Ecologies Of The Heart Emotion Belief And The Environment:

Ecologies of the Heart E. N. Anderson, 1996 Equally important he offers much insight into why our own environmental policies have failed and what we can do to better manage our resources *Ecologies of the Heart* E. N. Anderson, In *Ecologies of the Heart* Anderson reveals how religion and other folk beliefs helped pre industrial peoples control and protect their resources He also presents a coherent view of long term sustainable policies for the environment **Ecologies of the Heart** E. N. Anderson, 1996-03-28 There is much we can learn about conservation from native peoples says Gene Anderson While the advanced nations of the West have failed to control overfishing deforestation soil erosion pollution and a host of other environmental problems many traditional peoples manage their natural resources quite successfully And if some traditional peoples mismanage the environment the irrational value some place on rhino horn for instance has left this species endangered the fact remains that most have found ways to introduce sound ecological management into their daily lives Why have they succeeded while we have failed In *Ecologies of the Heart* Gene Anderson reveals how religion and other folk beliefs help pre industrial peoples control and protect their resources Equally important he offers much insight into why our own environmental policies have failed and what we can do to better manage our resources A cultural ecologist Gene Anderson has spent his life exploring the ways in which different groups of people manage the environment and he has lived for years in fishing communities in Hong Kong Malaysia Singapore Tahiti and British Columbia as well as in a Mayan farmtown in south Mexico where he has studied fisheries farming and forest management He has concluded that all traditional societies that have managed resources well over time have done so in part through religion by the use of emotionally powerful cultural symbols that reinforce particular resource management strategies Moreover he argues that these religious beliefs while seeming unscientific if not irrational at first glance are actually based on long observation of nature To illustrate this insight he includes many fascinating portraits of native life He offers for instance an intriguing discussion of the Chinese belief system known as Feng Shui wind and water and tells of meeting villagers in remote areas of Hong Kong s New Territories who assert that dragons live in the mountains and that to disturb them by cutting too sharply into the rock surface would cause floods and landslides which in fact it does He describes the Tlingit Indians of the Pacific Northwest who before they strip bark from the great cedar trees make elaborate apologies to spirits they believe live inside the trees assuring the spirits that they take only what is necessary And we read of the Maya of southern Mexico who speak of the lords of the Forest and the Animals who punish those who take more from the land or the rivers than they need These beliefs work in part because they are based on long observation of nature but also and equally important because they are incorporated into a larger cosmology so that people have a strong emotional investment in them And conversely Anderson argues that our environmental programs often fail because we have not found a way to engage our emotions in conservation practices Folk beliefs are often dismissed as irrational superstitions Yet as Anderson shows these beliefs do more to protect

the environment than modern science does in the West Full of insights *Ecologies of the Heart* mixes anthropology with ecology and psychology traditional myth and folklore with informed discussions of conservation efforts in industrial society to reveal a strikingly new approach to our current environmental crises *Ecology and the Sacred* Roy A. Rappaport, 2001 A meaningful homage to an extraordinary anthropologist *Archaeologies of the Heart* Kisha Supernant, Jane Eva Baxter, Natasha Lyons, Sonya Atalay, 2020-02-13 Archaeological practice is currently shifting in response to feminist indigenous activist community based and anarchic critiques of how archaeology is practiced and how science is used to interpret the past lives of people Inspired by the calls for a different way of doing archaeology this volume presents a case here for a heart centered archaeological practice Heart centered practice emerged in care based disciplines such as nursing and various forms of therapy as a way to recognize the importance of caring for those on whom we work and as an avenue to explore how our interactions with others impacts our own emotions and heart Archaeologists are disciplined to separate mind and heart a division which harkens back to the origins of western thought The dualism between the mental and the physical is fundamental to the concept that humans can objectively study the world without being immersed in it Scientific approaches to understanding the world assume there is an objective world to be studied and that humans must remove themselves from that world in order to find the truth An archaeology of the heart rejects this dualism rather we see mind body heart and spirit as inextricable An archaeology of the heart provides a new space for thinking through an integrated responsible and grounded archaeology where there is care for the living and the dead acknowledges the need to build responsible relationships with communities and with the archaeological record and emphasize the role of rigor in how work and research is conducted The contributions bring together archaeological practitioners from across the globe in different contexts to explore how heart centered practice can impact archaeological theory methodology and research throughout the discipline **A Companion to Cognitive Anthropology** David B. Kronenfeld, Giovanni Bennardo, Victor C. de Munck, Michael D. Fischer, 2015-12-14 This new Companion traces the development of cognitive anthropology from its beginnings in the late 1950s to the present and evaluates future directions of research in the field In 29 contributions from leading anthropologists there is an overview of cognitive and cultural structures insights into how cognition works in everyday life and interacts with culture and examples of contemporary research A Companion to Cognitive Anthropology is essential for anyone interested in the questions of how culture shapes cognitive processes *Sustaining Liberal Democracy* M. Wissenburg, J. Barry, 2001-04-19 Assuming that liberalism liberal democracy and the free market are here to stay this book asks how sustainability can be interpreted in ways that respect liberal democratic values and institutions Among the problems addressed are the compatibility of liberal proceduralism with substantive green ideals the existence and potential of eco friendly principles and ideas in classical liberal political theory the role of rights and duties and of democracy and deliberation and the greening potential of modern environmental focused practices in liberal democracies *Methods in*

