Elusive Saviours:

Elusive Saviours Hans Heerings, Ineke Zeldenrust, 1995 Throughout the UNCED process government delegates from the North and the South were unable to agree on clear and binding global environmental regulations In the wake of this stalemate in international politics the international business community projected itself as a problem solver the green alternative Where governments could not agree on a strategy for sustainable development the business community stepped in with its own strategies Transnational corporations have tremendous economic power They are certainly in a position to encourage and promote sustainable development But they are also the source of many local and international environmental problems Are they truly in a position to become the new green guide How good are their plans for sustainable development Is their pervasive economic power an obstacle or a lever for sustainable development Hans Heerings and Ineke Zeldenrust explore these questions in *Elusive Saviours* comparing the present post UNCED practice of transnational corporations with their promises They conclude that while transnationals have adopted many new environmental measures these fail to promote sustainable development Transnational corporations by the very nature of their internationality are able to evade countries with strict environmental legislation It is clearer than ever that we need internationally binding environmental regulations

The Governance of Corporate Groups Janet Dine, 2000-06-05 Starting from a discussion of the theoretical underpinning of the place companies occupy in society this book explores the consequences of adherence to free market contractualist theory including the lack of regulatory control of a sufficiently robust nature Professor Dine comments on the absence of a concept of governance of groups from a comparative perspective and considers the consequences of this absence for the conflict of laws In particular she highlights the tragic consequences of globalization by transnationals including polarization of income and environmental damage and suggests a possible legal framework to prevent future damages

Human Rights Standards and the Responsibility of Transnational Corporations Michael K. Addo, 1999-09-01 What is the nature and scope of corporate responsibility with regard to human rights Should companies themselves be responsible for human rights violations involving themselves or their subsidiaries What principles should guide business in countries known to violate human rights Is self regulation sufficient or are corporations best regulated by national or international codes and on what should these codes be based These are some of the many questions which this ground breaking collection of essays seeks to address as it assesses the value of applying human rights standards to transnational corporations The increasing involvement of corporations in the public domain and the steady reduction of governmental involvement in commercial and social undertakings has created a desperate need to rethink the nature and role of the private corporation and its regulation This volume which contains a balanced collection of analyses from all interested sources in the corporate responsibility debate is the result of a three day conference during which government officials corporate executives NGOs and representatives of inter governmental organisations as well as academic researchers came together for

the first time to discuss the emerging issues The essays have been arranged under six broad themes policy issues regulation issues of application matters of doctrine globalisation and case studies In addition each section contains the opinion not simply a summary of proceedings of a nominated rapporteur who draws together the strands of each theme and where necessary broadens the analysis to cover important issues which may not have been addressed At the heart of this volume is the attempt to define an effective framework for transnational corporate responsibility through international human rights standards It will be of vital interest to corporate legal advisers human rights practitioners NGOs government law offices and academics as well as to all those concerned with human rights and their place in the modern world

Breaking through the role of the victim Alenka Lena Petric, 2025-04-01 A new age is rising in which humans are beginning to awaken to the reality of their own uniqueness we are the centre of the universe and individuality is the cure for the soul It transforms us allowing us to transcend the illusions of resentment accusation and judgment We are more powerful than we realize Breaking through the role of the victim offers a reminder of our uniqueness and individuality an innovative vision of transformation and spiritual rebirth as it invites the reader to discover their inner strength and value With an emphasis on introspection and self knowledge it shows how to free oneself from the role of victim and become an active creator of one's own life and guides the reader through the process of crafting a brand new glorious personality and living their own heaven right here on Earth Alenka Lena Petric is a professor of Slovenian language and literature and a university graduate in linguistics from the Faculty of Arts in Ljubljana Through many years of experience at the school for teachers she has come to realise that knowledge and learning are yet to be recognised as valuable pursuits by the collective human being who often views them as burdensome These values which significantly influence our comprehension behaviour and perception of the world due to this primitive mindset remain at a low level of awareness impairing effective learning and growth Consequently personal and spiritual growth remains stunted undernourished and neglected In her work Alenka Lena Petric analyses how to realise our full potential joy happiness and contentment we must first address these two primary separations

Planet Dialectics Wolfgang Sachs, 2015-03-12 All effects of human action will inevitably be played out within our planet's limits any hope of infinity is an illusion And yet as Wolfgang Sachs warned almost twenty years ago environmental concerns have been assimilated into the rhetoric dynamics and power structures of development This classic collection of trenchant and elegant explorations addresses the crisis of the Western world's relations with nature and social justice Examining the notions of efficiency speed globalization and development Sachs shows that sustainability truly conceived is incompatible with the worldwide rule of economism Planet Dialectics reveals that the Western development model is fundamentally at odds with both the quest for justice among the world's people and the aspiration to reconcile humanity and nature

Saviour Gods and Soteria in Ancient Greece Theodora Suk Fong Jim, 2022-05-12 From the Archaic to the Roman imperial period an impressive number of gods and goddesses are attested in the Greek world under the titles of Soter and Soteira Saviour

Overseeing the protection of individuals and cities these gods had the power to grant an essential blessing soteria deliverance preservation safety This book investigates what it meant to be saved and the underlying concept of soteria in ancient Greece It challenges the prevailing assumption that soteria was a predominantly Christian concern and demonstrates instead its centrality and significance in the relationship between the Greeks and their gods This book focuses on the power of saviour gods in the life of the Greeks how worshippers searched for soteria as they confronted the unknown and unknowable and what this can reveal about the religious beliefs hopes and anxieties of the Greeks It goes beyond religious vocabulary and cult epithets to investigate worshippers thought world and lived experience the different choices individuals made among the plurality of gods in the Greek pantheon the multiple levels on which divine saviours operated and the values attached to the Greek notion of soteria Building on existing paradigms in the study of Greek polytheism and combining close analysis of epigraphic literary and material evidence this book argues that soteria for the Greeks entailed a very different experience from the Christian eschatological notion of salvation and that what was offered was salvation on earth

Companies, International Trade and Human Rights Janet Dine, 2005-02-24 Originally published in 2005 this book focuses on the role of corporations within the trading system and the complex relationships between corporations nation states and international organisations The actions and motives that drive corporations are considered as well as the structure of the international trading system Remedial devices such as Codes of Conduct and Human Rights instruments are assessed for effectiveness The book seeks reasons for what is a growing understanding that international trading regimes are not meeting objectives found in many international agreements including both the international trade agreements themselves WTO GATT TRIPS etc and human rights instruments In particular it is clear that the prevalence and severity of poverty is not being adequately addressed This work sets out to investigate the role played by companies in this failure in the globalisation of trade to realise its aims in particular the failure to achieve the minimum of basic rights the right to food **Cleaner**
