Economic Anthropology Chris Hann, Keith Hart, 2011-03-28 This book is a new introduction to the history and practice of economic anthropology by two leading authors in the field They show that anthropologists have contributed to understanding the three great questions of modern economic history development socialism and one world capitalism In doing so they connect economic anthropology to its roots in Western philosophy social theory and world history Up to the Second World War anthropologists tried and failed to interest economists in their exotic findings They then launched a vigorous debate over whether an approach taken from economics was appropriate to the study of non industrial economies Since the 1970s they have developed a critique of capitalism based on studying it at home as well as abroad The authors aim to rejuvenate economic anthropology as a humanistic project at a time when the global financial crisis has undermined confidence in free market economics They argue for the continued relevance of predecessors such as Marcel Mauss and Karl Polanyi while offering an incisive review of recent work in this field Economic Anthropology is an excellent introduction for social science students at all levels and it presents general readers with a challenging perspective on the world economy today Selected by Choice as a 2013

New Directions in Economic Anthropology Susana Narotzky,1997 Narotzky is particularly compelling in her discussion of the relation between the counted and unaccounted as it enters practices and ideology in the informal economy family business and home life Anthropology Today RAI Using an historical perspective Narotzky highlights the interdependent nature of the contemporary world economy and includes case studies of Western societies She gives special emphasis to current issues such as the anthropology of work the informal economy and the cultures of industrialisation

The Anthropology of Complex Economic Systems Niccolo Leo Caldararo,2013-11-14 Today we live in what Ulrich Beck has aptly characterized as a risk society shaped by intensifying crises outside of our control and seemingly outside of our comprehension The master narrative that was supposed to lead us to secular salvation economics has proved to be a large part of the problem rather than the much anticipated solution In The Anthropology of Complex Economic Systems Niccolo Caldararo offers a much more radical and challenging answer that the fundamental assumptions on which the modern science of economics has been erected are false and that it is through the medium of anthropology particularly the relatively neglected field of economic anthropology that an alternative and sound basis for both the understanding of economic behavior and for the shaping of economic futures can be constructed Caldararo not only challenges the

foundational assumptions of conventional economic theory but situates economic behavior something quite different and universal amongst human beings in both a historical and an ecological context Contemporary discussions of sustainability especially in the field of development studies have oddly neglected to look to anthropology Economic anthropology is the repository of a vast store of wisdom both about actual alternative and workable economic systems and about their evolution By drawing on this source Caldararo builds a model of the evolution of human economies which stir up substantial debate shows how economic anthropology provides a tool for the interrogation of economic theory and ties economics to ecology It has been the rupture of this fundamental relationship that lies at the basis of much of our present crisis and the unsustainable economic patterns that humans have created By bringing together in a new configuration economic anthropology ecology and culture history Caldararo not only proposes a new model of human social evolution but equally importantly creates a methodology for speaking to and against our present economic and environmental situation

person Equally anthropology can be enriched through the methods and models of economic theory This new economic anthropology goes beyond a simple observation of societies It is new because it introduces the responsible person with a wider range of characteristics in particular vulnerability and suffering as a subject of economics It is a particular interpretation of economic anthropology calling for a broadening of the subject moving from the individual to the person range of values admission of negative values for altruism social capital responsibility and disciplinary references Through this approach both economics and anthropology can be enriched This book will be of great interest to those working in the fields of economics anthropology philosophy and development studies

The Economic Anthropology of the State (Monographs in Economic Anthropology, No 11) Elizabeth M. Brumfiel, 1994-04-06 This work examines the scope rationality and limits of state intervention in the economy drawing upon studies of tribute based states of antiquity and modern capitalist states In examining how state personnel intervene in the economy this book draws three conclusions about the economic anthropology of the state First there is a great range of variation in the way that states intervene in the economy Second the economic impact of the state extends far beyond its role in organising or managing production and distribution Finally understanding the economic anthropology of the state requires an awareness of the strength of powerholders outside the state especially those who are often regarded as powerless

Cultural Economies Past and Present Rhoda H. Halperin, 2010-07-05 When anthropologists and other students of culture want to compare different societies in such areas as the organization of land labor trade or barter they often discover that individual researchers use these concepts inconsistently and from a variety of theoretical approaches so that data from one society cannot be compared with data from another In this book Rhoda Halperin offers an analytical tool kit for studying economic processes in all societies and at all times She uniquely organizes the book around key concepts economy ecology equivalencies householding storage and time and the economy These concepts are designed to facilitate the understanding of similarities differences and changes between contemporary and past economies While this is not only a how to book or handbook it can be used as such It will be of great value to scholars and students of archaeology and history as well as to
