Economics Of The Modern Construction Firm:

The Economics of the Modern Construction Firm S. Gruneberg, Graham J. Ive, 2000-08-08 This is a book about the whole diverse range of firms that are found in the construction sector about their decision making and the economic environments in which they operate The authors aim to provide a new and coherent perspective on these firms and the choices they have to make both for their managers and for all who have a stake in these firms and their industry This book offers some new and important perspectives for research and teaching about construction firms

The Economics of the Modern Construction Sector G. Ive, S. Gruneberg, 2000-07-31 This book will be of interest to built environment professionals and to students of the economics and management of the built environment It shows the value of integrating ideas and data about the production of the built environment as an industrial process with theories and data about the demand for construction The approach taken is institutional and post Keynesian and illuminates an important and distinctive sector of the economy embracing design construction and property industries This book offers some new and important perspectives for research and teaching in construction economics and management

Modern Construction Economics Gerard de Valence, 2010-11-10 Modern construction economics has a wider focus than was previously the case with stronger links to mainstream economics reflecting increasing interest in a range of theoretical issues This book brings together the essential reviews of this trend and pushes towards the development of a comprehensive theoretical framework for construction economics

Describing Construction Rick Best, Jim Meikle, 2022-09-16 This third book from editors Rick Best and Jim Meikle brings together and presents insights into a number of key concepts in the study of construction firms projects and the group of activities that loosely define the construction industry The value for readers comes from the collection of a variety of topics in a single volume which provide a basic understanding of the complexities of construction as more than a set of practical concerns such as labour management and materials handling Instead the focus is on analysis of the industry and its component parts from the viewpoints of construction economists and others seeking to understand the drivers and challenges that shape an area of economic activity that is a major contributor in all economies The aim of this book is to provide an overview and discussion of several aspects of what makes construction tick It is unlike other industry sectors in many ways being project based with often intense competition for work Where the first book *Measuring Construction* focused on particular areas associated with quantifying various aspects of construction activity and the second *Accounting for Construction* looked more at how we record and report on construction activity *Describing Construction* gives readers the views of experts in the field of how the construction industry is described what it make up is it even asks the question is construction a single industry This book will change the way most readers understand the construction industry whatever that may be not from the point of view of visible on site activities but through a scientific approach to analysis and understanding of how projects firms and various sectors of the industry work and how things are changing and may continue

to change in future It is essential reading for students and researchers in construction management quantity surveying architecture and engineering *Economic Theory and the Construction Industry* P. Hillebrandt,2000-06-20 This revised edition of an established classic textbook brings the subject right up to date It applies economic theory to the formation of demand on the construction industry and to the way the industry responds This edition provides a topical assessment of the implication for competition of new methods of procurement includes a new chapter on rehabilitation repair and maintenance and extends the use of theory to issues such as the problems of appropriate technology for developing countries and contractors diversification **Economics for the Modern Built Environment** Les Ruddock,2008-10-10 Construction economics needs to respond to the new emphasis on sustainable development on the medium and long term consequences of construction on the whole life cycle and on the service rendered by buildings Its focus now extends from design and construction to the operation maintenance refurbishment and demolition of property Drawing on the work of the CIB Task Group on Macroeconomics for Construction this book discusses mesoeconomic and macroeconomic models and methodologies in construction economics and is suited to graduate students and researchers *Construction Microeconomics* Christian Brockmann,2023-01-18 CONSTRUCTION MICROECONOMICS Unique and comprehensive reference describing microeconomic approaches theories and models adapted to and developed for the construction industry Construction Microeconomics provides comprehensive coverage of microeconomics applied to the construction industry focusing on construction clients who initiate construction projects and on contractors who transform the ideas and plans of clients into infrastructure and buildings With the help of microeconomic theory it tries to answer questions about decision making by clients contractors and governments with respect to projects in the built environment It includes discussions of alternative theories to mainstream microeconomics such as new institutional economics behavioral economics and the capability approach Applications from the construction sector including land supply sustainability industrialization and lean construction are provided to ground the theory in practical construction In Construction Microeconomics readers will learn How microeconomic theory relies heavily on assumptions for modeling and the nuances of adjusting those assumptions How heterogenous contract goods affect supply and demand markets information technology and accordingly the theories of contractors and owners How interaction influences the production process and how land as a production factor changes the production function How ex ante costs determine the cost theory of the contractor and why contracting is more akin to the service sector than the goods sector Advanced undergraduate and masters students lecturers and academics in construction and related disciplines and professionals in the construction industry looking for expert analysis into a unique facet of the field will find Construction Microeconomics to be a valuable complete and authoritative reference on the subject

