Elk An Ungulate Portrait Including Deer And Moose:

Large Mammals of the Rocky Mountains Jack Ballard, 2018-05-01 This is the ultimate guide to big mammals of the Rocky Mountains Elk Grizzly Bears Wolves Bison Black Bears Moose Bighorn Sheep Mountain Lions and Whitetail Deer This book offers up substantive yet easily digestible information on these big mammals from where they live to what they prey on to how they communicate and more More than 400 full color photographs throughout make this a keepsake reference for years to come

Yellowstone Cougars Toni K. Ruth, Polly C. Buotte, Maurice G. Hornocker, 2019-09-23 Yellowstone Cougars examines the effect of wolf restoration on the cougar population in Yellowstone National Park one of the largest national parks in the American West No other study has ever specifically addressed the theoretical and practical aspects of competition between large carnivores in North America The authors provide a thorough analysis of cougar ecology how they interact with and are influenced by wolves their main competitor and how this knowledge informs management and conservation of both species across the West Of practical importance Yellowstone Cougars addresses the management and conservation of multiple carnivores in increasingly human dominated landscapes The authors move beyond a single species approach to cougar management and conservation to one that considers multiple species which was impossible to untangle before wolf reestablishment in the Yellowstone area provided biologists with this research opportunity Yellowstone Cougars provides objective scientific data at the forefront of understanding cougars and large carnivore community structure and management issues in the Greater Yellowstone Ecosystem as well as in other areas where wolves and cougars are reestablishing Intended for an audience of scientists wildlife managers conservationists and academics the book also sets a theoretical precedent for writing about competition between carnivorous mammals

Glacier: A Natural History Guide David Rockwell, 2023-12-12 Author and naturalist David Rockwell explains the evolution of the park's geology from the erosion of Australian mountains more than a billion years ago to the glaciers that gave Glacier National Park its distinctive landscape He explores the natural history of the plants and animals of the park's six distinct regions You'll learn about the park's greatest predators grizzly bears mountain lions and wolves and about their complex relationship with their prey The result is a fascinating and intimate portrait of one of the world's last truly wild places

Forest Ecology Dan Binkley, 2021-07-26 Forest Ecology Forest Ecology An Evidence Based Approach Forest ecology is the science that deals with everything in forests including plants and animals and their interactions the features of the environment that affect plants and animals and the interactions of humans and forests All of these components of forests interact across scales of space and time Some interactions are constrained deterministic and predictable but most are indeterminant contingent and only broadly predictable Forest Ecology An Evidence Based Approach examines the features common to all forests and those unique cases that illustrate the importance of site specific factors in determining the structure function and future of a forest The author emphasizes the role of evidence in forest ecology because appealing simple stories often lead to

misunderstandings about how forests work A reliance on evidence is central to distinguishing between appealing stories and stories that actually fit real forests The evidence based approach emphasizes the importance of real world observable science in forests Classical approaches to ecology in the twentieth century often over emphasized appealing concepts that were not sufficiently based on real forests The vast amount of information now available on forests allows a more complete coverage of forest ecology that relies on a strong empirical foundation Forest Ecology An Evidence Based Approach is the ideal companion text for the teaching of upper level undergraduate and graduate courses in forest ecology Canadian Books in Print 2002 Marian Butler,2002-02 Yellowstone Wolves Douglas W. Smith,Daniel R. Stahler,Daniel R. MacNulty,2020-12-28 This beautifully illustrated volume on the Yellowstone Wolf Project includes an introduction by Jane Goodall and an exclusive online documentary The reintroduction of wolves to Yellowstone National Park was one of the greatest wildlife conservation achievements of the twentieth century Eradicated after the park was first established these iconic carnivores returned in 1995 when the US government reversed its century old policy of extermination In the intervening decades scientists have built a one of a kind field study of these wolves their behaviors and their influence on the entire ecosystem Yellowstone Wolves tells the incredible story of the Yellowstone Wolf Project as told by the people behind it This wide ranging volume highlights what has been learned in the decades since reintroduction as well as the unique blend of research techniques used to gain this knowledge We learn about individual wolves population dynamics wolf prey relationships genetics disease management and policy and the rippling ecosystem effects wolves have had on Yellowstone s wild and rare landscape Featuring a foreword by Jane Goodall beautiful images a companion online documentary by celebrated filmmaker Bob Landis and contributions from more than seventy wolf and wildlife conservation luminaries from Yellowstone and around the world Yellowstone Wolves is an informative and beautifully realized celebration of the extraordinary Yellowstone Wolf Project Canadian Books in Print ,2003 **A Mountain Alphabet** Margriet Ruurs,2011-11-30 Mountains are an impressive sight anywhere in the world but those of the western mountain region of North America offer riches that are truly unique This lavishly illustrated picture book presents snowcapped peaks emerald lakes tall pines and magnificent maples and a range of birds and animals that will fill readers of all ages with wonder The treasures and mysteries of nature are depicted in twenty six full color paintings each with a line of alliterative text Objects that begin with that letter of the alphabet are waiting to be discovered in each illustration Complete with detailed information about each setting painted this is a visually and mentally stimulating experience from A to Z **Restoration of Gray Wolves to Yellowstone National Park** United States.
