Novel Approach to Curing Cancer Jianqing Wu, Ping Zha, 2019-08-11 In this book the authors make extensive comparison between medical treatments and health optimization methods an improved mind body model in order to determine their relative and TRUE benefits for cancer patients For the health optimization method they examine its use history acceptance and performance throughout its history and for medicine they examine medical treatment history leading cancer theories standard of care formation formation of legal frameworks and overwhelming performance data we could find from the massive medical literature We can show with irrefutable evidence why medicine cannot cure cancer and what role it is actually playing The book 1 discloses a systematic methodology for curing cancer in confidence 2 extensively discusses how to do right things to win a speed contest in fighting cancer 3 extensively discusses how to do right things to control cancer cell population a critical strategy for survival 4 provides detailed analysis of fatal common mistakes that have

taken nine of ten cancer patient lives 5 exposes flaws in the cancer treatment models medical research model the foundation of medicine and 6 conduct a detailed analysis of four killer factors which are routinely found in nearly all cancer care The approach used is similar to one used in Health Optimization Engineering a new branch of health art The book teaches the decisive roles of SPEED NUMBER and MULTIPLE FACTORS and how to fight cancer by using a two way optimization methodology Those three terms and optimization method are not mentioned in medical books cancer research articles and are not part of the language used in hospitals Our simulation and our kinetic studies show that both cancer development and reversal processes would take many years The rates of reversals for cancer and all chronic diseases are so slow that medicine cannot accurately evaluate This is why medicine cannot recognize or refuses to acknowledge any cure that requires half a year to several years to accomplish The approach we use in this book is directly in conflict with three core concepts in medicine dualism reductionism and population based approach Moreover we found that medical treatments can partially neutralize and totally nullify the curative benefits of our optimization method Based on our own findings and the results from reanalyzing massive existing medical publications we inevitably found that medical treatments are primarily responsible for creating the cancer panic and the treatments shorten lives in a super majority of cases We try to analyze every issue in the most comprehensive way Our analysis covers medical model and its legal framework leading cancer theories treatment development histories formation of standard of care control selections in drug trials the massive cancer controversies and mountains of actual performance data The most convincing evidence is the performance verdicts by recent medical studies and latest meta reviews We try to build a watertight case that precludes any of those arguments that have been made by proponents of the reductionist medical model

Advances in Parkinson's Disease Research: Exploring Biomarkers and Therapeutic Strategies for Halting Disease Progression Carmen Venegas, Anastasia Bougea, Yildiz Degirmenci, 2025-08-19 Parkinson's disease PD is the fastest growing neurodegenerative disorder being prevalent in 1% of people aged above 65 years PD is characterized by dopaminergic neurons and the accumulation of alpha synuclein syn rich protein in Lewy bodies Although aging is the highest risk factor for developing PD the genetic predisposition and exposure to environmental factors such as herbicides or

pesticides can induce oxidative stress DNA damage and neuronal death contributing to PD pathogenesis To date there is not a therapy to halt the disease Many studies have shown multiple altered pathways offering different approaches for developing an effective therapy however the current therapies are merely symptomatic and they include a substitution of dopamine by the administration of Levodopa the use of catechol O O methyltransferase inhibitors monoamine oxidase inhibitors or Dopamine agonist among others However these treatments can only relieve some of the symptoms they do not slow the progression of the disease and they have limited long term efficacy

[The Woven Path to Healing](#) Muhamad Adam,2025-07-08 The Woven Path to Healing is not merely a book it is a quiet revolution a return to the wisdom That healing is not something done to us but something awakened within us Across cultures and centuries humanity has sought wholeness through paths both seen and unseen through breath and prayer fasting and touch sound and silence This book weaves these threads into one fabric where ancient traditions converse with modern science where illness becomes an invitation and where the soul and body are no longer strangers Here healing is not reduced to remedies or rituals It becomes a philosophy A gentle unfolding A reunion of mind heart and spirit You will not find rigid dogma within these pages Instead you will find reflections questions and shared principles born from experience exploration and faith in the intelligence that animates all living things May these chapters serve as lanterns in your hand lighting the path not toward escape from suffering but toward understanding it with grace with curiosity and with love
