*Ethical Issues in Health Care on the Frontiers of the Twenty-First Century* S. Wear, J.J. Bono, G. Logue, A. McEvoy, 2006-04-11 of UB's medical school that UB developed its

School of Arts and Sciences and thus assumed its place among the other institutions of higher education. Had Fillmore lived throughout UB's first seventy years, he would probably have been elated by the success of his university and he should have been satisfied and pleased that UB remained intrinsically bonded to its community while at the same time engrafting the values and standards important to higher education's mission in the region. UB and its medical school have undergone many challenging transitions since 1846. Included among them were 1 the completion of an academic campus in the far northeast corner of the City of Buffalo while leaving its medical, dental, and law schools firmly situated in the core of downtown Buffalo; 2 the eventual relocation after the second world war of the law school to the newer campus in Amherst and the medical and dental school to the original academic campus; and 3 the merger with the State University of New York System in 1962. Despite these significant transitions, any one of which could have changed the intrinsic integrity of UB and disrupted the bonding between community and university that did not happen. To this day the ties between community and academe persist. Fillmore and White should celebrate their success and important contribution to Buffalo and Western New York.

**Fragmented: A Doctor's Quest to Piece Together American Health Care** Ilana Yurkiewicz MD, 2023-07-11 An award winning physician writer exposes how pervasive cracks in the health care system cost us time energy and lives and how we can fix them There s an unspoken assumption when we go to see a doctor the doctor knows our medical story and is making decisions based on that story But reality frequently falls short Medical records vanish when we switch doctors Critical details of life saving treatment plans get lost in muddled electronic charts The doctors we see change according to specialty hospital shifts or an insurer s whims Physician Ilana Yurkiewicz calls this phenomenon fragmentation and she argues it s the central failure of health care today In this gripping narrative from medicine s front lines Yurkiewicz reveals how a system that doesn t talk to itself puts insupportable burdens on physicians patients and caregivers forcing them to heroic lengths to hold the pieces together barely The stories she tells are at once harrowing and commonplace A patient narrowly averts an unnecessary invasive heart procedure by producing a worn rhythm strip he has carried in his pocket for a decade A man diagnosed with leukemia while visiting from abroad has thirty one physicians but no one he can call his doctor with tragic consequences When Yurkiewicz s own father falls ill a culture that incentivizes health care providers to react with quick fixes to the problems immediately before them often to the neglect of a patient s overall narrative leads to weeks of additional suffering and a risky hospital transfer The system is hanging by a thread and we need better solutions Yurkiewicz issues a clear eyed call for change naming concrete reforms doctors and policymakers can make and empowering patients and their loved ones to advocate for themselves in the meantime Urgent radiantly humane and ultimately hopeful *Fragmented* a prescription for what really needs fixing in modern medicine