Historical Ecology Guillaume Odonne, Jean-François Molino, 2020-10-11 This book presents some of the most recent tools, methods and concepts in historical ecology. It introduces students and researchers to state-of-the-art techniques and showcases a wide array of methods dedicated to understanding the history of tropical landscapes. The chapters cover the detection and characterisation of archaeological features, living organisms as witnesses of past human activities, ethnoecological knowledge of ancient anthropogenic landscapes and societal impacts of historical ecology. Whilst mainly based on Amazonian experiences, the contributions aim to strengthen synergies between disciplines and to propose solutions that can be applied elsewhere in the field.

Traditional Ecological Knowledge of Resource Management in Asia Suresh Chand Rai, Prabuddh Kumar Mishra, 2023-01-01 This book highlights the different ways of traditional ecological knowledge (TEK) practices that conserve natural resources sustainably. Traditional ecological knowledge (TEK) along with synonymous or closely related terms like indigenous knowledge and native science originates in the literature on international development and adaptive management. Against the backdrop of unprecedented global degradation and reduction in ecosystem services with impacts on human well-being over the last 50 years, there is a growing interest in the role of traditional ecological knowledge (TEK) practices and systems of local communities in ensuring the sustainable utilization and management of resources. In this context, this book comprehensively analyzes the important aspects of natural resources in Asia. This book covers a detailed study of the different aspects of natural resources. It is divided into three sections which deal with varying dimensions of indigenous ecological knowledge of resource management in Asia. The first part reflects upon the concept of traditional ecological knowledge; the second part analyzes the systematic documentation of TEK practices; and the third part deals with policy for governance. This book critically describes and explains the indigenous knowledge about resource management. This book is the ideal text for undergraduate, postgraduate and research scholars in India and abroad. This book is designed in such a manner that it covers all the aspects of natural resources. It also helps the administrator and policymakers use indigenous knowledge in resource management.

Culture and Media Rayson K. Alex, S. Susan Deborah, Sachindev P.S., 2014-06-19 Indian ecocriticism has not yet adequately demonstrated the applicability of ecological deep ecological (Tinai) principles to visual texts. *Culture and Media: Ecocritical Explorations* closes this gap at the most opportune moment. Though this volume accommodates ecologically oriented interpretations from several cultures across the world, it reserves the centre stage for Indian ecocriticism and ecotheory quite appropriately. The volume effectively challenges the major documents on ecocriticism and theory published by international presses which have been reluctant to give space

to tinai criticism and theory that transcend Dravidian or Tamil boundaries The day is not far when cinema of the world shaped by tinai theory will employ tinai hermeneutics to gain fresh insight which in turn will feed into the processes of creation and production of relevant and great movies *State of the World 2010* Worldwatch Institute,2013-07-04 Many of the environmental and social problems we face today are symptoms of a deeper systemic failing a dominant cultural paradigm that encourages living in ways that are often directly counter to the realities of a finite planet This paradigm typically referred to as consumerism has already spread to cultures around the world and has led to consumption levels that are vastly unsustainable If this pattern spreads further there will be little possibility of solving climate change or other environmental problems that are poised to dramatically disrupt human civilization It will take a sustained long term effort to redirect the traditions social movements and institutions that shape consumer cultures towards becoming cultures of sustainability These institutions include schools the media businesses and governments Bringing about a cultural shift that makes living sustainably as natural as a consumer lifestyle is today will not only address urgent crises like climate change it could also tackle other symptoms like extreme income inequity obesity and social isolation that are not typically seen as environmental problems *State of the World 2010* paints a picture of what this sustainability culture could look like and how we can and already are making the shift
