Emancipatory City Paradoxes And Possibilities:

The Emancipatory City? Loretta Lees, 2004-08-15 The ambivalent status of urban space in terms of emancipation democratisation justice and citizenship is central to recent work in urban geography Through exploration of the tensions and possibilities between freedoms and constraints offered by the city the authors build on current perspectives to present an analysis of urban experience

Networked Urbanism Talja Blokland, 2016-04-22 Despite considerable interest in social capital amongst urban policy makers and academics alike there is currently little direct focus on its urban dimensions In this volume leading urban researchers from the Netherlands the UK the USA Australia Italy and France explore the nature of social networks and the significance of voluntary associations for contemporary urban life Networked Urbanism recognizes that there is currently a sense of crisis in the cohesion of the city which has led to public attempts to encourage networking and the fostering of social capital However the contributors collectively demonstrate how new kinds of networked urbanism associated with ghettoization suburbanization and segregation have broken from the kind of textured urban communities that existed in the past This has generated new forms of exclusionary social capital which fail to significantly resolve the problems of poor residents whilst strengthening the position of the advantaged Grounded in theoretical reflection and empirical research Networked Urbanism will be of interest to scholars and students of sociology geography and urban studies as well as to policy makers

Thick Space Dorothee Brantz, Sasha Disko, Georg Wagner-Kyora, 2014-03-15 Could the concepts of metropolitanism and thick space aid our understanding of historical and contemporary urban change Essays by scholars from both sides of the Atlantic provide interdisciplinary approaches to the complex dynamics of large scale urbanization The book opens with conceptual questions regarding the development of metropolises and metropolitan studies The following sections provide analyses of the social environmental and cultural dimensions of metropolitan spaces from both a theoretical and an empirical perspective such as the role of planning and urban parks the impact of ethnic diversity and segregation the place of cinematic visions or the centrality of infrastructures and architecture

City Phil Hubbard, 2006-09-27 City provides an accessible yet critical introduction to one of the key concepts in human geography Always at the heart of discussions in social theory the definition and specification of the city nonetheless remains illusive In this volume Phil Hubbard locates the concept of the city within current traditions of social thought providing a basis for understanding its varying usages and meanings through a critical discussion of the contribution of key authors and thinkers Written in a lively and accessible style the individual chapters of City offer a thematic overview of four dominant ways of approaching cities as lived in places as imagined spaces as networks of association as technologies of flow Drawing on a diverse range of literatures and case studies the book spells out the importance of a geographical perspective on the city suggesting that it is only by bringing these different ways of mapping the city together that we can begin to make sense of cities

Reclaiming Cities as Spaces of Middle Class Parenthood Johanna Liljus, 2018-09-12 For nearly a century families have been out migrating to suburbs and

peri urban areas In this book Johanna Lilius conceptualizes the relatively recent phenomenon of families choosing to live in the inner city Drawing on a range of qualitative data the book offers a holistic approach to simultaneously understanding changes within parenting practices and changes connected to city development The book explains not only why families choose to stay in the inner city and how they use the city in their everyday lives but also how families change the landscape of contemporary cities and how the family is and has been perceived in urban planning and policy making The Nordic perspective provided by Lilius makes this book an important contribution in helping understand inner city change outside the Anglo American context and will appeal to an international audience **Divided Cities** Annika Björkdahl, Lisa

Strömbom, 2015-02-08 Combining peace and conflict studies with public administration research Divided Cities critically investigates the roles of public administration and civil servants in resolving issues that are potentially conflictual in divided societies Zooming in on nine cities with very different legacies and democratic development Copenhagen Malm Toronto Belfast Mostar Cape Town Mitrovica Nicosia and Jerusalem the contributors analyze the tools strategies and understandings of conflict resolution that are available in different stages between conflict and stability Exploring how contested issues have been addressed by whom and to what effect this collection of essays examines how public institutions and citizens have interacted to agree on the best course of action for progress in their respective cities The Ludic City Quentin

