From Political Economy to Anthropology Colin Adrien MacKinley Duncan, 1994 From Political Economy to Anthropology Colin Adrien MacKinley Duncan, David W. Tandy, 1994 This collection represents a better understanding of ancient people's attempts at situating economic life within society. Some of the topics covered include a social and economical analysis of ancient pre State Greece Athens in particular of the classical Maya the Maori women and slaves of rural India rural Kentucky and of pre industrial Japan Edited by Colin Duncan and David Tandy Volume Three of the Critical Perspectives on Historic Issues series. Scholars affected by Polanyi's ideas came together to present talks at international conferences and from those conferences arose this collection which represents a move toward a better understanding of the ancient people's attempts at situating economic life within particular societies. Some of the topics covered include a social and economical analysis of ancient pre State Greece Athens in particular of the classical Maya the Maori women and slaves of rural India rural Kentucky and of preindustrial Japan. Contributors include Walter Donlan Ian Morris John Adams Vernon Scarborough William Schaniel. The essays in this volume demonstrate the breadth of Polanyi's influence across many disciplines. Anthropology and Political Economy John Clammer, 1985 **Anthropologies and Histories** William Roseberry, 1989 Elegantly written essays Roseberry is the real gem an anthropologist with extensive Latin American field experience and an impressive scholarly grasp of the histories of anthropology and Marxist theory Micaela di Leonardo The Nation An extremely stimulating volume rich and provocative and codifies a new departure point Choice As a critic Roseberry writes with sustained force and clarity his principal points emerge with a directness that will make this book attractive to a

wide range of readers American Anthropologist Roseberry is among the most astute careful and theoretically cogent of the anthropologists of his generation This book illustrates well the breadth and coherence of his thinking and guides the reader through the complicated intersections of anthropology with history political economy Marxism and Latin American studies Jane Schneider CUNY In Anthropologies and Histories William Roseberry explores some of the cultural and political implications of an anthropological political economy In his view too few of these implications have been explored by authors who dismiss the very possibility of a political economic understanding of culture Within political economy readers are offered sophisticated treatments of uneven development but when authors turn to culture and politics they place contradictory social experiences within simplistic class or epochal labels Within cultural anthropology history is often little more than new terrain for extending anthropological practice Roseberry places culture and history in relation to each other in the context of a reflection on the political economy of uneven development In the first half of this book he looks at and critiques a variety of anthropological understandings of culture arguing for an approach that sees culture as socially constituted and socially constitutive Beginning with a commentary on Clifford Geertz's seminal essay on the Balinese cockfight Roseberry argues that Geertz and his followers pay insufficient attention to cultural differentiation to social and political inequalities that affect actors different understandings of the world other people and of themselves Sufficient attention to such questions Roseberry argues requires a concern for political economy In the second half of the book Roseberry explores the assumptions and practices of political economy indicates the kind of problems that should be central to such an approach and reviews some of the inadequacies of anthropological studies William Roseberry is a professor of anthropology at the New School for Social Research

The Anthropology of Development and Globalization Marc Edelman, Angelique Haugerud, 2005-01-14 The Anthropology of Development and Globalization is a collection of readings that provides an unprecedented overview of this field that ranges from the field's classical origins to today's debates about the magic of the free market Explores the foundations of the anthropology of development a field newly animated by theories of globalization and transnationalism Framed by an encyclopedic introduction that will prove indispensable to students and experts alike Includes readings ranging from Weber and Marx and Engels to contemporary works on the politics of development knowledge consumption environment gender international NGO networks the IMF campaigns to reform the World Bank the collapse of socialism and the limits of post developmentalism Fills a crucial gap in the literature by mingling historical cultural political and economic perspectives on development and globalization Present a wide range of theoretical approaches and topics *Beyond the New Economic Anthropology* J. Political Economy, Neoliberalism, and the Prehistoric Economies of Latin America Ty Matejowsky, Donald C. Wood, 2012-10-24 Continues on going presentation of highly engaging anthropological research This title contains a range of broad based and localized topics economic anthropologists that explore from various critical perspectives It addresses questions of how political economy is articulated through

processes of consumption production and evolution **Political Anthropology** Donald V Kurtz, 2018-02-13 The field of political anthropology is complicated by a breadth and depth of interests that include every kind of ethnographically and historically represented political community and nearly every kind of recorded political practice behavior and organization To make sense of this array of information political anthropologists examine political topics and issues in the context of research paradigms that include structural functionalism processualism political economy political evolution and arguably post modernism In Political Anthropology Donald V Kurtz examines how anthropologists think about politics political organizations and problems fundamental to political anthropology He explores the ideas with which they address universal political concerns the paradigms that direct political research by anthropologists and political topics of special interest

