Boettke,Vlad Tarko,2019-05-01 Classical liberalism entails not only a theory about the scope of government and its relationship with the market but also a distinct view about how government should operate within its proper domain of public choices in non market settings Building on the political economy principles underpinning the works of diverse authors such as Friedrich Hayek James Buchanan and Vincent and Elinor Ostrom this book challenges the technocratic epistocratic perspective in which social goals are defined by an aggregated social function and experts simply provide the means to attain them The authors argue that individualism freedom of choice and freedom of association have deep implications on how we design manage and assess our public governance arrangements The book examines the knowledge and incentive problems associated with bureaucratic public administration while contrasting it with democratic governance Aligica Boettke and Tarko argue that the focus should be on the diversity of opinions in any society regarding what should be done and on the design of democratic and polycentric institutions capable of limiting social conflicts and satisfying the preferences of as many people as possible They thus fill a large gap in the literature the public discourse and the ways decision makers understand the nature and administration of the public sector **Research Handbook on Sustainability and Competition Law** Julian Nowag,2024-07-05 This is an open access title available under the terms of a CC BY NC ND 4 0 License It is free to read download and share on Elgaronline com This Research Handbook explores the complex interplay between competition law and sustainability and also provides key insights into the role and limitations that tax environmental laws consumer laws and social laws have in

developments in public economics have largely been in the direction of reaffirming the limits of the market and of establishing new ones. The possible existence of fundamental non convexities, imperfect and asymmetric information, incentive compatibility, imperfect competition, strategic complementarity and scale economies led to the conclusion that a large set of market failures exist. Such situations also imply government failure. Acocella considers this complicated picture and provides a discussion of the different approaches to establishing social rankings of the possible situations and the underlying principles. The arguments for and against different institutions are then analysed at a micro and macroeconomic level. The market and the government are recognised as imperfect and thus complementary institutions. Specific policy targets and instruments are considered in the areas of micro and macro economic policy. Special attention is devoted to questions of policy management in an open economy. Finally problems of domestic and international policy co ordination are considered. **The New**

Liu, 2024-08-15 This book first analyzes the institutional changes and historical value orientations brought about by China's economic reforms and then explores the justice and progressiveness of changes in social production relations as well as the uniqueness of economic growth and macro control in China's institutional changes. It further delves into the effectiveness and qualitative improvement during the growth process including the evolution of structural height, the formation of structural benefits and the improvement of factor productivity and input output efficiency. Finally the book dissects the systemic motivation of China's economic growth and development and proposes the requirements for systemic changes to achieve sustainable development. The main innovation of this book lies in revealing the basic driving factors of the debate on the justice of institutional change from the perspective of value theory, deepening the understanding of China's reform and development experience and emphasizing the importance of economic growth, structure efficiency and total factor efficiency.

World Development Report 1996, 1996 Almost one third of the world's population has embarked on a transition from planned to market economies. Like economic reforms elsewhere, the long term goal of this transition is to build a thriving market economy capable of delivering long term growth in living standards. Now in its 19th annual edition, the World Development Report 1996 takes an in depth look at these transition countries, focusing on the key lessons that have taken place thus far. The introduction to the Report poses a number of key questions that are addressed in later chapters, including questions relating to initial challenges and how countries have tackled them from very different starting points and political conditions. The Report also focuses on the additional challenges these transition countries face, with a final chapter that summarizes the main conclusion of the Report, creating a text that will no doubt become the definitive source for students.
