From Revolution To Reform A Comparative Study Of China And Mexico:

From Revolution to Reform He Li, 2004 In *From Revolution to Reform* He Li examines political and economic transformation in China and Mexico from the Mexican and Chinese revolutions at the beginning of the 20th century to economic reforms and political liberalization in recent decades Li also explores lessons that other developing countries could learn from the experiences of China and Mexico

A History of the Modern Chinese Army Xiaobing Li, 2007-06-01 Since the establishment of the Red Army in 1927 China's military has responded to profound changes in Chinese society particularly its domestic politics shifting economy and evolving threat perceptions Recently tensions between China and Taiwan and other east Asian nations have aroused great interest in the extraordinary transformation and new capabilities of the Chinese army In *A History of the Modern Chinese Army* Xiaobing Li a former member of the People's Liberation Army PLA provides a comprehensive examination of the PLA from the Cold War to the beginning of the twenty first century that highlights the military's central function in modern Chinese society In the 1940s the Chinese army was in its infancy and many soldiers were rural conscripts and volunteers who had received little formal schooling The Chinese military rapidly increased its mobility and weapon strength and the Korean War and Cold War offered intense combat experience that not only allowed soldiers to hone their fighting techniques but also helped China to develop military tactics tailored to the surrounding countries whose armies posed the most immediate threats Yet even in the 1970s the completion of a middle school education nine years was considered above average and only 4 percent of the 224 top Chinese generals had any college credit hours However in 1995 the high command began to institute massive reforms to transform the PLA from a labor intensive force into a technology intensive army Continually seeking more urban conscripts and emphasizing higher education the PLA Reserve Officer Training and Selection program recruited students from across the nation These reservists would become commissioned officers upon graduation and they majored in atomic physics computer science and electrical engineering Grounding the text in previously unreleased official Chinese government and military records as well as the personal testimonies of more than two hundred PLA soldiers Li charts the development of China's armed forces against the backdrop of Chinese society cultural traditions political history and recent technological advancements *A History of the Modern Chinese Army* links China's military modernization to the country's growing international and economic power and provides a unique perspective on China's establishment and maintenance of one of the world's most advanced military forces

Market Economics and Political Change Juan D. Lindau,2000-01-01 Does market liberalization promote democracy The accepted answer from scholars pundits and politicians alike has been yes However the contributors to this innovative study of market reforms and political change in Mexico and the People's Republic of China argue that this easy equation is not only empirically uncertain but methodologically flawed Using comparative contextual analysis the contributors carefully identify the elective affinities between these two very different polities to reveal key variables that determine how markets will affect democracy particularly law as the rudder of democracy and the role of political culture in civil society

Politics in China William A. Joseph,2019 On October 1 2019 the People s Republic of China PRC will celebrate the 70th anniversary of its founding And what an eventful and tumultuous seven decades it has been During that time under the leadership of the Chinese Communist Party CCP China has been transformed from one of world s poorest countries into one of its fastest growing economies and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence But in the late 1950s the PRC experienced the most deadly famine in human history caused largely by the actions and inactions of its leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy And in 1989 the CCP unleashed the army to brutally crush demonstrations by students and others calling for political reform China is now for the most part peaceful prospering and proud The CCP maintains a firm grip on power through a combination of harsh repression and popular support largely based on its recent record of promoting rapid economic growth Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities ethnic unrest and a rising tide of social protest Politics in China provides an accessible yet authoritative introduction to how the world s most populous nation and rapidly rising global power is governed today The third edition has been extensively revised thoroughly updated and includes a new chapter on the internet and politics in China The book s chapters provide overviews of major periods in China s modern political history from the mid nineteenth century to the present examinations of key topics in contemporary Chinese politics and analyses of developments in four important areas located on China s geographic periphery Tibet Xinjiang Hong Kong and Taiwan

Waking the Dictator Karl B. Koth,2002 Waking the Dictator is a study of federalism in late nineteenth century Veracruz State It is also a politico military analysis and an evaluation of social revolutionary relations in the epoch of the Porfiriato and

the Mexican Revolution This study is the first modern comprehensive and analytical history of the Porfiriato and Mexican Revolution in Veracruz The Politics of Developmentalism in Mexico, Taiwan and South Korea J. Minns,2006-01-10 Minns argues that the industrial transformations of Mexico South Korea and Taiwan were based on the existence of powerful developmentalist states in each It explores the origins of such states and their dynamics and connects the form of autonomy they enjoy within their countries to the policies they pursue **Greater China in an Era of Globalization** Sujian Guo,Baogang Guo,2010-01-01 China s growth in the past few decades has been unprecedented and continues to stay strong as it expands its influence around the globe However in many ways the once insular China is still looking to find its footing as an international player in the globalization game Greater China in an Era of Globalization looks at the success of China and its surrounding territories of Taiwan Hong Kong and Macau and asks the question What is Chinese globalization The contributors in this volume look to answer this question by examining China s role both in its immediate sphere of influence and in the greater world In doing so the contributors argue that its push to globalize has had as much effect on the country itself both politically and culturally as it has had on the world The contributors further the argument by analyzing China s influence on the rising nations in Africa and Latin America before ending the book with a comparative analysis between it and the historic rise and fall of influence of its European counterparts Transition to Egalitarian Development Keith Griffin,Jeffrey James,1981-06-18
