From Self To Self:

The Oxford Handbook of Critical Improvisation Studies George Lewis, Benjamin Piekut, 2016 V 1 Cognitions v 2
Critical theories Hidden Self-Harm Maggie Turp, 2002-11-10 The book takes a new look at self harm focusing particularly on the under explored area of hidden self harming behaviour These behaviours may not be immediately identifiable as self harm by counsellors therapists or their clients but Turp shows how recognition and understanding of hidden self harm can improve practice with those affected **Where are you? Self- and body part localization using virtual reality setups** Albert van der Veer , 2019-09-19 This volume presents a line of original experimental studies on the bodily self investigating where people locate themselves in their bodies and how accurate they are at localizing their body parts So far it was not well known whether people locate themselves in one or more specific regions of their bodies On the other hand some systematic distortions in indicating bodily locations were already documented In the present studies participants were therefore asked to indicate their self locations as well as the locations of several of their body parts using a self directed first person perspective pointing paradigm in various virtual reality VR setups different head mounted displays and a large screen immersive display Overall participants were found to locate themselves mainly in the upper face and the upper torso However striking differences in self localization were found when testing in different VR setups Upon further investigation these differences were found to be foremost due to inaccuracies in body part localization When taking these inaccuracies into account differences between setups and also with self localization outside of VR largely disappear Another striking finding was that providing participants in between pointing phases with information about their bodies in the form of a real time animated self avatar did not make them more accurate at locating their own body parts While manipulating their viewpoint to chest height of their self avatar did shift the afterwards indicated locations of their own body parts upwards towards where they were seen on the avatar Potential explanations for the various new findings also from tasks outside of VR are discussed Taken together this volume suggests a differential involvement of multi sensory information processing in experienced self location within the body and the ability to locate body parts Self localization seems to be less flexible possibly because it is strongly grounded in the bodily senses while body part localization appears more adaptable to the manipulation of sensory stimuli at least in the visual modality *Psychoanalysis and Projective Methods in Personality Assessment* Benoît Verdon, Catherine Azoulay, 2019-10-15 This unique book synthesizes the work of leading thinkers of the French School of psychoanalytical projective methods in personality assessment The French School is a direct successor to Rorschach s and Murray s original approaches using the Rorschach Test and the Thematic Apperception Test TAT Underlying this method is the idea of the coexistence of conscious and unconscious processes of opposite instinctual pairs and of agents that are ruled by conflicts Freud Transitional activity is seen as part of an intermediate space a mediator space and bearer of messages between the subject and the clinician Winnicott This book brings to life the important contributions of the French School

firstly exploring its theories and methods and then its clinical applications Detailed case studies from different stages of life examine the psychopathology of everyday life with its severe and disabling states of suffering Contemporary advances in research and clinical work are presented and the groundbreaking early work of Nina Rausch de Traubenberg Vica Shentoub and Rosine Debray are also critically reread and discussed Clinical tools adapted for clinicians and researchers in the appendices include a useful schema to facilitate the interpretation of the Rorschach and TAT together a list of latent solicitations for the TAT and the current version of the TAT Scoring Grid This book is essential reading for clinical psychologists psychiatrists psychotherapists researchers and students interested in applying psychoanalytical theory to projective methods The middle works John Dewey,1976 Social Security Rulings on Federal Old-age, Survivors, Disability and Health Insurance Benefits United States.
