Einsteins Greatest Mistake Abandonment Of The Aether:

Einstein's Greatest Mistake Sid Deutsch, 2006-02 If a child wants proof we can think of 10 different ways to show that we are surrounded by air but we are of course normally unaware that we live at the bottom of an ocean of air It is claimed in this book that we are unaware similarly that we are surrounded by an atmosphere of aether There is one major difference however We have not been able to detect the aether Nevertheless the aether provides a solution to the following mystery How can light or any electromagnetic wave travel for billions of years across the vastness of the Universe without losing any energy The answer is that the Universe is filled with a light transmitting medium The Aether The proof that there is an aether is the subject of the present book
