

UChicago Careers in Health Professions

UChicago Careers in Health Professions (UCIHP) is a comprehensive, four-year, pre-professional program that provides College students with the resources and support to develop a customized portfolio of knowledge, skill sets, and experiences required for advanced study or employment in health and medicine. As early as their first year, pre-health students are advised on how to assess their strengths, hone their interests, and identify appropriate course work, research, internships and clinical opportunities.

Advising

The UCIHP team works closely with pre-health students to ensure they are prepared for both the application and job search processes. UCIHP frequently partners with other campus offices, including the University Community Service Center, Study Abroad and the Office of the Dean of Students in the College to provide advising tailored to each student's interests and strengths.

Career Exploration

UCIHP supports students and alumni as they explore the many health professions. The program offers panels and workshops throughout the academic year. Students have access to an onsite library with internship, career, and volunteer information. In addition, UCIHP invites admissions representatives from top schools to meet with pre-health students.

Annual Report to the Legislature Health Professions Career Opportunity Program (Calif.), 1989 **Tests on the Pathway to a Health Career**, 1989 Undergraduate Education for Public Health in the United States Cheryl Lynn Addy, Daniel Shea Gerber, David Thomas Dyjack, Connie J. Evashwick, 2015-07-03

Undergraduate programs in public health are growing rapidly. At colleges and universities throughout the United States, both the number of programs and the number of students have expanded greatly in the past decade. In response to this trend, the Council for Education of Public Health (CEPH) has begun to accredit undergraduate public health programs, with the first programs approved in 2014. Around the country, programs exhibit wide variation, from concentrations in liberal arts colleges to pre-clinical foundations at doctorate-granting universities to undergraduate programs in accredited schools of public health. Faculty, both new and seasoned, are fully aware of the need to integrate undergraduate education in public health with graduate education, but the roadmaps of exactly how to do so are still nascent. The purpose of this Research Topic is to gather articles describing this variation with the intent that the collective body of work will facilitate analysis and discussion of what makes a quality education and builds a competent workforce. **Special Health Career**