Stevens, 2007-04-11 This international and illustrated work challenges current writings focussing on the problems of urban public space to present a more nuanced and dialectical conception of urban life Detailed and extensive international urban case studies show how urban open spaces are used for play which is defined and discussed using Caillois four part definition competition chance simulation and vertigo Stevens explores and analyzes these case studies according to locations where play has been observed paths intersections thresholds boundaries and props Applicable to a wide range of countries and city forms The Ludic City is a fascinating and stimulating read for all who are involved or interested in the design of urban spaces

City Suburbs Alan Mace, 2013 The majority of the world's population is now urban and for most this will mean a life lived in the suburbs City Suburbs considers contemporary Anglo American suburbia drawing on research in outer London it looks at life on the edge of a world city from the perspective of residents Interpreted through Bourdieu's theory of practice it argues that the contemporary suburban life is one where place and participation are in combination strong determinants of the suburban experience From this perspective suburbia is better seen as a process an on going practice of the suburban which is influenced but not determined by the history of suburban development How residents engage with the city and the legacy of particular places combine powerfully to produce very different experiences across outer London In some cases suburban residents are able to combine the benefits of the city and their residential location to their advantage but in marginal middle class areas the relationship with the city is more circumspect as the city represents more threat than opportunity The importance of this relational experience with the city informs a call to integrate more fully the suburbs into

studies of the city **Gendering Migration** Wendy Webster, 2016-12-05 Gendering Migration demonstrates the significance of studying migration through the lens of gender and ethnicity and the contribution this perspective makes to migration histories Through a consideration of the impact of migration on men and masculine identities as well as women and feminine identities it extends our understanding of questions of gender and migration focusing on the history of migration to Britain after the Second World War The volume draws on oral narratives as well as documentary and archival research to demonstrate the important role played by gender and ethnicity both in ideas and images of migrants and in migrants own experiences The contributors consider a range of migrant and refugee groups who came to Britain in the twentieth century Caribbean East African Asian German Greek Irish Kurdish Pakistani Polish and Spanish The fresh interpretations offered here make this an important new book for scholars and students of migration ethnicity gender and modern British history **Transatlantic Literature and Transitivity, 1780-1850** Annika Bautz, Kathryn Gray, 2017-04-28 This book makes an important contribution to transatlantic literary studies and an emerging body of work on identity formation and print culture in the Atlantic world The collection identifies the ways in which historically situated but malleable subjectivities engage with popular and pressing debates about class slavery natural knowledge democracy and religion In addition the book also considers the ways in which material texts and genres including for example the essay the guidebook the travel narrative the periodical the novel and the poem can be scrutinized in relation to historically situated transatlantic transitions transformations and border crossings The volume is underpinned by a thorough examination of historical and conceptual frameworks and prioritizes notions of circulation and exchange as opposed to transfer and continuance in its analysis of authors texts and ideas The collection is concerned with the movement of people texts and ideas in the currents of transatlantic markets and politics taking a fresh look at a range of canonical and popular writers of the period including Austen Poe Crèvecoeur Brockden Brown Sedgwick Hemans Bulwer Lytton Dickens and Melville In different ways the essays gathered together here are concerned with the potentially empowering realities of the transitive circulatory and contingent experiences of transatlantic literary and cultural production as they are manifest in the long nineteenth century **Planning the Night-time City** Marion Roberts, Adam Eldridge, 2012-11-12 The night time economy represents a particular challenge for planners and town centre managers In the context of liberalised licensing and a growing culture around the 24 hour city the desire to foster economic growth and to achieve urban regeneration has been set on a collision course with the need to maintain social order Roberts and Eldridge draw on extensive case study research undertaken in the UK and internationally to explain how changing approaches to evening and night time activities have been conceptualised in planning practice The first to synthesise recent debates on law health planning and policy this research considers how these dialogues impact upon the design management development and the experience of the night time city This is incisive and highly topical reading for postgraduates academics and reflective practitioners in Planning Urban Design

