plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from *The Comedy of Errors* to the valedictory *The Tempest* Brayton demonstrates Shakespeare's remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work *Refiguring the Real* Christopher Braider, 2015-03-08 In a major analysis of pictorial forms from the late Middle Ages to the Enlightenment Christopher Braider argues that the painted image provides a metaphor and model for all other modes of expression in Western culture particularly literature philosophy religion and science Because critics have conventionally explained visual images in terms of verbal texts Scripture heroic poetry and myth they have undervalued the impact of the pictorial naturalism practiced by painters from the fifteenth century onward and the fundamentally new conception of reality it conveys By reinterpreting modern Western experience in light of northern descriptive art the author enriches our understanding of how both painted and written cultural texts shape our perceptions of the world at large Throughout Braider draws on works by such painters as van der Weyden Bruegel the Elder Steen Vermeer Rembrandt and Poussin and addresses such topics as the Incarnation of the Word in Christ the elegiac foundations of Enlightenment aesthetics and the rivalry between northern and southern art His goal is not only to reexamine important aesthetic issues but also to offer a new perspective on the general intellectual and cultural history of the modern West Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 What's Your Story? Conceptual engineering the project of considering how our concepts can be replaced by better ones has become a central topic in philosophy Eklund applies this methodology to central normative concepts and discusses the special complications that arise in this case For example since talk of improvement is itself normative how should we in the context understand talk of a concept being better
