From the COLT's mouth ... and others', 2016-08-29 From the contents Jan Aarts Does corpus linguistics exist some old and new issues Karin Aijmer and Bengt Altenberg Zero translations and cross linguistic equivalence Evidence from the English Swedish Parallel Corpus Gisle Andersen Corpora and the double copula Pieter de Haan The non nominal character of spoken English Eli Marie Drange Teenage slang in Norway Angela Hasselgren Sounds a bit foreign *Discourse Markers in Native and Non-native English Discourse* Simone Müller, 2005-11-24 While discourse markers have been examined in some detail little is known about their usage by non native speakers This book provides valuable insights into the functions of four discourse markers so well you know and like in native and non native English discourse adding to both discourse marker literature and to studies in the pragmatics of learner language It presents a thorough analysis on the basis of a substantial parallel corpus of spoken language In this corpus American students who are native speakers of English and German non native speakers of English retell and discuss a silent movie Each of the main chapters of the book is dedicated to one discourse marker giving a detailed analysis of the functions this discourse marker fulfills in the corpus and a quantitative comparison between the two speaker groups The book also develops a two level model of discourse marker functions comprising a textual and an interactional level **Advances in Corpus-Based Contrastive Linguistics** Karin

Aijmer, Bengt Altenberg, 2013 Contrastive studies have experienced a dramatic revival in the last decades By combining the methodological advantages of computer corpus linguistics and the possibility of contrasting texts in two or more languages the structure and use of languages can be explored with greater accuracy detail and empirical strength than before The approach has also proved to have fruitful practical applications in a number of areas such as language teaching lexicography translation studies and computer aided translation This volume contains twelve studies comparing linguistic phenomena in English and seven other languages The topics range from comparisons of specific lexical categories and word combinations to syntactic constructions and discourse phenomena such as cohesion and thematic structure The studies highlight similarities and differences in the use semantics and functions of the compared items as well as the emergence of new meanings and language change The emphasis varies from purely linguistic studies to those focusing on practical applications

Corpus Linguistics. Volume 1 Anke Lüdeling, Merja Kytö, 2008-12-10 This volume provides an up to date survey of the field of corpus linguistics a field whose methodology has revolutionized much of the empirical work done in most fields of linguistic study over the past decade Corpus linguistics investigates human language by starting out from large collections of texts spoken written or recorded These language corpora which are now regularly available in electronic form are the basis for quantitative and qualitative research on almost any question of linguistic interest Many techniques that are in use in corpus linguistics today are rooted in the tradition of the late 18th and 19th century when linguistics began to make use of mathematical and empirical methods Modern corpus linguistics has used and developed these methods in close connection

with computer science and computational linguistics The handbook sketches the history of corpus linguistics shows its potential discusses its problems and describes various methods of collecting annotating and searching corpora as well as processing corpus data It also reports case studies that illustrate the wide range of linguistic research questions addressed in corpus linguistics The over 60 articles included in the handbook are divided into five sections 1 the origins and history of corpus linguistics and surveys of its relationship to central fields of linguistics 2 corpus compilation 3 corpus types 4 preprocessing of corpora 5 the use and exploitation of corpora The final section gives an overview of the results of corpus studies obtained in phonetics phonology morphology syntax semantics sociolinguistics historical linguistics stylometry dialectology and discourse analysis It also reports on recent advances made in human and machine translation contrastive studies computer assisted language learning and automatic summarization The contributors to the volume are internationally known experts in their respective fields The handbook is intended for a wide audience ranging from teachers university students and scholars to anyone interested in the use of computers in linguistic analyses and applications Subordination

in English Elena Seoane, Carlos Acuña-Fariña, Ignacio Palacios-Martínez, 2018-07-09 This book provides a collection of articles on subordination in English framed from both a synchronic and a diachronic perspective It covers ample areas of the history of the major subordinated structures of English and their recent development in various native and non native varieties Most contributions are based on large electronic databases and corpora of written and spoken texts The book focuses on the continuum that links subordinated and coordinated structures in a fluid way shows their permanent state of flux and sheds light on the whole system's dynamic essence by discussing a large number of explanatory principles at work in shaping it Many of these are well known from the grammaticalization and the Construction Grammar theories such as the concepts of attractor multi sourcing inheritance categorial incursion metaphorization or exaptation This volume represents the latest trends in the field by some of its most prestigious specialists *New Approaches to Contrastive Linguistics* Renata

