A Good Life for More People United States. Department of Agriculture,1971 Morality, Mortality: Death and whom to save from it Frances Myrna Kamm,1998 Critically examining other philosophers ideas the author of this work explores the thinking behind the distribution of scarce resources such as transplant organs Publisher *A Good Life* Mary Edmunds,2013-05-01 This book is a story It s a story about ordinary people in very different parts of the world dealing with rapid change in the late twentieth and early twenty first centuries It s about times of turbulent and violent social upheaval and rupture with the past It s about modern times It s also about being human what it is to be human in a modernising and globalising world how in responding to the circumstances of their times different groups define redefine and attempt to put into practice their understandings of the good and of what constitutes a good life And it s about how human rights have come to be not abstract universal principles but a practical source of consciousness and practice for real people Nature, Reason, and the Good Life Roger Teichmann,2011-06-30 At the centre of our ethical thought stands the human being Roger Teichmann examines the ways in which facts about human nature determine the shape of ethical concepts such as rationality virtue and happiness He argues that only by attending to the social and empirical character of language use can we address a number of problems in ethics **The 6 Keys to a Good Life - What You Must Know & Do to Live a Full Life** Boye Lafayette De Mente,2006-12-17 Author Boye Lafayette De Mente identifies and describes the six overlapping elements in life the physical emotional sexual intellectual spiritual and philosophical that determine the quality of life and provides specific and provocative guidelines for understanding coping with and making the best use of these elements De Mente is internationally known for his 60 plus books on business ethics culture the influence of language on human behavior and the role of sex in human affairs He has received numerous accolades for the clarity and impact of his writing style **Buy the Milk First** Murray J Lee,2022-03-03 Do you wish you were taught personal finance in school Are you experiencing financial hardship stressed about money feeling out of control or simply desire to improve your financial situation This book is for you Buy The Milk First is filled with financial wisdom and secrets that will help you secure financial prosperity regardless of your income This financial guide filled with numerous stories and examples from the author s own life teaches personal financial literacy and key principles such as how to understand money create a personal financial plan choose financial priorities in other words buy the milk first manage and eliminate debt increase savings and prepare for retirement Discussed in a simple entertaining and easy to read style these principles will improve your financial position and help you discover the secrets to financial prosperity *A Minimally Good Life* Nicole Hassoun,2024-07-12 What do we owe to each other simply out of respect or concern for our common humanity What can we claim The United Nations Sustainable Development Goals and the Universal Declaration of Human Rights as well as many states constitutions embody competing answers to these questions Different accounts of what we owe to others out of concern for our common humanity ground divergent accounts of the basic

minimum just societies and the international community must help people secure A Minimally Good Life argues that concern for our common humanity requires helping others live minimally good lives when doing so does not require sacrificing our own ability to live well enough This it suggests provides a unified answer to the question of what we must give to and can demand from others as a basic minimum More precisely Nicole Hassoun argues that people must obtain the things that let them secure the relationships pleasures knowledge appreciation worthwhile activities and other things that a reasonable and caring person free from coercion and constraint would set as a minimal standard of justifiable aspiration That is as reasonable caring free people we should put ourselves into each other s shoes and think about what we need to live well enough as each person Hassoun makes this case by engaging with the main competitors in the literature those that offer different accounts of the basic minimum and the limits of our obligations She then defends a new way of helping people in present and future generations reach the sufficiency threshold and of responding to apparent tragedy when helping everyone seems impossible

People with intellectual disabilities Kelley Johnson,Jan Walmsley,2010-09-24 What does it mean to live a good life Why has it proved so difficult for people with intellectual disabilities to live one What happens when we make a good life the centre of our consideration of people with intellectual disabilities These questions are explored through a re examination of ideas from philosophy and social theory and through personal life stories This important and timely book provides an analysis and critique of current policies and underpinning ideologies in relation to people with intellectual disabilities and explores ways in which a good life may be made more attainable

