Burns,2006 In our rapidly advancing scientific and technological world many take great pride and comfort in believing that we are on the threshold of new ways of thinking living and understanding ourselves But despite dramatic discoveries that appear in every way to herald the future legacies still carry great weight Even in swiftly developing fields such as health and medicine most systems and policies embody a sequence of earlier ideas and preexisting patterns In *History and Health Policy in the United States* seventeen leading scholars of history the history of medicine bioethics law health policy sociology and organizational theory make the case for the usefulness of history in evaluating and formulating health policy today In looking at issues as varied as the consumer economy risk and the plight of the uninsured the contributors uncover the often unstated assumptions that shape the way we think about technology the role of government and contemporary medicine They show how historical perspectives can help policymakers avoid the pitfalls of partisan outdated or merely fashionable approaches as well as how knowledge of previous systems can offer alternatives when policy directions seem unclear Together the essays argue that it is only by knowing where we have been that we can begin to understand health services today or speculate on policies for tomorrow **Pacific Medical and Surgical Journal** ,1914 **Pacific Medical Journal** ,1914 **United Nations Participants in the Korean War** Paul M. Lewis, M.H. Ross, Barbara Berney, Matt Witt, Marc Miller, 1978 Three years ago when I first met Talbert Faircloth and his wife Dora I found it very hard to believe the story that they told me Talbert was sick at the time and jobless and angry Two years earlier he had been carried breathless out of the cotton mill on a stretcher never to return to work again I found it hard to believe that thousands of workers in the South's largest and oldest industry could have been afflicted by a crippling disease for years and not have known that they had it or even what caused it In time I learned that Talbert's story like that of 35 000 other Southern textile workers was so wrought with truth and so difficult for the region's most powerful industry to accept that it had been suppressed and ignored for decades A year ago during a conference at Highlander Center in Tennessee I first heard Les Falk recount his experiences as medical administrator for the United Mine Workers Health and Retirement Fund The conference brought together doctors nurses organizers and health workers from across the South to discuss topics and articles for this health issue of Southern Exposure and to share common experiences in the health field Les Falk's recollections of the UMWA Fund's battles with entrenched coal company doctors during the early 1950s gave our gathering of Southern health activists a sense of rootedness in our region's tradition of struggle and innovation in organizing health care
