Konczacki,Jane L. Parpart,Timothy M. Shaw,2014-01-14 First Published in 1990 Volume Two of Studies of Economic History of South Africa looks at the Lesotho and Swaziland regions The unfolding history and historiography of Southern Africa pose profound challenges for both analysis and praxis in the last decade of the twentieth century These challenges are reflected in the range of investigations and contradictions some of which are treated here which together constitute an intellectual and political conjuncture This collection of studies deals with the countries which were not included in the companion book on the economic history of the Front Line States Most of the space in the present volume is devoted to South Africa primarily because of its importance to the region but also because contributions to the economic history of that country in English are very extensive as compared to the other states of Southern Africa      **Politics and Society in South Africa** Daryl

Glaser,2000-12-22 Darryl Glaser supplies an illuminating overview of the scholarship since 1970 on South Africa s political history His emphasis is on the debates between liberals Marxists and to a lesser extent post structuralists about the origins and the course of South Africa s racial order Tom Lodge University of Witwatersrand A well researched well argued readable interesting informative and competent study Capital and Class Providing a wide ranging and critical introduction to contemporary South Africa this book uses an interdisciplinary lens to introduce the student to the main debates historical context and issues that have characterized the study of South Africa over the last three decades Key topics include the role of colonialism capitalism and modernity in the formation of the racial order changes in the South African state questions of class race and ethnicity black resistance and the transition to democracy A number of underlying debates are critically evaluated For exmple the contribution of materialist and class analytic approaches the application of post structuralism and theories of modernity and the prospects for democratic liberalism and socialism in post apartheid South Africa      **The**

**Shaping of South African Society, 1652-1840.** Richard Elphick,Hermann Giliomee,2014-01-15 History is a powerful aid to the understanding of the present and those who are concerned with the escalating crisis in South Africa will find this an invaluable source book This is the story of the evolution of a society in which race became the dominant characteristic the primary determinant of status wealth and power Cultural chauvinism of the first European colonists primarily the Dutch merged with economic and demographic developments to create a society in which whites relegated all blacks free blacks Africans imported slaves to a systematic pattern of subordination and oppression that foreshadowed the apartheid of the twentieth century From the beginning of the nineteenth century the new empire builders the British reinforced the racial

order In the next century and a half the industrialized South Africa would become firmly integrated into the world economy Published originally in South Africa in 1979 and updated and expanded now a decade later this book by twelve South African British Canadian Dutch and American scholars is the most comprehensive history of the early years of that troubled nation The authors put South Africa in the comparative context of other colonial systems Their social political and economic history is rich with empirical data and rests on a solid base of archival research The story they tell is a complex drama of a racial structure that has resisted hostile impulses from without and rebellion from within A History of South Africa Leonard Thompson,2014-04-29 A magisterial history of South Africa from the earliest known human inhabitation of the region to the present Lynn Berat updates this classic text with a new chapter chronicling the first presidential term of Mbeki and ending with the celebrations of the centenary of South Africa s ruling African National Congress in January 2012 A history that is both accurate and authentic written in a delightful literary style Archbishop Desmond Tutu Should become the standard general text for South African history Recommended for college classes and anyone interested in obtaining a historical framework in which to place events occurring in South Africa today Roger B Beck History Reviews of New Books State, Civil Society and Apartheid in South Africa T. Kuperus,1999-04-07 An examination of the role played by civil society in the legitimisation of South Africa s apartheid regime and its racial policy This book focuses on the interaction of dominant groups within the Dutch Reformed Church and the South African state over the development of race policy within the broader context of state civil society relations This allows a theoretical examination and typology of the variety of state civil society relations Additionally the particular case study demonstrates that civil society s existence in and authoritarian situations can deter the establishment of democracy when components of civil society identify themselves with exclusive ethnic interests

**Varieties of Capitalism Over Time** Niall G. Mackenzie,Andrew Perchard,Christopher Miller,Neil Forbes,2022-12-12 This book looks at how varieties of capitalism emerge over time and across different geographies and is comprised of submissions from scholars around the globe Covering a wide range of territories including Europe the Americas Africa and Asia across both the nineteenth and twentieth centuries this edited volume considers the roles that the state and business working together play in the emergence of different economic systems Whilst most analyses focus on identifying different types of capitalism the chapters in this volume instead focus on how these different types develop the drivers of their emergence and the people and organisations behind the developments The geographical spread of analyses allows the reader to delve into how different countries have managed and even created their economic systems providing comparative insights into our understanding of how different national economic models develop over time This book was originally published as a special issue of Business History **Power and Resistance in an African Society** Les Switzer,1993 Imagine a history of the United States written from the perspective of the African American community Imagine that the story of this community is told not only from the viewpoint of its leaders the middle class elites but also from the viewpoint of sharecroppers

industrial workers and others living on the margins of American culture And finally imagine that this is not only about political and economic relations but also about race class gender and religious relations about the lived experiences of one community that both reflect and represent fundamental issues of power and resistance in an entire society This is what Les Switzer has tried to do with his book *Power and Resistance in an African Society* Scholars who have read it suggest that this is the first attempt to write a history of South Africa from the perspective of one subordinate community in South Africa The result is a transformed history from below The names dates events and issues of conventional textbook history lose their meaning in the process of reconstructing a history that seeks to free the African from the domain of South Africa's ruling culture The book also offers a unique contribution to African studies in sub-Saharan Africa because it explores the material and symbolic manifestations of power and resistance in a pre colonial colonial and post colonial setting The Ciskei region in the eastern Cape was selected as the case study This was the historic zone of conflict between European and Bantu speaking African in southern Africa the Cape Xhosa wars in this region lasting a century The contemporary African nationalist movement in South Africa first emerged in a variety of organizational forms in the Ciskei during the 1870s and 1880s The strategy of petitionary protest probably persisted longer here than anywhere else in South Africa in the post colonial period but popular resistance found a variety of windows outside organized African politics The Ciskei for example was a focal point of rural resistance in the 1920s and early 1930s and again between the early 1940s and early 1960s The gap between rural and urban dissidents in South Africa moreover was first bridged in the Ciskei and its environs during the 1952 Defiance Campaign Finally the Ciskei's segregated African reserve where economic conditions were judged to be most serious emerged as a primary site of struggle on South Africa's periphery during the 1970s and 1980s The focus of this study is on the Xhosa speaking peoples who lived in the Ciskei region in the first century after conquest To highlight the linkages between regional and national issues the Xhosa in the Ciskei are examined in the context of unfolding events in the Cape Colony and in the unified settler state of South Africa after 1910 A distinct plurality of voices would be formed in the complex interplay between color consciousness and class as this community sought space for itself within the domain of South Africa's ruling culture