The Quest for Purpose Perry L. Glanzer,Jonathan P. Hill,Byron R. Johnson,2017-08-07 Demonstrates how students and educators can resist narrow utilitarian views of higher education s purpose While the search for meaning and purpose appears to be a constant throughout human history there are characteristics about our current time period that make this search different from any other previous time particularly for college students In this book Perry L Glanzer Jonathan P Hill and Byron R Johnson explore college students search for meaning and purpose and the role that higher education plays To shed empirical light on this complex issue the authors draw on in depth interviews with four hundred college students from different types of institutions across the United States They also analyze three sets of national survey data the National Study of Youth and Religion College Students Beliefs and Values and their own Gallup conducted survey of 2 500 college students Their research identifies important social educational and cultural influences that shape students quests and the answers they find Arguing against a utilitarian view of education Glanzer Hill and Johnson conclude that colleges and universities can and should cultivate and aid students in their journeys and they offer suggestions for doing so

The Strategy of Desire Ernest Dichter, Ernest Dichter is famous as one of the founding fathers of motivational research In applying the social sciences to a variety of problems Dichter emphasized new approaches to problem solving advertising politics and selling and issues of social significance such as urban renewal productivity and drug addiction As an author and corporate adviser he used psychoanalytic theory and depth interviewing to uncover unconsciously held attitudes and beliefs He goal was to help explain why people act the way they do and how positive behavioral change might be achieved In *The Strategy of Desire* Dichter both counters the argument that motivational research amounts to manipulation and shows how the understanding and modification of human behavior is necessary for progress Dichter s survey and analysis of behavior ranges widely He examines everyday matters of product choice as well as such broad civic issues as voter participation religious toleration and racial understanding He shows that in order to achieve socially constructive goals it is necessary to move beyond theological exhortation which takes an unrealistic view of human morality as well as beyond the limits of empirically oriented social science research which only deals in appearances Dichter sees human action as rooted in irrational and often unconscious motivation which can usually be uncovered if the correct approach is used In his consumer research he analyzes the nonutilitarian importance of objects in everyday life as well as how products and materials become bound with emotional resonance or acquire different meanings from different contexts or points of view Dichter shows that success depends on the satisfaction of desires and a movement beyond the ethic of work and saving Arguing that in an increasingly technological world progress and social harmony are materially based he advocates a morality of the good life in which prosperity and leisure lead to greater human self assurance in the face of change First published in 1960 *The Strategy of Desire* is especially timely in the age of the Internet and ever increasing effect of sophisticated computer technology on consumer culture Ernest Dichter 1907 1991 was consulting psychologist for the Columbia Broadcasting System from 1943 to 1946 president of the Institute for Motivational Research and founder of Ernest Dichter Associates International His books include *The Psychology of Everyday Life* *Handbook of Consumer Motivation* *Motivating Human Behavior* and *The Naked Manager* Arthur Asa Berger is professor of broadcast and electronic communication arts at San Francisco State University

The End of This World Angele Alook, Emily Eaton, David Gray-Donald, Joël Laforest, Crystal Lameman, Bronwen Tucker, 2023-01-17 The climate crisis is here and the end of this world a world built on land theft resource extraction and colonial genocide is on the horizon In this compelling roadmap to a livable future Indigenous sovereignty and climate justice go hand in hand Drawing on their work in Indigenous activism the labour movement youth climate campaigns community engaged scholarship and independent journalism the six authors challenge toothless proposals and false solutions to show that a just transition from fossil fuels

