**Emergency Response to Terrorism**, 2000 Digitalized Co-production of Emergency Response Wael

Alkusaibati, 2024-05-03 Contemporary global challenges like global warming rapid urban development and the current unstable security situation lead to an increase in large scale crises e g forest fires alongside frequent smaller emergencies e g house fires and traffic accidents The increase in emergencies strains professional response organizations necessitating additional resources Civilian volunteers are therefore increasingly being integrated into the response system The development is mediated by information and communication technologies ICTs which enable communication between professional responders e g the municipal rescue services the emergency medical services the Public Swedish Answering Point and citizens While many studies focus on spontaneous volunteer activities emerging on social media fewer examine

organized volunteerism initiatives at the local emergency response level Over a decade ago a municipal rescue service in northern Sweden established an initiative recruiting volunteers as first responders and equipping them with basic response tools The volunteers undergo training in tasks such as cardiopulmonary resuscitation CPR and fire extinguishing They are dispatched to predefined response tasks using simple ICT applications like SMS lists or mobile apps This initiative has expanded to other areas due to perceived benefits such as shorter response times and reduced casualties and material damage The phenomenon can be labelled as an emerging form of ICT enabled or digitalized co production of public services However previous research indicates a research gap in understanding describing and defining this type of co production The overall aim of the thesis is to describe how these ICT enabled initiatives emerge and develop over time and identify the related effects on the response system This is expected to provide recommendations on how they can be developed and supported This aim is divided into three specific objectives where each has been addressed through a research paper 1 identifying how the existing literature describes ICT enabled digitalized volunteerism in large and small scale emergencies 2 identifying how these initiatives emerge and operate and can be maintained in small scale emergencies introducing more systematized knowledge on this concept 3 initially evaluating the contributions of volunteers in the initiatives

Leaning on a case study approach inspired by action research a combination of data collection methods has been adopted e g a literature review interviews and incident reports filled out by volunteers For the data analysis the theoretical lens of ICT enabled digitalized co production of public services has been applied The first paper is a literature review study that examines digitally enabled volunteering activities in crises and small scale emergencies It highlights the prevalence of studies on volunteers using social media for crowdsourcing in crises often termed digitalized volunteerism which entails virtual and or physical contributions by volunteers to the response efforts In contrast fewer studies focus on volunteers role in local small scale emergencies labelled as hybrid ICT enabled or digitalized coproduction The term hybrid here refers to the loose affiliation of the volunteers where they collaborate with the rescue services but are not officially associated through binding contracts Hence they are in between spontaneous and organized volunteerism Both volunteering modes support professional response systems and display similar needs for steering financial support coordination and integration of ICT artifacts However crises require increased coordination to manage uncertainties risks and data overload effectively The second paper presents three models describing the emergence of hybrid digitalized co production initiatives in urban and rural areas as defined in Paper 1 along with how national authorities can support them These models i e Rural Urban and National consist of three phases Recruitment Response and Maintenance Each model exhibits distinct characteristics In rural areas for example there is a need for more regular training due to low alerting frequency and the possibility of using simple dispatch ICTs as cost effective solutions Conversely urban areas have more alerts necessitating more advanced ICTs with less emphasis on regular training compared to rural areas At the macro level the national model highlights roles that national

actors can play such as facilitating a joint Application Programming Interface API joint insurance solutions and an ICT system that can register incoming and active volunteers The third paper is an initial evaluation of these initiatives at emergency sites focusing on ICT enabled dispatch estimated response times tasks performed and collaboration with professionals to assess the effects of using volunteers This approach contrasts with previous studies that took an overall perspective and only used qualitative data A total of 53 incident reports were collected from volunteers revealing that volunteers arrived before professionals in twothirds of incidents contributing to an average gain of 5 minutes Additionally volunteers performed a broader range of tasks than previously described and often continued collaboration with professionals on site despite the initial expectation of handing over tasks upon the arrival of professional response actors Also comparing this data with the rural model from Paper 2 similarities and differences emerged For instance there was a higher number of alerts and the basic ICTs used for dispatch were deemed insufficient contrary to the model s perception The thesis scientific contribution is a clearer conception of digitalized co production of above all local emergency response as an emerging phenomenon In the three papers the ICT dispatch was identified as central and needs further development to enhance this co production form The thesis also sheds light on the need to integrate the initiatives into the official governmental frameworks Furthermore the thesis provides a primary understanding of how the concept works on the ground and provides an initial evaluation of the effects In the practical field the thesis offers insights into the importance of volunteers as additional resources to the official response systems highlights challenges hindrances and enablers and suggests potential solutions and improvements Future work will include a further collection of incident reports for more reliable assessments and complementary interviews with volunteers Also the potential role of volunteers in larger crises for example as part of civil preparedness will be further explored

