Education in Indonesia Zulfa Sakhiyya, Teguh Wijaya Mulya, 2023-07-13 This book offers a critical analysis on Indonesian education by drawing from various critical perspectives and theoretical frameworks to explore persistent challenges and social inequality problems in the education sector Critical perspectives are important to reveal how education is not a neutral mechanistic process of cultivating the knowledge and skills of future generation Instead it is a battleground in which competing visions ideologies discourses religious values and political interests struggle for dominance in a given society In each of the sections contributors draw upon specific case studies and employ critical theories to analyze power relations or to identify and destabilize underlying structures dominant discourses hegemonic knowledge policies or practices Some authors also highlight data evidencing inequities inequalities or injustices in Indonesian education system As a handbook the emphasis on critical perspectives is useful to identify and evaluate the blind spots of dominant policy discourses and their pedagogical consequences The plurality of critical approaches also means that this book is necessarily multidisciplinary A unique feature of this book is the fact that most authors are Indonesian academics who bring with them tacit knowledge of practices and issues Overall this book enriches the literature by bringing together different disciplinary perspectives such as political science psychology international relations economics and linguistics to critically examine important issues related to education in Indonesia