and Urban Regeneration Searching for the Just City Peter Marcuse, James Connolly, Johannes Novy, Ingrid Olivo, Cuz Potter, Justin Steil, 2009-05-29 If today's cities are full of injustices what would a Just City look like Contributors to this volume including David Harvey Peter Marcuse and Susan Fainstein define the concept examining it from multiple angles in addition to questioning it and suggesting alternatives *The Permanence of Temporary Urbanism* Mara Ferreri, 2025-10-01 Temporary urbanism has become a distinctive feature of urban life after the 2008 global financial crisis This book offers a critical exploration of its emergence and establishment as a seductive discourse and as an entangled field of practice encompassing architecture visual and performative arts urban regeneration policies and planning Drawing on seven years of semi ethnographic research it explores the politics of temporariness from a situated analysis of neighbourhood transformation media representations and wider political and cultural shifts in austerity London Through a longitudinal engagement with projects and practitioners the book tests the power of aesthetic and cultural interventions and highlights tensions between the promise of vacant space re appropriation and its commodification Against the normalisation of ephemerality it presents a critique of the permanence of temporary urbanism as a glamorisation of the anticipatory politics of precarity which are transforming cities subjectivities and imaginaries of urban action Performance and the Contemporary City Nicolas Whybrow, 2020-05-15 Cities with their rising populations and complex configurations have become key symbols of a fast changing modernity This timely collection gathers together various urban writings from a range of relevant disciplines including architecture geography sociology visual art ethnography and psychoanalysis Its focus however is performance Underscoring the importance of the field it shows how performance functions as a dynamic interdisciplinary mechanism which is central not only to understanding the multiplicity of urban living but also to the way the identities of cities are shaped Gathering together key writings on the city and performance by authors ranging from Walter Benjamin to Tim Etchells to Carl Lavery the reader can be navigated in any number of ways Supported by extensive introductory material it will be essential and evocative reading for anyone interested in making connections between performance and urban life

Protest and Resistance in the Tourist City Claire Colomb, Johannes Novy, 2016-07-01 Across the globe from established tourist destinations such as Venice or Prague to less traditional destinations in both the global North and South there is mounting evidence that points to an increasing politicization of the topic of urban tourism In some cities residents and other stakeholders take issue with the growth of tourism as such as well as the negative impacts it has on their cities while in others particular forms and effects of tourism are contested or deplored In numerous settings contestations revolve less around tourism itself than around broader processes policies and forces of urban change perceived to threaten the right to stay put the quality of life or identity of existing urban populations This book for the first time looks at urban tourism as a source of contention and dispute and analyses what type of conflicts and contestations have emerged around urban tourism in 16 cities across Europe North America South America and Asia It explores the various ways in which community groups

residents and other actors have responded to and challenged tourism development in an international and multi disciplinary perspective The title links the largely discrete yet interconnected disciplines of urban studies and tourism studies and draws on approaches and debates from urban sociology urban policy and politics urban geography urban anthropology cultural studies urban design and planning tourism studies and tourism management This ground breaking volume offers new insight into the conflicts and struggles generated by urban tourism and will be of interest to students researchers and academics from the fields of tourism geography planning urban studies development studies anthropology politics and sociology

Law and the City Andreas Philippopoulos-Mihalopoulos, 2007-05-07 Law and the City offers a lateral critical and often unexpected description of some of the most important cities in the world including Moscow Istanbul Berlin Singapore Athens Mexico City Toronto Sydney Johannesburg each one from a distinctive legal perspective An invaluable guide to adopting a different approach to the city and its history culture and everyday experience Law and the City is not simply an exploration of the relationship between these two spheres It details a flourishing of law s spatiality and urban legal locality an unfolding of both the juridical urban body and the city s legal dreams of both the urban law and the juridical polis Enlightening and at the same time problematizing the reader this volume is an innovative collection of truly global dimensions that will prove compelling reading both for specialists and for critical travellers Art in the City, the City in Art Elisha