Samhällsutmaningar som klimatförändring och det nuvarande globala säkerhetsläget leder till en ökning av storskaliga kriser Samtidigt ökar frekventa mindre olyckor till exempel bostadsbränder och trafikolyckor även fortsättningsvis Stora kriser kräver omedelbar hantering men frekventa olyckor leder också till förlust och skador på liv och egendom Både innebär en stor belastning på professionella räddningsaktörer Ett sätt att hantera utmaningarna är samarbetet med frivilliga aktörer i räddningsinsatser Utvecklingen av information och kommunikationsteknik IKT spelar en central roll här eftersom tekniken underlättar tvärgsam kommunikation mellan professionella räddningsaktörer och frivilliga aktörer tex räddningstjänst ambulanssjukvård och larmoperatörer och frivilliga aktörer De flesta studier på området fokuserar på spontanfrivilliga som använder sociala medier för krishantering medan färre studier fokuserar på mer organiserade former av frivillighet på lokal nivå och för mindre olyckor För mer än 10 år sedan initierade en kommunal räddningstjänst i norra Sverige ett initiativ för att rekrytera civila frivilliga som förstasatspersoner Initiativet innebär att de civila satspersonerna utbildas för att utföra vissa uppgifter till exempel hjärt-lungräddning och släcka mindre bränder De utrustas med enkel utrustning och larmas ut på vissa typer av olyckor med hjälp av grundläggande IKT som SMS-lister eller specialutvecklade appar Verkligheten har initiativet spridit sig till fler områden och allt fler

ddningstjänster och nationella myndigheter ser att första insatspersoner kan bidra till kortare responstider vilket minskar antalet skadade människor och mindre materiell förlust. I litteraturen benämns detta fenomen ibland som en framväxande form av digitaliserad samproduktion av offentliga tjänster. Tidigare studier pekar också på ett kunskapsgap när det gäller att beskriva och konceptualisera sådan samproduktion. Avhandlingens övergripande syfte är att beskriva hur dessa initiativ uppstår och utvecklas över tid och identifiera de relaterade effekterna på beredningssystemet. Detta för att kunna ge rekommendationer om hur initiativen kan utvecklas och stärkas. Avhandlingen består av tre delstudier: artikel 1 identifierar hur den befintliga litteraturen beskriver IKT-aktiverat digitaliserat frivilligarbete vid stora kriser och mindre lokala olyckor; artikel 2 beskriver hur initiativ uppstår, fungerar och kan upprätthållas över tid vid mindre olyckor; artikel 3 utvärderar initialt de civila insatspersonernas bidrag till beredningsinsatser. Avhandlingen genomförs som en fallstudie inspirerad av aktionsforskning där en kombination av datainsamlingsmetoder används till exempel en litteraturöversikt, intervjuer och handledningsrapporter ifyllda av frivilliga. Teoretiska perspektiv runt IKT-aktiverat digitaliserat samproduktion av offentliga tjänster tillämpas i dataanalysen. Första artikeln är en litteraturöversikt kring digitaliserat frivillighet i kriser och frekventa olyckor. Den visar att insatser av spontanfrivilliga i kriser och sociala medier som en form av crowdsourcing är ett väl diskuterat område. Ibland benämns som digitaliserat frivillighet och inkluderar både virtuella och fysiska bidrag från frivilliga responsinsatser. Ett fåtal studier fokuserar på frivilligas bidrag till mindre men samtidigt mer frekventa olyckor. När det gäller det kallas konceptet ofta hybrid IKT-aktiverat eller digitaliserat samproduktion av beredningsinsatser. Hybrid avser här att insatspersonerna samverkar med den kommunala beredningstjänsten men utan officiellt bindande avtal. Därför befinner de sig i en gråzon mellan spontant och organiserat frivilligarbete. Båda typerna av frivillighet kan stärka de professionella insatssystemen och har liknande behov av styrning, ekonomiskt stöd, samordning och integration av teknik i de professionella responssystemen. Stora kriser har dock större behov av koordinering för att hantera osäkerheter, risker och undvika informationsoverload. Den andra artikeln beskriver de digitaliserade hybrida initiativen definierade i artikel 1 och hur de kan stärkas. Detta genom tre modeller där två av modellerna relaterar till lokal nivå och stad respektive landsbygd. Den tredje relaterar till nationellt stöd och styrning. Modellerna inkluderar tre faser: Rekrytering, Respons och Underhåll. Varje modell uppvisar likheter och olikheter. I landsbygdsområdet finns till exempel ett behov av mer regelbunden träning på grund av låg utlarmningsfrekvens och det gäller att använda enkla IKT-lösningar som kostnadseffektiva alternativ. Andra sidan har stadsområdet fler utlarmningar vilket kräver mer avancerade IKT-lösningar men samtidigt mindre regelbunden träning för de civila insatspersonerna för mer erfarenhet. På makroniv identifieras roller och uppgifter som nationella aktörer kan ta som att underlätta ett gemensamt applikationsprogrammeringsgränssnitt, API-erbjudande, gemensamma förfarandekringar och utveckla ett IKT-system som kan registrera inkommande och aktiva insatspersoner. Artikel 3 syftar till att initialt utvärdera hur de digitaliserade initiativen fungerar på skadeplatser genom att fokusera på utlarmning, uppskattade responstider, utförda uppgifter, samarbete med professionella etc. Med andra ord att initialt

