Healing Of Holly Jean:

Healing of Holly-Jean I. Chandler,1995 The Healing of Holly-Jean Irene Lin-Chandler,1995 **Mystery Women, Volume Three (Revised)** Colleen Barnett,2010-12-31 Like other fictional characters female sleuths may live in the past or the future They may represent current times with some level of reality or shape their settings to suit an agenda There are audiences for both realism and escapism in the mystery novel It is interesting however to compare the fictional world of the mystery sleuth with the world in which readers live Of course mystery readers do not share one simplistic world They live in urban suburban and rural areas as do the female heroines in the books they read They may choose a book because it has a familiar background or because it takes them to places they long to visit Readers may be rich or poor young or old conservative or liberal So are the heroines What incredible choices there are today in mystery series This three volume encyclopedia of women characters in the mystery novel is like a gigantic menu Like a menu the descriptions of the items that are provided are subjective Volume 3 of Mystery Women as currently updated adds an additional 42 sleuths to the 500 plus who were covered in the initial Volume 3 These are more recently discovered sleuths who were introduced during the period from January 1 1990 to December 31 1999 This more than doubles the number of sleuths introduced in the 1980s 298 of whom were covered in Volume 2 and easily exceeded the 347 series and some outstanding individuals described in Volume 1 which covered a 130 year period from 1860 1979 It also includes updates on those individuals covered in the first edition changes in status short reviews of books published since the first edition through December 31 2008 **Detective Agency** Priscilla L. Walton,Manina Jones,1999-05-31 Since the late 1970s a subgenre of crime fiction written by women and featuring a professional woman investigator has exploded on the popular fiction market Priscilla L Walton and Manina Jones focus on this recent proliferation of women writers of detective fiction providing the first book length study of the historical and societal changes that fueled this popularity along with insightful and entertaining readings of the texts themselves Walton and Jones place the genre within its aesthetic social and economic contexts reading it as an index of cultural beliefs Addressing the ways that Sara Paretsky Sue Grafton Marcia Muller and others work through the conventions of the hard boiled genre made popular by writers such as Dashiell Hammett Raymond Chandler and Mickey Spillane the authors show how the male hard boiled tradition has been challenged and transformed Issues of child spousal and sexual abuse are more likely to surface in women s detective novels the authors show and female sleuths face many of the same dilemmas as those who read about them everyday problems with relationships parenting and money Detective Agency also integrates interviews with authors and publishers reader surveys publication data and analysis of internet discussion groups to present a fascinating picture of the industry of women s detective fiction Authors of these works are powerful players in the publishing system as well as agents of cultural intervention Walton and Jones claim They conclude by examining the rise of female detectives in television and film *Silk Stalkings* Victoria Nichols,Susan Thompson,1998-05-07 Provides a comprehensive

good place to consult the narrative turn in medical anthropology Thick with the richness and diversity and stubborn resistance to interpretations of human stories of illness An anthropological antidote for too narrow a framing of the complex tangle of ways of being and ways of telling that make medicine a space of indelibly human experiences Arthur Kleinman author of *The Illness Narratives* *Nursing Our Healer's Heart* Lorre Laws, 2024-12-10 The nursing profession is in crisis Within a decade the world will have just over half the number of nurses it needs The global nursing workforce has experienced mass complex trauma secondary to healthcare system inadequacies and a global pandemic Traumatized and burned out nurses are leaving their roles or the profession in unprecedented numbers Those who remain are stretched to or beyond their capacity While system level strategies aim to address this crisis none of them consider nurse traumatization and its impact upon patient safety outcomes and quality of care We cannot wait for health systems to prioritize nurse safety Nurses can and must come together as a global community to heal through avoidable and unavoidable nurse specific traumatization while partnering with healthcare leaders to usher in a new era of nursing This book through an actionable framework guides nurses in healing the traumas and hardships they've endured as individuals and nursing communities Grounded in the sciences of unitary caring integrative nursing neurophysiology and transpersonal neurobiology this book supports nurses in restoring their healers heart as they come together to address the deep trauma burnout attrition and presenteeism that are central to the nursing crisis Nurses will learn the language of their nervous system and how to navigate it as a foundational practice to support professional wellbeing Each nurse will discover their unique innate care plan which will guide their healing and co healing with other nurses By embracing the healing and practices offered in this book nurses will learn how to support their nervous system regulation so they can thrive instead of survive in practice Working from their healed scars instead of their open wounds nurses can effectively lead sustainable organizational change and health care reforms that prioritize nurse safety and professional wellbeing **MLA International Bibliography of Books and Articles on the Modern Languages and Literatures** ,1999 *Theological and Ethical Perspectives on Climate Engineering* Forrest Clingerman, Kevin J. O'Brien, 2016-09-09 The climate is changing as an unintended consequence of human industrialization and consumerism Recently some scientists and engineers have suggested climate engineering technological solutions that would intentionally change the climate to make it more hospitable This approach focuses on large scale technologies to alleviate the worst effects of anthropogenic climate change This book considers the moral philosophical and religious questions raised by such proposals bringing Christian theology and ethics into the conversation about climate engineering for the first time The contributors have different views on whether climate engineering is morally acceptable and on what kinds of climate engineering are most promising and most dangerous but all agree that religion has a vital role to play in the analysis and decisions called for on this vital issue *Calming the Storm* presents diverse perspectives on some of the most vital questions raised by climate engineering Who has the right to make decisions about such global

technological efforts What have we learned from the decisions that caused the climate to change that might shed light on efforts to reverse that change What frameworks and metaphors are helpful in thinking about climate engineering and which are counterproductive What religious beliefs practices and rituals can help people to imagine and evaluate the prospect of engineering the climate

Subsurface Karen Pinkus, 2023-04-18 A bold new consideration of climate change between narratives of the Earth's layers and policy of the present Long seen as a realm of mystery and possibility the subsurface beneath our feet has taken on all too real import in the era of climate change Can reading narratives of the past that take imaginative leaps under the surface better attune us to our present knowledge of a warming planet In *Subsurface* Karen Pinkus looks below the surface of texts by Edgar Allan Poe Arthur Conan Doyle George Sand E T A Hoffmann and Jules Verne to find the buried origins of capitalist fantasies in which humans take what they want from the earth Putting such texts into conversation with narrative theory critical theory geology and climate policy she shows that the subsurface has been in our past a place of myth and stories of male voyages down to gain knowledge but it is also now the realm of fossil fuels How do these two modes intertwine A highly original take on evocative terms such as extraction burial fossils deep time and speculative futurity *Subsurface* questions the certainty of comfortable narrative arcs It asks us to read literature with and against the figure of the geological column with and against fossil fuels and the emissions warming our planet As we see our former selves move into the distance what new modes of imagination might we summon