Masemann, 2024-03-31 This Book examines an interplay between discourses on the city that stress the need for rational functional order and art s imaginative deviations from the topdown structures of urban life Moving between theory and praxis the book situates the city as both a concept and physical construct through which lives and possibilities are shaped or defined In response certain modalities of art create spontaneous non rational and playful interludes that risk escape from the urban apparatus and a hyper valorisation of rational order A three part framework is used to discuss this push pull dynamic and to assess the strategies of shock performative embodiment and intervention that emerged in post war art movements and in contemporary performance and participatory art practices The book examines how the disturbances introduced by artists throw the city construct into sharp relief making it visible and activating momentary encounters where new modes of expression can emerge This Book offers a new approach to interdisciplinary studies of art and urbanity The book aims to delineate how the city as concept and construct is made visible through artistic practice and in turn challenged or interrogated Students researchers and professionals with an interest in the interaction between art and urban studies will discover a new perspective on how urban conditions and issues have been addressed through artistic practice The book contributes to an evolving discourse in the urban humanities through an exposition of the city s default construct that is made visible or reimaged through visual art in public spaces **Gentrification** Loretta Lees, Tom Slater, Elvin

Wyly, 2013-10-18 This first textbook on the topic of gentrification is written for upper level undergraduates in geography sociology and planning The gentrification of urban areas has accelerated across the globe to become a central engine of

urban development and it is a topic that has attracted a great deal of interest in both academia and the popular press. Gentrification presents major theoretical ideas and concepts with case studies and summaries of the ideas in the book as well as offering ideas for future research.

Unplugging the City Fábio Duarte, Rodrigo Jose Firmino, 2017-10-16. Modernity has entrusted technology with such power that it is treated as an autonomous entity with its own manners and morals. Technological disruptions are also socially disruptive. Technological failures reveal both the constituents of the technology itself and the social fabric woven by this technology. Cities are the quintessential technological arrangement not only materially but also as a conceptual framework. The ubiquity of technology makes us think and plan cities mostly in terms of technological arrangements. *Unplugging the City: The Urban Phenomenon and its Sociotechnical Controversies* proposes a conceptual and methodological framework for analyzing certain urban phenomena as a technological assemblage. It demonstrates through multiple case studies the sociotechnical complexities involved in the stabilization and disruption of urban technological arrangements. Examples range from the urban phantasmagorias portrayed in science fiction movies to the urban proposals of Brasilia and Masdar from the book of bike sharing systems to pervasive global surveillance systems. Written by Fábio Duarte and Rodrigo Firmino based on their original research and publications, this is an essential resource for those interested in the theory and study of technology and its inextricable influence on the city.

The Routledge Handbook of Henri Lefebvre, The City and Urban Society Michael E. Leary-Owhin, John P. McCarthy, 2019-11-21. The Routledge Handbook of Henri Lefebvre: The City and Urban Society is the first edited book to focus on Lefebvre's urban theories and ideas from a global perspective, making use of recent theoretical and empirical developments with contributions from eminent as well as emergent global scholars. The book provides international comparison of Lefebvrian research and theoretical conjecture and aims to engage with and critique Lefebvre's ideas in the context of contemporary urban social and environmental upheavals. To use Lefebvre's spatial triad as a research tool as well as a point of departure for the adoption of ideas such as differential space to reassess Lefebvre's ideas in relation to nature and global environmental sustainability and to highlight how a Lefebvrian approach might assist in mobilising resistance to the excesses of globalised neoliberal urbanism. The volume draws inspiration from Lefebvre's key texts *The Production of Space*, *Critique of Everyday Life* and *The Urban Revolution* and includes a comprehensive introduction and concluding chapter by the editors. The conclusions highlight implications in relation to increasing spatial inequalities, increasing diversity of needs including those of migrants, more authoritarian approaches and asymmetries of access to urban space. Above all, the book illustrates the continuing relevance of Lefebvre's ideas for contemporary urban issues and shows via global case studies how resistance to spatial domination by powerful interests might be achieved. The Handbook helps the reader navigate the complex terrain of spatial research inspired by Lefebvre. In particular, the Handbook focuses on the series of struggles globally for the right to the city and the collision of debates around the urban age, cityism and planetary urbanisation. It will be a guide for graduate and

advanced undergraduate teaching and a key reference for academics in the fields of Human Geography Sociology Political Science Applied Philosophy Planning Urban Theory and Urban Studies Practitioners and activists in the field will also find the book of relevance
