About Europe Denis Guénoun,2013-02-20 The concept of the universal was born in the lands we now call Europe yet it is precisely the universal that is Europe s undoing All European politics is caught in a tension to assert a European identity is to be open to multiplicity but this very openness could dissolve Europe as such This book reflects on Europe and its changing boundaries over the span of twenty centuries A work of philosophy it consistently draws on concrete events From ancient Greece and Rome to Christianity to the Reformation to the national revolutions of the twentieth century what we today call Europe has been a succession of projects in the name of ecclesia or community Empire Church and EU all have been constructed in contrast to an Oriental other The stakes of Europe then are as much metaphysical as political Redefining a series of key concepts such as world place transportation and the common this book sheds light on Europe as process by engaging with the most significant philosophical debates on the subject including the work of Marx Husserl Heidegger Pato ka and Nancy Aqua ,1996
