Johnson, Michael J.

Mappin, 2005-03-03 Environmental education has often blurred the distinction between ecological science and environmental advocacy Growing public awareness of environmental problems and desire for action may be contributing to this blurring. There is a need to clarify the distinction between the role of ecological science and the role of social and political values for the environment within environmental education. This book addresses this need by examining the changing perspectives of ecology in education and the changing perspectives of education in environmental education Guidelines are provided for assessing the science and education perspectives within environmental education along with suggested frameworks for development of programs and resources that integrate current science education and action This book will be of interest to environmental educators ecologists interested in environmental education and curriculum and resource developers

Embryogenesis Richard Grossinger,2000 Embryogenesis is an unusual book in that it brings together a highly illustrated practical embryology book in simple language perfect for health practitioners with a fascinating read on the history and philosophy of biological science It discusses the various stages of embryonic development meiosis fertilization blastula development and gastrulation and then the embryology of each of the human organs and organ systems in detail It puts each of them in context both in terms of its phylogeny the evolutionary trajectory of cell organized systems on Earth and its ontogeny the formation of individual organisms in the modern world There are 24 color plates many of them commissioned uniquely for this volume and several hundred black and white illustrations The book is 950 pages hardcover 8 1 2 by 10 Chapters include The Original Earth The Materials of Life The First Beings The Cell The Genetic Code Sperm and Egg Fertilization The Blastula Gastrulation Morphogenesis Biological Fields Chaos Fractals and Deep Structure Ontogeny and Phylogeny and Biotechnology The Origin of the Nervous System The Evolution of Intelligence Neurulation and the Human Brain Organogenesis The Musculoskeletal and Hematopoietic Systems Mind The Origin of Sexuality and Gender Healing Transsexuality Intersexuality and the Cultural Basis of Gender Self and Desire Cosmogenesis and Mortality

**Bottoming Out the Universe** Richard Grossinger,2020-04-07 An exploration into consciousness the universe and the nature of reality Draws on transdimensional physics and biology reincarnation and past life memories animal consciousness multiple identities thoughtforms soul pictures and paranormal phenomena like crop circles and poltergeists Explores the riddle of personal identity and how it differs from consciousness Reveals that consciousness is more than encompassing all that exists it also speaks to what has yet to manifest Scientific orthodoxy views the universe as conceived of matter protons

neutrons electrons down to the smallest particle quarks But when you keep digging what is beneath quarks The scientific worldview does not take into account consciousness or life itself How did consciousness become part of the material universe Is it a by product of brain chemistry or a constituent of reality Or to dig deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it In this investigation into consciousness the universe and the nature of reality Richard Grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter He presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories Exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts He then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like UFOs faeries and poltergeists He also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle of quantum mechanics Examining nonlocal and transpersonal modes of consciousness Grossinger looks at the difference between consciousness and personal identity He expands this discussion with reflections on Sethian cosmology using Seth's own words and Jane Roberts s and John Friedlander s interpretations He reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all why there is something rather than nothing Skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe Grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency 2013 Richard Grossinger, 2011-05-31 For the Earth to move to the next vibration says Richard Grossinger consciousness must change in profound ways and these involve core elements of humanity evil grief bliss and compassion 2013 locates these elements in often unlikely places and seeks their nature and capacity for change With playfulness and precision 2013 tackles the questions of creation and existence in their twenty first century incarnation In these intellectual field notes the author's absorbing style combines memoir with scientific deconstruction metaphysical ontology and experimental prose that recalls the Black Mountain school to draw transcendental insight from the ephemeral space time we call daily life Moving with equal ease between matters cosmic and earthly Grossinger details existence as an exhilarating adventure always pushing us toward a higher state in this wide ranging humorous and heartfelt book Including an informal course in psychic development 2013 sheds light on the ephemera of planets and iPods politics and Zen Buddy Holly and road trips in its study of the elements of psychic development that could transform humankind and the Earth

<u>Introduction to Ecological Aesthetics</u> Fanren Zeng,2019-08-26 This book explores in detail the issues of ecological civilization development ecological philosophy ecological criticism environmental aesthetics and the ecological wisdom of traditional Chinese culture related to ecological aesthetics Drawing on Western philosophy and aesthetics it proposes and

demonstrates a unique aesthetic view of ecological ontology in the field of aesthetics under the direct influence of Marxism which is based on the modern economic social cultural development and the modern values of traditional Chinese culture This book embodies the innovative interpretation of Chinese traditional culture in the Chinese academic community The author discusses the philosophical and cultural resources that can be used for reference in Chinese and Western cultural tradition focusing on traditional Chinese Confucianism Taoism Buddhism and painting art Western modern ecological philosophy Heidegger s ontology ecological aesthetics and British and American environmental aesthetics In short the book comprehensively discusses the author's concept of ecological ontology aesthetics as an integration and unification of ontology aesthetics and ecological aesthetics. This generalized ecological aesthetics explores the relationship between humans and nature society and itself guided by the brand new ecological worldview in the post modern context It also changes the non beauty state of human existence and establishes an aesthetic existence state that conforms to ecological laws
