From Dichotomies to Dialogues Lei Qu,Machiel van Dorst,2023-06-13 Urbanism is a way of thinking and acting needed for sustainable development urbanists are becoming inter and transdisciplinary bringing science technology and design into their field As the world is in a cascading of crises related to e.g health energy food and water as well as issues of e.g traffic housing and services integrated approaches become increasingly relevant as most of these challenges are related Having a holistic urbanism viewpoint is the path to resilience and sustainability Here we are not referring to a longer list of notions but particularly encouraging dialogues between possibly perceived conflicting discourses

This book is the proceedings of the 14th IFoU conference a stepping stone towards a new culture of working together It includes papers in five tracks representing five types of debates over a set of dichotomies Urban rural Integration and Areas In Between The City is an Object and a City is in Transition Political Ecology and Adaptive and Transformative Framework Metropolization and the Right to the City Human centred and Nature based Approaches in Cities *Regenerative Dialogues for Sustainable Futures* Fabio Scarano, 2024-03-13 This book is about sustainability in its broadest sense It argues that the ongoing science policy dialogue on sustainable development as framed by the United Nations Sustainable Development Goals is insufficient to drive the planet to desired sustainable futures This conversation followed by transformative action must be inclusive of other forms of interpretation of reality arts spirituality and ancestral knowledge and non modern cosmovisions This is more a book about dialogues than about the common dualism problem solution and such dialogues are approached as an essential trigger of regeneration The book takes the reader from a historical perspective of the human nature relationship through to a discussion on sustainable futures as utopias The optimism conveyed by the book is justified by a plethora of global examples of such regenerative dialogues
