Life Embodied Nicolás Fernández-Medina, 2018-05-30 The concept of vital force the immanent energy that promotes the processes of life in the body and in nature has proved a source of endless fascination and controversy Indeed the question of what vitalizes the body has haunted humanity since antiquity and became even more pressing during the Scientific Revolution and beyond Examining the complexities and theories about vital force in Spanish modernity Nicolás Fernández Medina's *Life Embodied* offers a novel and provocative assessment of the question of bodily life in Spain Starting with Juan de Cabriada's landmark *Carta filosofica m dico chymica* of 1687 and ending with Ramón Gmez de la Serna's avant gardism of the 1910s Fernández Medina incorporates discussions of anatomy philosophy science critical theory history of medicine and literary studies to argue that concepts of vital force served as powerful vehicles to interrogate the possibilities and limits of corporeality Paying close attention to how the body's capabilities were conceived and strategically woven into critiques of modernity Fernández Medina engages the work of Miguel Boix y Moliner Martín Martínez Diego de Torres Villarroel Sebastián Guerrero Herreros Ignacio Mar a Ruiz de Luzuriaga Gaspar Melchor de Jovellanos Pedro Mata y Fontanet ngela Grassi Juli n Sanz del R o Miguel de Unamuno and P o Baroja among others Drawing on extensive research and analysis *Life Embodied* breaks new ground as the first book to address the question of vital force in Spanish modernity

Nuclear Desire Shampa Biswas, 2014-09-01 Since its enactment in 1970 the Nuclear Non Proliferation Treaty NPT has become one node of a massive sprawling multibillion dollar regime that is considered essential to slowing the proliferation of nuclear weapons and weapons technology However according to Shampa Biswas these well intentioned efforts to halt the spread of nuclear weapons deflect attention from a hierarchical global nuclear order dominated by powerful states and capitalist interests that benefit from the status quo In *Nuclear Desire* Biswas proposes that pursuit and production of nuclear power is sustained by this unequal global order whose persistent and daily harmful effects are experienced by some of the most vulnerable bodies around the world Making a compelling case for nuclear abolition she shows that the path to nuclear zero is more successfully traversed through the perspective of postcolonialism and the political economy of injustice rather than through the prism of security In the end the nonproliferation regime maintains a hierarchy of haves and have nots one that reinforces inequalities that run counter to the NPT's broader goal Innovative forcefully argued and long overdue *Nuclear Desire* moves beyond conventional critiques to give scholars and students of international relations new insights into how a more secure world might

simultaneously be more peaceful and just

previously published as a special issue of *The Bulletin of Spanish Studies* **Pictured Politics** Emily Engel, 2020-03-23 The Spanish colonial period in South America saw artists develop the subgenre of official portraiture or portraits of key individuals in the continent's viceregal governments Although these portraits appeared to illustrate a narrative of imperial splendor and absolutist governance they instead became a visual record of the local history that emerged during the colonial occupation Using the official portrait collections accumulated between 1542 and 1830 in Lima Buenos Aires and Bogot as a lens *Pictured Politics* explores how official portraiture originated and evolved to become an essential component in the construction of Ibero American political relationships Through the surviving portraits and archival evidence including political treatises travel accounts and early periodicals Emily Engel demonstrates that these official portraits not only belie a singular interpretation as tools of imperial domination but also visualize the continent's multilayered history of colonial occupation The first stand alone analysis of South American portraiture *Pictured Politics* brings to light the historical relevance of political portraits in crafting the history of South American colonialism *Zen Living* Domyo Sater Burk, 2014-01-07 In today's fast paced technology laden society it's easy to become overwhelmed People seek calm and simplicity but have a hard time realizing a Zen life Monk and sensei Domyo Sater Burk illustrates how to get started on the path to peace and enlightenment regardless of cultural or religious affiliation You'll learn the foundation and essential teachings of Zen practice how to engage in meditation and mindfulness and how to live daily within a Zen moral code

Adapting Cecilia, Cuba's Iconic Mulatta Lucy Harney, 2025-09-26 This project explores the expanding corpus of texts and artifacts inspired by Cirilo Villaverde's most well known literary character Cecilia Vald's Drawing on adaptation studies and related transmedia approaches the book examines how and why this iconographic complex centered on the mytheme of a disaffected mulatta striving for a better life has generated such a remarkably persistent proliferation of multi media instantiations Chapters address topics and themes central to the interests of Villaverde scholars as well as to Cubanists and Latin Americanists more broadly such as gender and sexual roles race and hybridity cultural and national identity and in general colonial and post colonial social contexts in Cuba **Imagining Identity in New Spain** Magali M.

Carrera, 2010-01-01 Using an interdisciplinary approach that also considers legal literary and religious documents of the period Magali Carrera focuses on eighteenth century portraiture and casta paintings to understand how the people and spaces of New Spain were conceptualized and visualized Winner Book Award Association of Latin American Art 2004 Reacting to the rising numbers of mixed blood Spanish Indian Black African people in its New Spain colony the eighteenth century Bourbon government of Spain attempted to categorize and control its colonial subjects through increasing social regulation of their bodies and the spaces they inhabited The discourse of *calidad* status and *raza* lineage on which the regulations were based also found expression in the visual culture of New Spain particularly in the unique genre of casta paintings which purported to portray discrete categories of mixed blood plebeians Using an interdisciplinary approach that

also considers legal literary and religious documents of the period Magali Carrera focuses on eighteenth century portraiture and casta paintings to understand how the people and spaces of New Spain were conceptualized and visualized She explains how these visual practices emphasized a seeming realism that constructed colonial bodies elite and non elite as knowable and visible At the same time however she argues that the chaotic specificity of the lives and lived conditions in eighteenth century New Spain belied the illusion of social orderliness and totality narrated in its visual art Ultimately she concludes the inherent ambiguity of the colonial body and its spaces brought chaos to all dreams of order