Accounting for Construction Rick Best,Jim Meikle,2019-03-27 Accounting for Construction follows on from Measuring Construction edited by the same team It extends the coverage of some of the material in the first volume and expands the

range of related topics to include inter alia shadow economies accounting for informal construction and the treatment of the built environment sector in national accounts Taken together the two volumes collate a range of topics that are only addressed if addressed at all in occasional academic papers and the publications of bodies such as national statistical offices and the World Bank Accounting for Construction presents international examples from the UK Australia and New Zealand and from both academic and professional contributors This book is essential reading for all researchers and professionals interested in construction economics construction management and anyone interested in how the construction industry affects the global economy in ways previously under represented in the literature **The Modern Construction Firm**

Jacqueline Cannon, Patricia M. Hillebrandt, 1990-02-06 A refreshing and useful addition to the folklore of management All in all this is a worthwhile insight into the management views and structure of some of our leading construction companies J J Farrow Chartered Builder This volume describes and analyses the behaviour of large UK construction firms in the determination and implementation of their strategy It covers in addition to the selection of objectives and the methods for their achievement policies on growth and diversification finance marketing and bidding international operations management and labour and subcontracting Throughout the book the relationship is examined between the theory outlined in the companion volume and the actual behaviour of firms The final chapter concludes with a discussion of the means to bridge the gaps which are found to exist between theory and practice **Construction Economics** Danny Myers, 2022-05-22

Construction Economics provides students with the principles underlying the relationship between economic theory and the construction industry Its new approach specifically examines the problems of securing sustainable construction and this fifth edition broadens the message to address the immediacy of the problems relating to the carbon based world that we have constructed Embracing the whole process of the construction life cycle the new edition discusses the economic impact of the Covid pandemic on the industry and the broader implications of the promise to build back better It also includes new coverage of the opportunities offered by technology the establishment of higher standards to achieve greater energy efficiency and wellbeing the adoption of the principles of a circular economy the retrofit of existing buildings and the recycling of materials New sections also highlight the methodology of the subject to identify the boundaries of construction economics and clarify what to expect and what can be achieved As with previous editions it retains a tried and tested format including a clear and user friendly style use of colour for emphasis regular summaries of key points a glossary of key terms extensive use of tables figures and data readings from Construction Management and Economics tutorial questions to review each section research guidance reviews of useful websites This invaluable textbook is essential reading across a wide range of disciplines It provides the economic context to the relevance of sustainability and debates about climate change highlighting the vital contributions that surveyors contractors project managers engineers architects and developers can offer to take it forward **Construction Reports 1944-98** Mike Murray, David Langford, 2008-04-15 It is often said that in

order to know where we are going we need to know where we have been For some years the construction industry has been challenged to deliver better performance in terms of value for money timelier construction and defect free building Behind this remodelling of an industry is Government The interest by Government is not new and report after report in the post war period has exhorted the industry to perform better This book documents how Government through influential reports has sought to shape the performance and attitudes of parties to the construction industry It provides a critical review of 12 of the most significant setting these against their political social and economic background and offers a ready reference and critique for researchers of construction management government and economics **Construction Company Management**

Abid Hasan,Asheem Shrestha,Kumar Neeraj Jha,2024-09-23 Construction Company Management will give readers a detailed understanding of the critical aspects of managing a successful construction company in a dynamic and complex construction business environment characterised by intense competition supply chain disruptions and rapid changes in technology regulations client preferences and market conditions The book will introduce readers to different dimensions of construction company management The topics covered reflect current business practices in the construction industry including company strategy and business models stakeholder management contract management resource management risk management knowledge management company finance digital innovation organisational resilience and the regulatory environment The book also includes much needed discussions on ethics integrity and professional standards and diversity equity and inclusion in construction companies It explores the opportunities and challenges relevant to construction company management in global contexts with the help of case studies from different regions of the world Providing a concise book on this essential subject Construction Company Management serves both students and those educators who teach it in their built environment courses Practitioners will find the theory informed company management practices discussed in the book valuable and useful in their practical contexts *Research Companion to Construction Economics* Ofori, George,2022-03-15 This innovative

Research Companion considers the history nature and status of construction economics and its need for development as a field in order to be recognised as a distinct discipline It presents a state of the art review of construction economics identifying areas for further research **Construction Economics** Stephen Gruneberg,1997-11-11 This book deals with the economics of construction at three levels the industry the firm and the project It is intended for a broad range of undergraduate students of the built environment architect surveyor engineer It is divided into three parts the first deals with the construction industry its economic development structure and role in the economy Construction is seen as a production process Part 2 covers the practical management of firms and examines costs revenues and markets from the point of view of economists and managers Part 3 deals with strategic decision making involved in property development and project appraisal and looks at feasibility studies It links the economics of the production process of construction to the economics of its output namely the buildings and structures of the built environment The Economics of the Construction Industry Gerald
