## **Embers From The Sun:**

Ember from the Sun Mark Canter, 1997 In the blue ice of an arctic cave a scientist has made an extraordinary discovery a woman's body frozen for 25 000 years in a near perfect state with pliant tissues vessels filled with blood and an embryo waiting to be born They called her Ember the child of their heart born to surrogate parents who refused to yield her after birth Raised among the Quanoit Indians Ember is as modern as those around her a young woman struggling with a loneliness and yearning she does not yet understand Stronger than her classmates imbued with the power to heal Ember's soul resounds with the cries and whispers of a time she has never seen and of a people who beckon her home Desperate to unravel the mystery of her birth Ember embarks on a spellbinding journey to find the people who call to her in her dreams Guided by a shaman who has waited for her return pursued by the man of science who brought her to life Ember is drawn to a place where no one else can go where her ancestors the golden skinned people of her dreams wait for her to set them free

Solarities Cymene Howe,Jeff Diamanti,Amelia Moore,2023 Solarities Elemental Encounters and Refractions is a transdisciplinary essay collection that explores the physical conceptual and political possibilities materialized by solarity a form of relation to the sun and its elemental force upon planetary life The authors propose that a different set of questions becomes possible when the material specificities of solar become the compass for thought prompting us to uncover our relationship to the sun How does solarity materialize in the bodies and lives of humans and non humans now and in the future What can we learn if we no longer take the sun for granted How do we continue to persist on a planet that is so intimately bound up in a state of love fear and dependence on this primary source of all living energy Each of the essays in

Solarities take solar radiation as an interpretive lens that takes multiple forms often transforming as it does so Solarities draws inspiration from Black ecologies Indigenous philosophy feminist science technology studies and more than human discussions in the human sciences recognizing the phenomenological and ontological openings they make available The authors understand solarity as an energy source channeled through photovoltaic cells for example but the essays gathered here focus on the lives that solarity creates or impedes The experimental task is to find how solarities work their way into materials and processes across our work seeking out the particular influences of solarity in making being s These relations are core to thinking the elemental conditions of solarity since it is through particular forms of focalizing the sun that life is sustained or made to wither across the planet In these ways the elemental condition of solarity is at once hyper particular and also shared across organic and inorganic bodies conditioned by physical form and material composition Throughout the collection the authors explore how solarity appears or recedes from view when we concentrate our attentions on it surfacing the existential omnipresence of the sun to open new thought possibilities inspire new actions and refract new dimensions of socionatural encounter
