Insulin Stuart Bradwel,2023-06-08 In 1922 an unlikely team of researchers in Toronto made one of the most important medical breakthroughs of the century insulin Their discovery seemed miraculous When it was given to diabetic patients on the brink of death their condition rapidly improved Those present could barely believe their eyes they had witnessed resurrection However this was no simple cure Injections must be taken for life Without them symptoms quickly return often with fatal results But while a lifetime on insulin poses great challenges it also offers opportunities In this revelatory history Stuart Bradwel looks back on one of medicine s most celebrated innovations Setting professional narrative against subjective patient experience he tells the story of a drug that has challenged many of the basic assumptions upon which medical practice is built both inside and outside the clinic Nevertheless Bradwel reminds us that the centenary of this apparent wonder drug should be no cause for celebration Insulin often remains inaccessible to those who need it most elusive prescriptions uneven availability and sky high prices result in rationing and desperate do it yourself research and development In the face of bootstraps rhetoric and Pharma Bro capitalists patients across the world are left to fend for themselves There is a long way to go in the twenty first century until insulin truly fulfils the extraordinary promises made by its discovery Also available as an audiobook
