Economic Aspects Of Health Care:

Economic Aspects of Health Victor R. Fuchs, 2008-04-15 Unlike earlier work in medical economics which has focused on medical care these ten papers stress the production and consequences of health itself They reveal a serious concern with real world health problems in their investigation of such subjects as infant mortality life expectancy morbidity and disability These papers are unusual as well in bringing to bear on these problems new and powerful theoretical and statistical tools They draw on and in some cases are original sources for new bodies of data As such Economic Aspects of Health comprises a useful blend of relevance and rigor

Social Functions and Economic Aspects of Health Insurance William A. Rushing, 2012-12-06 Statistics published by the U S Department of Commerce 1980 indicate that in 1977 we spent 8.1% of our gross national product GNP on life health property casualty and other forms of insurance An additional 5.7% was used to pay the Social Security tax which is another form of insurance premium for a total of 14.8% of the GNP Although insurance had its historical origin in marine insurance it has now developed into one of the major industries of the American economy and extends into many areas of economic activity One area where growth has been particularly strong is the medical sector Health insurance is a major institution in all industrialized countries It became a government responsibility in 1883 when Bismarck introduced a compulsory program of health insurance for industrial workers in Germany Programs for workers in various industrial and income categories soon followed in other European countries Austria 1888 Hungary 1891 Norway 1909 Serbia 1910 Great Britain 1911 and Russia and Romania 1912 Rubinow 1913 250 Programs in these countries were extended in subsequent years and other countries in Europe followed with their own programs Consequently today most industrial countries have universal or near universal health insurance coverage In the United States the issue of national health insurance has been seriously debated since just prior to World War I and polling data since the 1930s show that a substantial majority of the public has been supportive of such a program Erskine 1975
