

Community Change: Politics, Economy, Culture & Development - Essay Sample Essay

Introduction

A community is a group of people that possess common interests. Sometimes it bears some differences toward achieving its objectives or rather performing its routine duties to the society. Occasionally, change is inevitable, and each community must experience it in the process of either integration. Most common changes and issues within the communities include political power change and leadership, Economic and social-cultural activities, religious perspectives, and finally, development changes. It is through the change some community hiccups manifest themselves as there is a conflict of interest to define what is right for the community. The pay will, therefore, discuss community issues based on the prevailing changes that are roaming within my community, New Square, New York.

Leadership and Political Change

Concerning various changes, the structural development of leadership and political atmospheres are the core area that New Square, New York, have experienced. Leadership was initially organized in terms of the social groups that elected their leaders to manipulate and effectively influence the change within the community. Today elections are done within the constitutional structure that is monitored by the government to ensure that there is a fair and free election of the political leaders. Leaders, therefore, are democratically elected in the community and are given the power to make important decisions within the community. However, it is terrifying that most leaders within the community have developed some aspects of repossessing the legislative seat through non constituted means. The community had embraced authoritative leadership that was much oppressive to the subject. However, with the intrusion of the United Nations policies, leadership strategies have been changed, reducing unjust dealing of the community members. Generally, the development of the leadership has consistently created a good rapport with the community as the New Square village is now experiencing a new glow of democracy.

Hasidism practice often threatened the community; however, after some time, various lights have come to lead the community into development. Education has been the key approach that the current political leaders are using in ensuring that the community access the basic knowledge that is vital for the development and growth. The Hasidic community, my community, has also experienced some constraints in the process of changing leadership within the political context. Very few leaders have been able to address the issues that the community has gone through over decades. The community has severely experienced economic depression alongside other health issues that were induced by poor governance and leadership (Checkoway, 2009). Today, however, the community, through the assistance of the elite leaders, now has access to good health as well as economic development through education introduction and set up of other necessity programs in the village.

Development Economics Natalia Bracarense, Louis-Philippe Rochon, 2022-02-27 Since the inception of development economics in the post World War II period most of its proponents have prescribed the adoption of western institutions as the path for prosperity the unequivocal solution for poverty illiteracy hunger inequality and violence in the world Seventy years of attempts or at least the pretense thereof to reproduce the western model in completely different historical and cultural contexts have proven to be no more than a mirage for most Faced with this scenario why do economists insist on the ideas of development convergence and emulation of the lifestyle of western countries Is it possible to disassociate development from multidimensional instability dependency subordination and exploitation Is the current social political ecological and economic organized destabilization observed in the western countries a model to follow a desirable end of history These questions raised earlier by some fellow economists have become ever more pressing in the present context of generalized instability The book questions how ethical and professionally responsible it is for economists to continue to undiscerningly prescribe miraculous one size fits all market oriented models to solve socio economic problems everywhere The contributors of this edited volume invite the readers to consider these questions and further similar inquiries in the future The chapters in this book were originally published as a special issue of the journal Review of Political Economy

Development Economics on Trial Polly Hill, 1986-06-26 This book examines

the gulf that separates development economics from economic anthropology **Navigating History: Economy, Society, Knowledge, and Nature**, 2018-12-24 In *Navigating History Economy Society Knowledge and Nature* the contributors present new research that touches on the core themes developed in Karel Davids's work. The book reflects Davids's omnivorous character as a scholar. Nevertheless, there are common strands that run throughout the introduction and fourteen chapters gathered here. Major themes include resources of knowledge, cultures of learning, and humans and their natural environment. Together, these fourteen essays provide a fascinating panorama of social, economic, and environmental history of the past millennium. The book seeks to bring back the different levels of geographical scope, fusing the local, the national, and the global. Contributors are Ulbe Bosma, Pepijn Brandon, Jaap Bruijn, Petra van Dam, Victor Enthoven, Sabine Go, Marjolein t Hart, Raoul De Kerf, Jan Lucassen, Karin Lurvink, Joel Mokyr, Marijn Molema, Bert de Munck, P l Nyiri, Harm Pieters, Matthias van Rossum, Joost Schokkenbroek, Jeroen Touwen, Wybren Verstegen, and Jan Luiten van Zanden **Frank Knight and the Chicago School in American Economics** Ross B. Emmett, 2009-01-30 In this book, Ross B. Emmett looks at Frank Knight's economics and philosophy, the nature of Chicago economics, his place in the Chicago tradition, and also about the application of hermeneutic theory to the history of economics *London Essays in Economics* Theodor Emanuel Gregory, Hugh Dalton, Baron Dalton, 1927 **Rethinking Expectations** Roman Frydman, Edmund S. Phelps, 2013 This book originated from a 2010 conference marking the fortieth anniversary of the publication of the landmark Phelps volume *Microeconomic Foundations of Employment and Inflation Theory*, a book that is often credited with pioneering the currently dominant approach to macroeconomic analysis. However, in their provocative introductory essay, Roman Frydman and Edmund Phelps argue that the vast majority of macroeconomic and finance models developed over the last four decades derailed rather than built on the Phelps volume's microfoundations approach. Whereas the contributors to the 1970 volume recognized the fundamental importance of according market participants expectations an autonomous role, contemporary models rely on the rational expectations hypothesis (REH), which rules out such a role by design. The financial crisis that began in 2007, preceded by a spectacular boom and bust in asset prices that REH models implied could never happen, has spurred a quest for fresh approaches to macroeconomic analysis. While the alternatives to REH presented in *Rethinking Expectations* differ from the approach taken in the original Phelps volume, they are notable for returning to its major theme: understanding aggregate outcomes requires according expectations an autonomous role. In the introductory essay, Frydman and Phelps interpret the various efforts to reconstruct the field, some of which promise to chart its direction for decades to come. The contributors include Philippe Aghion, Sheila Dow, George W. Evans, Roger E. A. Farmer, Roman Frydman, Michael D. Goldberg, Roger Guesnerie, Seppo Honkapohja, Katarina Juselius, Enisse Kharroubi, Blake LeBaron, Edmund S. Phelps, John B.
