bodies are commodified and profits derived from premature death In doing so it provides a unique perspective on our understanding how life and death drive the twenty first century global economy James Tyner tracks a history from the 1600s through which premature death and mortality became something calculable predictable manageable and even profitable Drawing on a range of examples including the criminalization of migrant labor medical tourism life insurance and health care he explores how today we can no longer presume that all bodies undergo the same processes of life death fertility and mortality He goes on to develop the concept of shared mortality among vulnerable populations and examines forms of capital exploitation that have emerged around death and the reproduction of labor Positioned at the intersection of two fields the political economy of labor and the philosophy of mortality *Dead Labor* builds on Marx's notion that death and truncated life is a constant factor in the processes of labor Considering premature death also as a biopolitical and bioeconomic concept Tyner shows how racialized and gendered bodies are exposed to it in unbalanced ways within capitalism and how bodies are then commodified made surplus and redundant and even disassembled in order to accumulate capital

*Tea Environments and Plantation Culture* Arnab Dey, 2018-12-13 Arnab Dey examines the intersecting role of law ecology and agronomy in shaping the history of tea and its plantations in British east India He suggests that looking afresh at the legal environmental and agro economic aspects of tea production illuminate covert expedient and often illegal administrative and commercial dealings that had an immediate and long term human and

environmental impact on the region Critiquing this imperial commodity s advertised mandate of agrarian modernization in colonial India Dey points to numerous tea pests disease ecologies felled forests harsh working conditions wage manipulation and political resistance as examples of tea s unseemly legacy in the subcontinent Dey draws together the plant and the plantation in highlighting the ironies of the tea economy and its consequences for the agrarian history of eastern India
