Defense Economics Marcus Matthias Keupp, 2021-05-21 This textbook examines the economic problems of military organizations from an institutional perspective It discusses the efficiency and effectiveness of military performance using a capability based conceptualization Constitutional historical and economic considerations complement the analysis Neither the analysis nor the conclusions depend on any specific armed force culture organization or language On the contrary the challenge of defense economics analysis and armed forces management is reduced to a fundamental economic problem and solutions to this problem are offered This book is a must read for students scholars and practitioners interested in a better understanding of defense economics

The Economics of Human Systems Integration William B. Rouse, 2011-04-22 Fundamental Economic Principles Methods and Tools for Addressing Human Systems Integration Issues and Tradeoffs Human Systems Integration HSI is a new and fundamental integrating discipline designed to help move business and engineering cultures toward more human centered systems Integrating consideration of human abilities limitations and preferences into engineering systems yields important cost and performance benefits that otherwise would not have been accomplished In order for this new discipline to be effective however a cultural change starting with organizational leadership is often necessary The Economics of Human

Systems Integration explains the difficulties underlying valuation of investments in people's training and education, safety and health, and work productivity. It provides an overview of how the field of economics addresses these difficulties, focusing on human issues associated with design, development, production, operations, maintenance, and sustainment of complex systems. The set of thought leaders recruited as contributors to this volume collectively provides a compelling set of data and principles for assessing the economic value of investing in people, not just in general but in specific investment situations. The early chapters provide the contexts for HSI and investment analysis, illustrating the enormous difference context makes in how issues are best framed and analyzed. A host of practical methods and tools for investment valuation are then presented. Provided are a variety of real-world applications of economic analysis ranging from military acquisition and automotive investment to healthcare and high-tech investments in general, in both the U.S. and abroad. A range of economics-based methods and tools for cost analysis, cost-benefit analysis, and investment analysis, as well as sources of data for performing such analyses. Differing perspectives on economic decision making, including a range of private sector points of view as well as government and regulatory perspectives. In addition, five real-world case studies illustrate how such valuations have been done and their major impacts on investment decisions. HSI professionals, systems engineers, and finance professionals who address investment analysis will appreciate the wide range of methods and real-life applications. Senior undergraduates and masters-level graduate students will find this to be an excellent textbook that provides theory and supports practice.

The Economics of Defence Spending Keith Hartley, Todd Sandler, 2011. First published in 1990, this is an authoritative account of defence spending and policy in both developing and developed countries. The book provides case studies and comparative material for policy makers, civil servants, and military staffs throughout the world. The Economics of Defence Gavin Kennedy, 1975

The Future of the United Nations System Chadwick F. Alger, 1998. What does the future hold for the UN? In this book, twenty-two scholars from all continents contribute twelve chapters that cover prevention of violence, creating economic and social structures that sustain human fulfilment, sharing and protecting the commons, and peace education. The search for future potential based on experience in these twelve laboratories leads to sixty-six recommendations for new institutions and programs on issues that include controlling weapons, humanitarian intervention, collaboration between UN peacekeepers and NGOs, human rights, economic policies, advancement of women, refugees, ecological security, communications, and peace education. These recommendations are brought together in a concluding chapter and summarized in the appendix. Most of the recommendations do not require amendments to the UN Charter or to the treaties establishing the UN Specialized Agencies. Instead, their implementation would require creative efforts of Member States, secretariats, NGOs, and dedicated individuals that are pointed toward attainment of multilateral capacity for coping with an array of global problems that increasingly threaten the quality of human life. This is stimulating reading for anyone who wants to be challenged to think creatively about

the potential for coping with a growing array of global problems

The Economics of UN Peacekeeping Nadège Sheehan,2011-07-25 Peacekeeping is a security concept that is very representative of the current interventionism multilateralism human rights and humanitarian ideas UN peacekeeping plays an important role in international security and includes various activities that go beyond the original roles assigned to UN armed forces e g humanitarian aid election supervision disarmament mine clearance civilian protection and peacebuilding The problem is to define the economic efficiency of these operations and to develop some recommendations in the context of an economic globalization process Although UN peacekeeping has shortcomings it must be considered essential for organizing and defending the world politico economic order UN peacekeeping is a political activity but its production strongly depends on nations economic considerations Governments make political decisions that also take into account the economic gains they expect to obtain from their contribution to any specific mission With low means and inadequate strategies to meet the challenges UN peacekeeping must pay particular attention to resolving the problems of free riding and of prisoner s dilemma in contributions that delay deployments and create significant financial problems Understanding how peacekeeping can be most cost effectively carried out while considering the importance of legitimacy in interventions is essential This book believes that regional organizations can ease the UN s financial responsibility by managing conflicts in their regions But to be most effective they must involve the UN in their interventions This book also emphasizes UN

peacekeeping trust funds as the key to better financial effectiveness It strongly recommends that NATO be empowered by the UN with the role of global peace police and proposes the establishment of a UN high ranking team of international specialists in peacekeeping issues This research should be of interest to students and researchers looking at international and political economics as well as international relations defence security and peace studies
