Current Issues in Lesbian, Gay, Bisexual, and Transgender Health Jay Harcourt, 2013-04-11 Learn what resources are needed for lesser recognized LGBT health issues Most literature that explores LGBT health issues concentrates on HIV AIDS while leaving research studies on other vital issues lacking Current Issues in Lesbian Gay Bisexual and Transgender Health addresses this inadequacy by presenting a broad range of LGBT health issues from an interdisciplinary and mixed method perspective Leading experts present both quantitative and qualitative descriptions of health issues among various population groups focusing on those topics poorly represented in present day literature This book is a strong start to fill in the blanks about unrealized health issues of LGBT individuals and offers insights into the resources needed to address them Methods to assess sexual orientation and gender identity are not normally found in most population based research Because of the diversity within the relatively small LGBT population research has been forced to generalize making it less likely to effectively contribute to quality health issue data for these individuals The research presented in Current Issues in Lesbian Gay Bisexual and Transgender Health takes particular care to specify how the orientation and sexual identity of study participants was measured This book carefully mines previously unrevealed health disparities among LGBT populations across a broad spectrum of diseases beyond the standard focus on HIV AIDS The most current and important studies are presented including rare research on transgender health issues The chapters are extensively referenced and several include figures and tables to clarify and enhance understanding of the information The wide range of topics in Current Issues in Lesbian Gay Bisexual and Transgender Health include the inclusion of sexual orientation questions in research studies comparison of mental health issues between women of different sexual orientations mental health issues among men of different sexual orientations and HIV status in Australia the impact of sexual identity distress and social support in GLBT youth issues transgender youth health issues female to male FTM transexuals experiences accessing health care research on LBT

domestic violence survivors health needs of male to female MTF transgenders of color Current Issues in Lesbian Gay Bisexual and Transgender Health is crucial thought provoking reading for researchers working in LGBT health public health professionals working in community health and LGBT health policymakers advocates public health and community health faculty and students interested in LGBT health issues

The Health of Lesbian, Gay, Bisexual, and Transgender People Institute of Medicine, Board on the Health of Select Populations, Committee on Lesbian, Gay, Bisexual, and Transgender Health Issues and Research Gaps and Opportunities, 2011-07-24 At a time when lesbian gay bisexual and transgender individuals often referred to under the umbrella acronym LGBT are becoming more visible in society and more socially acknowledged clinicians and researchers are faced with incomplete information about their health status While LGBT populations often are combined as a single entity for research and advocacy purposes each is a distinct population group with its own specific health needs Furthermore the experiences of LGBT individuals are not uniform and are shaped by factors of race ethnicity socioeconomic status geographical location and age any of which can have an effect on health related concerns and needs The Health of Lesbian Gay Bisexual and Transgender People assesses the state of science on the health status of LGBT populations identifies research gaps and opportunities and outlines a research agenda for the National Institute of Health The report examines the health status of these populations in three life stages childhood and adolescence early middle adulthood and later adulthood At each life stage the committee studied mental health physical health risks and protective factors health services and contextual influences To advance understanding of the health needs of all LGBT individuals the report finds that researchers need more data about the demographics of these populations improved methods for collecting and analyzing data and an increased participation of sexual and gender minorities in research The Health of Lesbian Gay Bisexual and Transgender People is a valuable resource for policymakers federal agencies including the National Institute of Health NIH LGBT advocacy groups clinicians and service providers

Oxford Textbook of Women and Mental Health Dora Kohen, 2010-03-18 Gender and mental health is a growing field in psychiatry. Although women's specific mental health problems have been described for hundreds of years, it is in the last two centuries and especially in the last 3 to 4 decades that research in many different aspects of women's mental health has bloomed. We have gained better understanding of the psychological, social, and cultural aspects of mental health problems in women. We have seen epidemiological data describe increased frequency of different clinical aspects of many psychiatric disorders. We have learned about biological and especially endocrinological concomitants of mental health problems in women. In addition, we have been able to describe, classify, and circumscribe different diagnoses as they appear in the female gender. Eating disorders, perinatal psychiatric disorders, consequences of different types of abuse have gained better understanding in the last decades, and we have been able to delve into the social, parental, and personal consequences of the mental health problems. The *Oxford Textbook of Women and Mental Health* brings a balanced understanding of different aspects of gender and mental health. It summarizes the clinical issues and mental health problems as faced today. The first part of the book is dedicated to fundamental aspects in women's mental health. It covers topics from Women's health as a global issue to different medical, psychological theories giving an overview of gender in mental health. The second part of the book examines clinical aspects of women and mental health. In part three, special clinical topics such as PTSD, self-harm, menopause, violence, and their management are investigated. Part four focuses on parental psychiatric disorders, clarifying how mental health and behavioural problems in children could be a marker or a consequence of maternal distress. The final two parts look at the topics of women and disability and legislation and policy. A book of exceptional scope and depth, this volume will be essential for all those health professionals involved in managing mental health problems in women. *Older Lesbian, Gay and Bisexual Adults* Andrew King, 2016-06-03 Andrew King is Senior Lecturer in Sociology at the University of Surrey, UK, and co-editor of *Sociological Objects: Reconfigurations of Social Theory*. *Lesbian & Gay Youth* Caitlin Ryan, Donna Futterman, 1998 Provides guidelines for the care and counseling of lesbian, gay, bisexual, and transgendered youth and features a review of information and research on lesbian and gay health, identity development, and peer and family issues. **Education, Research, and Practice in Lesbian, Gay, Bisexual, and Transgendered Psychology** Gladys L. Croom, 2000 The Fifth Volume in the annual series *Psychological Perspectives on Lesbian and Gay Issues* is devoted to providing a basic collection of resources for educators, practitioners, and researchers in Lesbian, Gay, Bisexual, and Transgendered Psychology. The volume and the series are sponsored by Division 44 of the American Psychological Association. Academic psychologists have been challenged to make psychology curricula more inclusive. Program changes involve revising undergraduate and graduate course material and content to represent the full spectrum of sexual orientation, identity development, and life dilemmas. Similarly, trainers and educators responsible for training in related mental health disciplines, mental health agencies, and other venues that deliver psychological services to Lesbian, Gay, Bisexual, and

Transgendered Psychology individuals have been appropriately challenged to make training competent practitioners a priority. Many practitioners who have had no training in Lesbian Gay Bisexual And Transgendered Psychology find themselves confronted with clients that they feel ill equipped to address. They often have the desire to develop clinical competencies in this area but don't know where to begin. This volume is intended to serve as a basic resource with information on salient lesbian gay bisexual and transgendered psychology issues and to provide the reader with a range of references and other resources to explore key identity development and other subjects. Lesbian, Gay, Bisexual, and Transgender Aging Douglas C. Kimmel, 2006. This volume fills a unique gap. Gerontologists seldom focus on special concerns of gay and lesbian older adults. Lesbian gay bisexual and transgender aging organizations rarely address issues of aging and the mental health field has demonstrated an ability to marginalize both aging and homosexuality. This book lays out the state of knowledge with respect to lesbian gay bisexual and transgender aging: physical health, sexuality, family ties, victimization, and legal and financial concerns. The references at the end of individual chapters and the bibliographical material at the end of the book provide an invaluable resource. For any gerontologist intrigued by the interplay of historical changes and individual aging, it is difficult to imagine a more powerful example than Lesbian Gay Bisexual and Transgender Aging. Evolution of attitudes toward homosexuality, the emergence of HIV/AIDS and legal protections beginning to be afforded to same sex relationships are all part of the changing world that has shaped and been shaped by lesbian gay bisexual and transgender individuals who are now old.
