Plato's Cave Allegory and Zeno's Arrow Paradox have been related to film exhibition and projection since the early days of cinema. The book additionally demonstrates the extensive influence of antiquity on an age dominated by moving image media as with stagings of Odysseus' arrow shot through twelve axes or depictions of the Golden Fleece. Chapters interpret numerous European and American silent and sound films and some television productions and digital videos. *Exploration of Space, Technology, and Spatiality: Interdisciplinary Perspectives* Turner, Phil, Turner, Susan, Davenport, Elisabeth, 2008-09-30. Provided by the publisher. [A Bibliography on Writing and Written Language](#) Konrad Ehlich, Florian Coulmas, Gabriele Graefen, 2011-06-01. The bibliography offers information on research about writing and written language over the past 50 years. No comprehensive bibliography on this subject has been published since Sattler's 1935 handbook. With a selection of some 27,500 titles, it covers the most important literature in all scientific fields relating to writing. Emphasis has been placed on the interdisciplinary organization of the bibliography, creating many points of common interest for literacy experts, educationalists, psychologists, sociologists, linguists, cultural anthropologists, and historians. The bibliography is organized in such a way as to provide the specialist as well as the researcher in neighboring disciplines with access to the relevant literature on writing in a given field. While necessarily selective, it also offers information on more specialized bibliographies. In addition, an overview of norms and standards concerning script and writing will prove very useful for non-professional readers. It is therefore also of interest to the generally interested public as a reference work for the humanities. **Essays on Linguistic Themes** Yakov Malkiel, **The Retail Bookseller**, 1949. [Unflattening](#) Nick Sousanis, 2015-04-20. The primacy of words over images has deep roots in Western culture. But what if the two are inextricably linked, equal partners in meaning-making? Written and drawn entirely as comics, *Unflattening* is an experiment in visual thinking. Nick Sousanis defies conventional forms of scholarly discourse to offer readers both a stunning work of graphic art and a serious inquiry into the ways humans construct knowledge. *Unflattening* is an insurrection against the fixed viewpoint. Weaving together diverse ways of seeing, drawn from science, philosophy, art, literature, and mythology, it uses the collage-like capacity of comics to show that perception is always an active process of incorporating and reevaluating different vantage points. While its vibrant, constantly morphing images occasionally serve as illustrations of text, they more often connect in nonlinear fashion to other visual references throughout the book. They become allusions, allegories, and motifs pitting realism against abstraction and making us aware that more meets the eye than is presented on the page. In its graphic innovations and restless shape-shifting, *Unflattening* is meant to counteract the type of narrow, rigid thinking that Sousanis calls flatness. Just as the two-dimensional inhabitants of Edwin A. Abbott's novella *Flatland* could not fathom the concept of upwards, Sousanis says we are often unable to see past the boundaries of our current frame of mind. Fusing words and images to produce new forms of knowledge, *Unflattening* teaches

us how to access modes of understanding beyond what we normally apprehend