cannot succeed without the dismantling of settler capitalism in Canada Together they envision a near future where oil and gas stay in the ground where a caring economy provides social supports for all where wealth is redistributed from the bloated billionaire class and where stolen land is rightfully reclaimed under the jurisdiction and sovereignty of Indigenous peoples Packed with clear eyed analysis of both short and long term strategies for radical social change *The End of This World* promises that the next world is within reach and worth fighting for *Potpourri for and about Women* JoAnn Oppenheimer,2010-05-11 *Potpourri For and About Women* is a compilation of forty one 41 chapters written by women over fifty 50 years of age who have experienced marriage death divorce long term relationships and even second and third marriages Many of these ladies have sustained disappointments in relationships crisis within the family health careers financial loss or perhaps in more than one area They have journeyed so far and felt so much and now it is time to share some of their rich and varied experiences and encourage the sense of being there for each other These experiences have helped to empower them to become the women that they are today It is my hope that this very special book will help these ladies to give themselves and others permission to feel good and acknowledge all that they have accomplished The purpose of this book is to build strength and self esteem and provide insight for women who are currently experiencing life challenges In a nutshell it is a Self Help book for distressed women to have hope All of the ladies who have written these honest and sincere stories have learned to cope and are living productive lives today **The Future of Consumer Society** Maurie J. Cohen,2016-11-03 Consumer society in the United States and other countries is receding due to demographic ageing rising income inequality political paralysis and resource scarcity At the same time steady jobs that compensate employees on a salaried or hourly basis are being replaced by freelancing and contingent work The rise of the so called sharing economy the growth of do it yourself production and the spreading popularity of economic localization are evidence that people are striving to find new ways to ensure livelihoods for themselves and their families in the face of profound change Indications are that we are at the early stages of a transition away from a system of social organization predicated on consumerism These developments have prompted some policy makers to suggest providing households with a non labor source of income that would enable more adequate satisfaction of their basic needs These proposals include a universal basic income a citizen s dividend and a legal framework for broad based stock ownership in corporations However extreme political fractiousness makes it unlikely that these recommendations will receive prompt and widespread legislative endorsement in most countries In the meantime we seem to be moving incontrovertibly toward a twenty first century version of feudalism How might we chart a different path founded on social inclusiveness and economic security A practicable option entails establishment of networks of interlinked worker consumer cooperatives that organizationally unify production and consumer Such modes of mutual assistance already exist and *The Future of Consumer Society* profiles several successful examples from around the world If replicated and scaled worker consumer cooperatives could smooth the transition beyond consumer society and

facilitate a future premised on sufficiency resiliency and well being

A Good Life on a Finite Earth Daniel J. Fiorino, 2017-12-01 The potential conflict among economic and ecological goals has formed the central fault line of environmental politics in the United States and most other countries since the 1970s The accepted view is that efforts to protect the environment will detract from economic growth jobs and global competitiveness Conversely much advocacy on behalf of the environment focuses on the need to control growth and avoid its more damaging effects This offers a stark choice between prosperity and growth on the one hand and ecological degradation on the other Stopping or reversing growth in most countries is unrealistic economically risky politically difficult and is likely to harm the very groups that should be protected At the same time a strategy of unguided growth above all would cause ecological catastrophe Over the last decade the concept of green growth the idea that the right mix of policies investments and technologies will lead to beneficial growth within ecological limits has become central to global and national debates and policy due to the financial crisis and climate change As Daniel J Fiorino argues in order for green growth to occur ecological goals must be incorporated into the structure of the economic and political systems In this book he looks at green growth a vast topic that has heretofore not been systematically covered in the literature on environmental policy and politics Fiorino looks at its role in global national and local policy making its relationship to sustainable development controversies surrounding it both from the left and right its potential role in ameliorating inequality and the policy strategies that are linked with it The book also examines the political feasibility of green growth as a policy framework While he focuses on the United States Fiorino will draw comparisons to green growth policy in other countries including Germany China and Brazil

What We Owe the Future William MacAskill, 2022-08-16 An Instant New York Times Bestseller This book will change your sense of how grand the sweep of human history could be where you fit into it and how much you could do to change it for the better It is as simple and as ambitious as that Ezra Klein An Oxford philosopher makes the case for longtermism that positively influencing the long term future is a key moral priority of our time The fate of the world is in our hands Humanity's written history spans only five thousand years Our yet unwritten future could last for millions more or it could end tomorrow Astonishing numbers of people could lead lives of great happiness or unimaginable suffering or never live at all depending on what we choose to do today In What We Owe The Future philosopher William MacAskill argues for longtermism that idea that positively influencing the distant future is a key moral priority of our time From this perspective it is not enough to reverse climate change or avert the next pandemic We must ensure that civilization would rebound if it collapsed counter the end of moral progress and prepare for a planet where the smartest beings are digital not human If we make wise choices today our grandchildren's grandchildren will thrive knowing we did everything we could to give them a world full of justice hope and beauty
