and cheap capital into domestic stock markets in exchange for reform of corporate governance and other regulatory changes Drawing on extensive archival research and interviews with policy and corporate elites in Europe and East Asia Tiberghien asks why states such as Korea and France have embraced this opportunity and engaged in far reaching reforms to make their companies more attractive to foreign capital whereas Japan and Germany have moved forward much more grudgingly Interest groups and electoral institutions have their impacts but by tracing the unfolding dynamic of reform under different constraints Tiberghien shows that the role of political entrepreneurs is critical Such policy elites act as mediators between global forces and national constraints As risk takers and bargain builders Tiberghien finds they use corporate reform to

reshape their political parties and to stake out new policy ground The degree of political autonomy available to them and the domestic organization of bureaucratic responsibility determine their ability to succeed *Parties, Elections, and Policy Reforms in Western Europe* Kerstin Hamann, John Kelly, 2010-08-30 This book provides a comparative assessment of social pacts between governments labor unions and employer organizations in Western Europe Using a dataset covering 16 European countries as well as eight in depth country case studies the authors argue that governments choice of social pacts or legislation is less influenced by economic problems but is strongly influenced by electoral competition *European Politics* Klaus H Goetz, Peter Mair, Gordon Smith, 2013-09-13 This book arises out of a specially commissioned issue of West European Politics marking the journal s 30th anniversary It examines the profound changes in the European political landscape over the last three decades including the fall of Communism progressive European integration territorial restructuring public sector reforms at European national regional and local levels changes in democratic participation protest elections political communication political parties and party competition and challenges to the welfare state The book also discusses how political science has responded to these changes in terms of its substantive focus concepts methods and theories Many of the 17 contributions included identify important challenges for the future including those stemming from EU integration the reduced electoral accountability of politicians the problematic legitimization of party government and the sharpening of the edges of the state Contributors include K A Anderson F C Castles C Crouch M Egeberg M Ferrera H Goetz L Hooghe E M Immergut R F Inglehart M Keating H D Klingemann H Kriesi M Lodge J Lovenduski P Mair G Marks Y M ny L Morlino H Obinger V A Schmidt P C Schmitter and G Smith This book was published as a special issue of West European Politics *National Pathways to Low Carbon Emission Economies* Kurt Hübner, 2018-09-03 The science is clear climate change is a fact and the probability is extremely high that it has been caused by humans At the same time policy responses are hesitant rather lukewarm and differ substantially between nation states The question is what drives and what blocks radical action This book makes the case that institutional settings path dependence and emerging change coalitions are critical in explaining climate policies across the global political economy Technological and social political innovations are key drivers for dealing with climate change This class of innovation is very much guided or suppressed by a national economy s established institutional settings By anchoring national case studies in a version of the well established varieties of capitalism approach the chapters of this book show why some economies are policy leaders and others become policy followers or even policy interlockers Moreover the case studies demonstrate the extent to which external events and institutional constraints from the international polity influence national innovation strategies Taking a unique analytical approach which combines insights from innovation policies and a variety of capitalism literature the authors provide genuine comprehension of the interplay between institutional settings political actors and climate policies National Pathways to Low Carbon Emission Economies offers a valuable examination of these issues on climate change that will be of interest to

academics and postgraduates researching climate policy economic policy and social movements Furthermore it is relevant for policy analysts and policy makers who are interested in learning from climate policies in the context of innovation strategies for a range of countries
