Hazardous Waste Handbook For Health And Safety:

Hazardous Waste Handbook for Health and Safety William F. Martin, John M. Lippitt, Timothy G. Prothero, 2013-10-22
Hazardous Waste Handbook for Health and Safety provides instructions and guidelines to supervisors responsible for occupational safety and health programs at hazardous waste sites. The manual presents the health and safety risks of hazardous waste sites, ways to implement and carry out hazardous waste site clean up on a preliminary basis for developing a specific health and safety program and planning for and responding to emergencies involving hazardous materials. The book will be very useful to supervisors and safety engineers of hazardous waste sites. **Hazardous waste handbook for health and safety** W.F. Lippitt Martin (J.M. & Prothero, T.G.), 1992 **Hazardous Waste Handbook** John Lippitt, Paul Webb, William Martin, 2000-10-05 Hazardous Waste Handbook 3E offers a straightforward approach to protecting workers who clean up the nation's hazardous waste sites and chemical spills. Supervisors and site inspectors will find this handbook very useful in answering occupational health questions at the work site. The manual covers such topics as site characterization, air monitoring, personal protective equipment, decontamination, and site emergencies. Numerous health and safety checklists, hazardous chemical data sheets, and personal protective equipment recommendations are presented for field decisions. The goal of the book is to provide practical information on protecting workers while also containing the high cost of hazardous chemical waste cleanups. Provides practical information on protecting workers and keeping cleanup costs down. Designed to allow supervisors and site inspectors to find information quickly. Offers numerous health and safety checklists, hazardous chemical data sheets, and recommendations on protective equipment. *Occupational Safety and Health Guidance Manual for Hazardous Waste Site Activities* National Institute for Occupational Safety and Health, Occupational Safety and Health Administration, U. S. Coast Guard, 2014-03-08 In the past decade, industry, government, and the general public have become increasingly aware of the need to respond to the hazardous waste problem, which has grown steadily over the past 40 years. In 1980, Congress passed the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), the Superfund law, to provide for liability, compensation, cleanup, and emergency response for hazardous substances released into the environment and the cleanup of inactive waste disposal sites. This manual is a guidance document for managers responsible for occupational safety and health programs at inactive hazardous waste sites. It assumes a basic knowledge of science and experience in occupational safety and health. It is the product of a four-agency committee: the National Institute for Occupational Safety and Health (NIOSH), the Occupational Safety and Health Administration (OSHA), the U. S. Coast Guard (USCG), and the U. S. Environmental Protection Agency (EPA). Mandated by CERCLA section 301(f) to study the problem of protecting the safety and health of workers at hazardous waste sites and by CERCLA section 111(c)(6) to develop a program to protect the health and safety of employees involved in response to hazardous substance releases, removals, or remedial actions. This manual is intended for federal, state, and local officials and their contractors. It may be used as a

planning tool by government or private individuals As a management tool by upper level or field managers As an educational tool to provide a comprehensive overview of all aspects of safety and health protection at hazardous waste sites As a reference document for site personnel who need to review important aspects of health and safety This document is not a detailed industrial hygiene textbook or a comprehensive source book on occupational safety and health It provides general guidance and should be used as a preliminary basis for developing a specific health and safety program The appropriateness of the information presented should always be evaluated in light of site specific conditions Other sources and experienced individuals should be consulted as necessary for the detail needed to design and implement occupational safety and health programs at specific hazardous waste sites
