**Supporting Women for Labour and Birth** Nicky Leap, Billie Hunter, 2016-06-10. Fear of childbirth: the increasing use of epidurals and soaring caesarean section rates are the focus of much apprehension, debate and controversy in contemporary maternity care. Across the world, support in labour has been shown to reduce obstetric interventions and improve outcomes for women and babies, yet women often report feeling unhappy with the support they receive. This textbook provides a clear and practical guide to supporting women in labour, looking at a range of techniques and approaches that promote a safe and positive experience of birth for women and their families. Written by two highly experienced midwifery authors, this text draws on up-to-date research, identifying how evidence can be applied to everyday practice. It includes narratives from women and practitioners, including midwives, doulas, childbirth educators and students. These are used to illustrate a range of situations where the quality of support is central to the quality of the experience and outcome. **Supporting Women for Labour and Birth** encourages readers to reflect on their experiences and examine the evidence provided by both research and the experiences of women and practitioners in order to explore how this could be incorporated into their practice. The only book to deal directly with the practical and emotional issues associated with labour support, it is an ideal text for student midwives and an important reference for practising midwives, doulas and other childbirth practitioners.

**Pious Traders in Medicine** Renate Wilson, 2010-11. This book tells the story of two generations of Pietist ministers sent from Halle in Brandenburg-Prussia during the eighteenth century to the German communities of North America. In conjunction with their clerical office, these ministers provided medical services using pharmaceuticals and medical texts brought with them from Europe. Their practice is an example of how different medical markets and medical cultures evolved in North America. At the heart of the story is the Francke Orphanage, a famous religious and philanthropic foundation started in Halle in 1696. Pharmaceuticals from Halle were manufactured and sold throughout Europe as part of a commercial enterprise designed to support Francke's charitable goals. Halle's reputation for consistent product quality and safety soon spread to North America, where men and women became actively engaged in

providing medical care to Lutheran and Reformed congregations along the east coast mainly the backcountry of Pennsylvania New Jersey Maryland and Virginia The story continues to about 1810 when Halle s North American clergy had become independent from the motherhouse and American medical practice and education began to follow its own course Wilson draws upon a large array of correspondence trading ledgers and daybooks in European and American archives Through these records she enables us to see firsthand the experience of men and women as both patients and practitioners The result is a rare glimpse into the world of German medicine and the pharmaceutical trade in eighteenth century North America
