From Rugs To Riches Housework Consumption And Modernity In Germany:

From Rugs to Riches Jennifer Ann Loehlin, 1999-12 How do technological and cultural developments interact to affect consumption What do ways of using household goods in specific historical contexts tell us about individual and collective identities Do changes in consumption patterns emancipate social groups or reinforce existing structures of power The economic miracle experienced by West Germany in the 1950s and 1960s had profound effects on everyday life and gender relations This book reflects the growing need for historical research on leisure and consumption in the modern period and provides a very entertaining and carefully researched study of ideas about women men housework consumption and modernity It contrasts the virtual reality presented by advertisements with the important qualitative changes in household appliances and how they affected everyday life and gender roles New products claimed to make housework easier but the idea of substituting money for labor contrasted with the ideal of the thrifty hard working housewife and a clear division of gender roles The author examines a broad range of issues encompassing the transformation of household appliances from luxuries to necessities the threat of consumer debt men and housework women and technology and labor and leisure in the modern household This timely book represents a significant contribution to the following areas material culture German history women s history sociology media cultural studies and anthropology *The Making of European Consumption* P. Lundin, T. Kaiserfeld, 2015-01-26

American ideals and models feature prominently in the master narrative of post war European consumer societies This book demonstrates that Europeans did not appropriate a homogenous notion of America rather post war European consumption was a process of selective appropriation of American elements **Gendering**

Modern German History Karen Hagemann, Jean H. Quataert, 2007-08-01 Writing on the history of German women has like women s history elsewhere undergone remarkable expansion and change since it began in the late 1960s Today Women s history still continues to flourish alongside gender history but the focus of research has increasingly shifted from women to gender This shift has made it possible to make men and masculinity objects of historical research too After more than thirty years of research it is time for a critical stocktaking of the gendering of the historiography on nineteenth and twentieth century Germany To provide a critical overview in a comparative German American perspective is the main aim of this volume which brings together leading experts from both sides of the Atlantic They discuss in their essays the state of historiography and reflect on problems of theory and methodology Through compelling case studies focusing on the nation and nationalism military and war colonialism politics and protest class and citizenship religion Jewish and non Jewish Germans the Holocaust the body and sexuality and the family this volume demonstrates the extraordinary power of the gender perspective to challenge existing interpretations and rewrite mainstream arguments *Reading Germany* Gideon Reuveni, 2006 By closely examining the interaction between intellectual and material culture in the period before the Nazis came to power in Germany the author comes to the conclusion that contrary to widely held assumptions consumer culture in

the Weimar period far from undermining reading used reading culture to enhance its goods and values Reading material was marked as a consumer good while reading as an activity raising expectations as it did influenced consumer culture Consequently consumption contributed to the diffusion of reading culture while at the same time a popular reading culture strengthened consumption and its values Gideon Reuveni is Director of the Centre for German Jewish Studies at the University of Sussex He is the co editor of The Economy in Jewish History Berghahn 2010 and several other books on different aspects of Jewish history Presently he is working on a book on consumer culture and the making of Jewish identity in Europe

The Authority of Everyday Objects Paul Betts, 2007-12-07 Paul Betts first came to my attention through his pioneering article on the post 1945 Bauhaus myth as a joint German American venture This book is a landmark study of cultural continuities and ruptures institutional realignments and individual careers that introduces a breath of fresh air into a field of research long staled by received ideas It demonstrates the rewards of approaching the years from 1933 to 1945 as a revealing window onto the subsequent history of West Germany Wolfgang Schivelbusch The Authority of Everyday Objects is a small gem of the new cultural history This is a work of striking originality and insight that fits the development of industrial design in postwar Germany into the country s broader social cultural and political history constructing an analytical narrative that carries from the Third Reich into the Cold War It illuminates not merely cultural transformation but the wider social history of twentieth century Germany Stanley G Payne author of A History of Fascism 1914 1945 The Authority of Everyday Objects is a refreshing innovative and convincing approach to post World War II Western consumer society Design as a weapon in Cold War competition and as a vehicle for German redemption by revitalizing Bauhaus traditions is thoroughly researched and wonderfully presented in Paul Betts book This well illustrated work convinces the reader that design was a part of *gluecklich Leben* lucky life and *schoen wohnen* beautiful living and a factor in the politicization of material culture Ivan T Berend author of Decades of Crisis Central and Eastern Europe before World War II and History Derailed Central and Eastern Europe in the Long Nineteenth Century

Americanization and Anti-americanism Alexander Stephan, 2007-08-01 The ongoing discussions about

globalization American hegemony and September 11 and its aftermath have moved the debate about the export of American culture and cultural anti Americanism to center stage of world politics At such a time it is crucial to understand the process of culture transfer and its effects on local societies and their attitudes toward the United States This volume presents Germany as a case study of the impact of American culture throughout a period characterized by a totalitarian system two unusually destructive wars massive ethnic cleansing and economic disaster Drawing on examples from history culture studies film radio and the arts the authors explore the political and cultural parameters of Americanization and anti Americanism as reflected in the reception and rejection of American popular culture and more generally in European American relations in the American Century