From Political Economy to Economics Dimitris Milonakis, Ben Fine, 2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection The authors show how economics was once rich diverse multidimensional and pluralistic and unravel the processes that lead to orthodoxy's current predicament The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists historians and other social scientists This has resulted in an impoverished historical and social content within mainstream economics The book ranges over the shifting role of the historical and the social in economic theory the shifting boundaries between the economic and the non economic all within a methodological context Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx the German and British historical schools American institutionalism Weber and Schumpeter and their programme of Social konomik and the Austrian school At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism Drawing on the rich traditions of the past the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future **Political Economy, Neoliberalism, and the Prehistoric Economies of Latin America** Ty Matejowsky, Donald C. Wood, 2012-10-24 Continues on going presentation of highly engaging anthropological research This

title contains a range of broad based and localized topics economic anthropologists that explore from various critical perspectives It addresses questions of how political economy is articulated through processes of consumption production and evolution **Beyond the New Economic Anthropology** John Clammer,1987-07-14 Culture, Economy, Power Winnie Lem,Belinda Leach,2002-04-04 Confronts major questions facing anthropology Marxist theory cultural studies feminism and history **A Tale of Two Capitalisms** Supritha Rajan,2023-11-29 An interdisciplinary examination of nineteenth century British capitalism its architects and its critics *Political Economy from Below* Rob Knowles,2017-07-05 Communitarian anarchism is a generic form of socialism that denies the need for a state or any other authority over the individual from above and which requires absolute belief that the individual cannot exist outside of a community of others This book suggests that the communitarian anarchists of the nineteenth century developed and articulated a distinct tradition of economic thought The period of this study begins with the first major writing of the French communitarian anarchist Pierre Joseph Proudhon in 1840 and ends with the temporary burial of anarchist theorizing at the beginning of the First World War in 1914 However he tradition of communitarian anarchist economic thought did not end in 1914 The economic thought explored in this book provides a fresh perception of the fragmentation evident in many societies today especially where there is a substantial informal economy **Elinor Ostrom and the Bloomington School of Political Economy** Daniel H. Cole,Michael D. McGinnis,2014-12-24 Elinor Lin Ostrom was awarded the 2009 Nobel Memorial Prize in Economic Sciences for her pathbreaking research on economic governance especially the commons but she also made important contributions to several other fields of political economy and public policy The range of topics she covered and the multiple methods she used might convey the mistaken impression that her body of work is disjointed and incoherent This four volume compendium of papers written by Lin alone or with various coauthors most notably including her husband and partner Vincent supplemented by others expanding on their work brings together the common strands of research that serve to tie her impressive oeuvre together That oeuvre together with Vincent s own impressive body of work has come to define a distinctive school of political economic thought the Bloomington School Each of the four volumes is organized around a central theme of Lin s work Volume 1 explores the roles played by the concept polycentricity in the disciplines of public administration political science and other forms of political economy Polycentricity denotes a complex system of governance in which public authorities citizens and private organizations work together to establish and enforce the rules that guide their behavior Itencapsulates an approach toward policy analysis that blurs standard disciplinary boundaries between the social sciences Throughout their long and remarkably productive careers Elinor and Vincent Ostrom never tired of reminding us of the capacity of ordinary humans to transcend their own limitations by engaging with others in the myriad forms of collective action required to build and sustain a self governing society Their careers stand as exemplars of the proper relationship between rigorous scholarship and responsible citizenship **A Handbook of Economic Anthropology** Carrier, James G.,2022-05-13 This
