The Healing Power of Energized Water Ulrich Holst,2010-04-14 An introduction to the biotechnologies of water vitalization Reveals the deeper secrets of the element water including its memory Shows the practical applications founded on the work of such pioneers of water research as Viktor Schauberger Theodor Schwenk and Masaru Emoto Looks at water dynamization devices currently available commercially Water is more than the simple liquid evoked by its scientific name H₂O The discoveries by pioneering figures like Viktor Schauberger and Masaru Emoto have shown that this essential substance is much more complex than originally believed Water is incredibly sensitive to the micro information from the surrounding environment and it also possesses a memory Unfortunately many of the modern techniques for making water readily available have resulted in depreciating its vitality Many of the benefits that water can provide when in its optimum natural state have been lost But there are now methods that have been perfected over the past several decades that can transform our banal tap water back to its natural potent state as the elixir of life Experience has shown that these methods and devices can even transform water that has been heavily polluted by agriculture or industry into a potable fluid that looks like the product of a limpid mountain spring Tests show that no trace of the pollutants remain Many of these devices are available commercially offering to all the possibility of enjoying the optimum benefits water can deliver when in its healthy natural state

Water's Healing Powers David Broward,2017-12-05 In all the ancient religious texts around the world we found 3 major claims regarding the life giving substance we call water Firstly that water was in the beginning of all Creation For example in the Bible we found that the Spirit of God moved upon the face of the waters Genesis 1 2 God created a firmament in the midst of the waters divide the waters from the waters Genesis 1 6 and founded the Earth upon waters Genesis 1 9 The second major claim is that the ultimate origin of water in the Earth s hydrosphere is in the deep Earth e g Exodus 17 6 Numbers 20 8 11 Judges 15 19 and thirdly that water has the power to heal bless nourish life bring happiness and take away sins On the other hand in biology we learn that we spend our first 38 40 weeks of existence in our mother s womb surrounded by the amniotic fluid 98% water In our fetus stage we are made up by 94 % water while as adults all our major internal organs and fluids are made up from water our blood about 92% water our lungs 84% our muscles and kidneys 79% our brain the spinal cord the nerve trunks and our heart about 73% water From the molecular point of view we are made up from 99% of the substance that we call water and everything we do is related to water our health the food we eat the type of energy we use the homes we live in the work we do and how we travel to and from work the clothes we wear the

way we're spending our free time and so on. Even more in 2014 the researchers from the University of Alberta Edmonton Canada and Northwestern University Evanston Illinois confirmed in the prestigious scientific journals Nature and Science that the Earth's water came from within. From where did water originate on our Blue Planet? Could it be in the beginning of all life? Could it have the ability to heal as claimed in all the major religious texts? Or is just an odorless and tasteless liquid having the well known formula H_2O *Pocket Guide for Holistic Nursing* Barbara Montgomery Dossey, Lynn Keegan, Cathie E. Guzzetta, 2005.