Cold War Kitchen Ruth Oldenziel, Karin Zachmann, 2011-01-21 The kitchen as political symbol and material reality in the cold war years Richard Nixon and Nikita Khrushchev's famous kitchen debate in 1958 involved more than the virtues of American appliances Both Nixon and Khrushchev recognized the political symbolism of the modern kitchen the kind of technological innovation represented in this everyday context spoke to the political system that produced it The kitchen connects the big politics of politicians and statesmen to the small politics of users and interest groups *Cold War Kitchen* looks at the kitchen as material object and symbol considering the politics and the practices of one of the most famous technological icons of the twentieth century Defining the kitchen as a complex technological artifact as important as computers cars and nuclear missiles the book examines the ways in which a range of social actors in Europe shaped the kitchen as both ideological construct and material practice These actors from manufacturers and modernist architects to housing reformers and feminists constructed and domesticated the technological innovations of the postwar kitchen The home became a mediation junction in which women users and others felt free to advise producers from the consumer's point of view In essays illustrated by striking period photographs the contributors to *Cold War Kitchen* consider such topics as Soviet consumers ambivalent responses to the American dream kitchen argued over by Nixon and Khrushchev the Frankfurter Küche a European modernist kitchen of the interwar period and its export to Turkey when its designer fled the Nazis and the British state subsidized kitchen design so innovative that it was mistaken for a luxury American product The concluding essays challenge the received wisdom of past interpretations of the kitchen debate

Women and Mass Consumer Society in Postwar France Rebecca J. Pulju, 2011-02-14 *Women and Mass Consumer Society in Postwar France* examines the emergence of a citizen consumer role for women during postwar modernization and reconstruction in France integrating the history of economic modernization with that of women and the family This role both celebrated the power of the woman consumer and created a gendered form of citizenship that did not disrupt the sexual hierarchy of home polity and marketplace Redefining needs and renegotiating concepts of taste value and thrift women and their families drove mass consumer society through their demands and purchases at the same time that their very need to consume came to define them

Irresistible Empire Victoria De Grazia, 2009-07 The most significant conquest of the twentieth century may well have been the triumph of American consumer society over Europe's bourgeois civilization It is this little understood but world-shaking campaign that unfolds in de Grazia's account of how the American standard of living defeated the European way of life and achieved the global cultural hegemony that is both its great strength and its key weakness today Tracing the peculiar alliance that arrayed New World salesmanship statecraft and standardized goods against the Old World's values of status craft and good taste de Grazia describes how all alternative strategies fell before America's consumer-oriented capitalism first the bourgeois lifestyle then the Third Reich's command consumption and finally the grand experiment of Soviet-style socialist planning From publisher description

Trams or Tailfins? Jan L. Logemann, 2012-11-28 In the years that followed World War II both the United States and the newly formed West German republic had an opportunity to remake their economies Since then much has been made of a supposed Americanization of European consumer societies in Germany and elsewhere Arguing against these foggy notions Jan L. Logemann takes a comparative look at the development of postwar mass consumption in West Germany and the United States and the emergence of discrete consumer modernities In *Trams or Tailfins* Logemann explains how the decisions made at this crucial time helped to define both of these economic superpowers in the second half of the twentieth century While Americans splurged on private cars and bought goods on credit in suburban shopping malls Germans rebuilt public transit and developed pedestrian shopping streets in their city centers choices that continue to shape the quality and character of life decades later Outlining the abundant differences in the structures of consumer society consumer habits and the role of public consumption in these countries Logemann reveals the many subtle ways that the spheres of government society and physical space define how we live

Transformations of Retailing in Europe after 1945 Lydia Langer, 2016-02-17 After World War II structures practices and the culture of retailing in most West European countries went through a period of rapid change The post-war economic boom the emergence of a mass consumer society and the adaptation of innovations

which already had been implemented in the USA during the interwar period revolutionized the world of getting and spending. But the implementation of self service and the supermarket, the spread of the department store and the mail order business were not only elements of a transatlantic catch up process of Americanization of retailing. National patterns of the retail trade and specific cultures of consumption remained crucial and long term processes of change starting in the 1920s or 1930s also had an impact on the transformation of retailing in post war Europe. This volume presents a series of case studies looking at transformations of retailing in several European countries offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing.

Consuming Germany in the Cold War David F. Crew, 2003-09-01 Sitting in the ruins of the Third Reich most Germans wanted to know which of the two post war German states would erase the material traces of their wartime suffering most quickly and most thoroughly. Consumption and the quality of everyday life quickly became important battlefields upon which the East West conflict would be fought. This book focuses on the competing types of consumer societies that developed over time in the two Germanies and the legacy each left. Consuming Germany in the Cold War assesses why East Germany increasingly fell behind in this competition and how the failure to create a viable socialist consumer society in the East helped lead to the fall of the Berlin Wall in 1989. By the 1970s East Germans were well aware that the regime's bombastic promises that the GDR would soon overtake the West had become increasingly hollow. For most East German citizens West German consumer society set the standards that East Germany repeatedly failed to meet. By exploring the ways in which East and West Germany have functioned as each other's other since 1949 this book suggests some of the possibilities for a new narrative of post war German history. While taking into account the very different paths pursued by East and West Germany since 1949 the contributors demonstrate the importance of competition and highlight the connections between the two German successor states as well as the ways in which these relationships changed throughout the period. By understanding the legacy that forty plus years of rivalry established we can gain a better understanding of the current tensions between the eastern and western regions of a united Germany.
