Mazzaroth; or, the Constellations Frances ROLLESTON,1862      Mazzaroth; or, The constellations (by F. Rolleston).  
[Followed by] Mizraim; or, Astronomy of Egypt Frances Rolleston,1862      **Mazzoroth** Frances Rolleston,2001-01-01  
Modern biblical dictionaries and commentaries designed for a popular readership tend to shy away from any reference to the word Mazzaroth let alone attempt to interpret it This is scarcely surprising for the word is obscure and it occurs only once in the Bible twice if it is equated with Mazzaloth Traditional sources tended to interpret the word as meaning the constellations specifically those forming the zodiac But there was no universal agreement others accepted that the word referred to the zodiac or even identified it with the star Sirius The idiosyncratic ideas expressed in the four parts of Mazzaroth and its appendix Mizraim are all based on solid research misapplied perhaps in light of Rolleston s steadfast Christian outlook but fully documented and with sources quoted at length The whole work provides the reader with an amazing compendium of obscure material on ancient mythology symbolism and etymology with comprehensive biblical references and a wealth of learned and detailed footnotes Much of the information is set out in a tabular form that inevitably reminds the reader of S L MacGregor Mathers s book of correspondences that we know as 777 And this may not be coincidental Mazzaroth may have been passed over by reviewers when it appeared but it was not ignored by esoteric scholars even though they were not its intended readership W Wynn Westcott possessed a copy and loaned it to the Golden Dawn library where it was certainly read by F L Gardner he includes the book albeit misdated in his *Bibliotheca Astrologica* and most probably by Mathers when he compiled 777 It is a valuable resource that fully deserves its rescue from oblivion just as its neglected author deserves our praise Rolleston 1781 1864 spent her life studying the sky and the scriptures      *The War of the rebellion: a compilation of the official records of the Union and Confederate armies, prepared by R.N. The Missouri River Basin is home to thousands of bird species that migrate across the Great Plains of North America each

year marking the seasonal cycle and filling the air with their song In time immemorial Native inhabitants of this vast region established alliances with birds that helped them to connect with the gods to learn the workings of nature and to live well This book integrates published and archival sources covering archaeology ethnohistory historical ethnography folklore and interviews with elders from the Blackfoot Assiniboiné Mandan Hidatsa Arikara and Crow communities to explore how relationships between people and birds are situated in contemporary practice and what has fostered its cultural persistence Native principles of ecological and cosmological knowledge are brought into focus to highlight specific beliefs practices and concerns associated with individual bird species bird parts bird objects the natural and cultural landscapes that birds and people cohabit and the future of this ancient alliance Detailed descriptions critical to ethnohistorians and ethnobiologists are accompanied by thirty four color images A unique contribution The Winged expands our understanding of sets of interrelated dependencies or entanglements between bird and human agents and it steps beyond traditional scientific and anthropological distinctions between humans and animals to reveal the intricate and eminently social character of these interactions