titta på initiativets effekter En händelserapport distribuerades till civila insatspersoner och resulterade i 53 ifyllda rapporter De visar bland annat att insatspersonerna använde flera professionella i två tredjedelar av insatserna och bidrog till en genomsnittlig tidsvinst på 5 minuter Dessutom visar resultatet att de civila insatspersonerna utför en större bredd av uppgifter än vad tidigare beskrivits inom initiativet och dessutom ofta fortsätter samarbeta med professionella aktörer när de senare anlantar De civila insatserpersonerna är även villiga att medverka vid storskaliga kriser Jämfört med landsbygdsmodellen från Artikel 2 framkom likheter och skillnader Till exempel var det så pass många larm att de IKT-lösningar som användes för att skicka ut larmen bedömdes som otillräckliga och behöver utvecklas Detta visar även på att modellen behöver revideras och förfinas Avhandlingens vetenskapliga bidrag är kunskap om det framväxande fenomenet digitaliserad samproduktion civila insatspersoner som förstärks av räddningsinsatser I alla tre artiklarna identifierades IKT-street som centralt och som behöver vidareutvecklas för att upprätthålla och förbättra denna form av samproduktion Avhandlingen belyser också behovet av nationell koordinering och stöd Vidare ger avhandlingen en primär förståelse för hur konceptet fungerar i praktiken och en initial utvärdering av effekter av att använda insatspersoner För praktiker ger avhandlingen kunskap om civila insatspersoner som ytterligare resurser till de professionella responssystemen identifierar utmaningar hinder och möjliga risker samt för potentiella lösningar och förbättringar Framtida arbeten kommer att inkludera ytterligare insamling av händelserapporter för mer tillförlitlig utvärdering och kompletterande intervjuer med insatspersoner Dessutom kommer den potentiella rollen för civila insatspersoner i större kriser till exempel som en del av civil beredskap att utforskas vidare

**Emergency Response to Chemical and Biological Agents** John R. Cashman, 2002-01-01 With the increasing availability of biological and chemical materials the threat of terrorism grows daily Innocent bystanders the major targets of terrorists because they gain the most publicity create a vast number of potential victims In our changing world horrendous violence has become commonplace The growth of incidences involving chemical and biological agents has created a need for local response teams to be aware of the dangers they face Emergency Response to Chemical and Biological Agents serves as a training manual for emergency responders who handle incidents involving biological and chemical hazardous materials The author covers poisons such as nerve blood blister and choking gases and biological agents such as anthrax typhus and cholera Using examples ripped from the headlines he explains what is and is not a terrorist act and the difference in handling each incident In addition the author explains the standard operating procedures of Hazardous Materials Teams before during and after an incident Whether terrorist act or chemical spill local responders usually reach the scene first As these incidents multiply and they will these teams will need a blueprint for dealing with chemical and biological materials Emergency Response to Chemical and Biological Agents provides a clear concise plan of action for responding to these incidents