Enghels, Bart Defrancq, Marlies Jansegers, 2020-07-20 The practice of comparing languages has a long tradition characterized by a cyclic pattern of interest Its meeting with corpus linguistics in the 1990s has led to a new sub discipline of corpus based contrastive studies The present volume tackles two main challenges that had not yet been fully addressed in the literature namely an empirical assessment of the nature of the data commonly used in cross linguistic studies e g translation data versus comparable data and the development of advanced methods and statistical techniques suitably adapted to contrastive research settings The papers collected in this volume endeavour to find out what new types of data are most useful for what kind of contrastive questions and which advanced statistical techniques are most suited to deal with the multidimensionality of contrastive research questions Answers to these questions are provided through the contrastive analysis of various language pairs or groups and a wide variety of phenomena situated at almost all linguistic levels In sum this book provides an update on new methodological and theoretical insights in empirical contrastive linguistics and will stimulate further research

within this field Contrastive Analysis of Discourse-pragmatic Aspects of Linguistic Genres Karin Aijmer, Diana Lewis, 2017-03-29 This volume will give readers insight into how genres are characterised by the patterns of frequency and distribution of linguistic features across a number of European languages The material presented in this book will also stimulate further corpus based contrastive research including more languages more genres and different types of corpora This is the first special issue of the Yearbook of Corpus Linguistics and Pragmatics a publication that addresses the interface between the two disciplines and offers a platform to scholars who combine both methodologies to present rigorous and interdisciplinary findings about language in real use Corpus linguistics and Pragmatics have traditionally represented two paths of scientific thought parallel but often mutually exclusive and excluding Corpus Linguistics can offer a meticulous methodology based on mathematics and statistics while Pragmatics is characterized by its effort in the interpretation of intended meaning in real language **The Changing Face of Corpus Linguistics** Antoinette Renouf, Andrew Kehoe, 2006 This volume is witness to a spirited and fruitful period in the evolution of corpus linguistics In twenty two articles written by established corpus linguists members of the ICAME International Computer Archive of Modern and Mediaeval English association this new volume brings the reader up to date with the cycle of activities which make up this field of study as it is today dealing with corpus creation language varieties diachronic corpus study from the past to present present day synchronic corpus study the web as corpus and corpus linguistics and grammatical theory It thus serves as a valuable guide to the state of the art for linguistic researchers teachers and language learners of all persuasions After over twenty years of evolution corpus linguistics has matured incorporating nowadays not just small medium and large primary corpus building but also specialised and multi dimensional secondary corpus building not just corpus analysis but also corpus evaluation not just an initial application of theory but self reflection and a new concern with theory in the light of experience The volume also highlights the growing emphasis on language as a changing phenomenon both in terms of established historical study and the newer short range diachronic study of 20th century and current English and the growing area of overlap between these two Another section of the volume illustrates the recent changes in the definition of corpus which have come about due to the emergence of new technologies and in particular of the availability of texts on the world wide web The volume culminates in the contributions by a group of corpus grammarians to a timely and novel discussion panel on the relationship between corpus linguistics and grammatical theory **Corpus linguistics on the move** María José López-Couso, Belén Méndez-Naya, Paloma Núñez-Pertejo, Ignacio M. Palacios-Martínez, 2016-07-11 Honoured with the 2017 AESLA Research Award of the Spanish Association of Applied Linguistics Corpus linguistics on the move Exploring and understanding English through corpora comprises fourteen contributions by leading scholars in the field of English corpus linguistics covering areas of central concern in corpus research and corpus methodology The topics examined in the different chapters include issues related to corpus compilation and annotation perspectives from specialized corpora and studies on grammatical and

pragmatic aspects of English all these examined through a broad range of corpora both synchronic and diachronic representing both EFL and different native varieties of English worldwide The volume will be of primary interest to students and researchers working on English corpus linguistics but is also likely to have a wider general appeal Contributors are Bas Aarts Si n Alsop Anita Auer Jill Bowie Eduardo Coto Villalibre Pieter de Haan Johan Elsness Moragh Gordon Hilde Hasselg rd Turo Hiltunen Magnus Huber Marianne Hundt Mikko Laitinen Martti M kinen Beatriz Mato M guez Mike Olson Antoinette Renouf and Bianca Widlitzki

English Ditransitive Verbs Joybrato Mukherjee, 2016-08-29 The present book offers fresh insights into the description of ditransitive verbs and their complementation in present day English In the theory oriented first part a pluralist framework is developed on the basis of previous research that integrates ditransitive verbs as lexical items with both the entirety of their complementation patterns and the cognitive and semantic aspects of ditransitivity This approach is combined with modern corpus linguistic methodology in the present study which draws on an exhaustive semi automatic analysis of all patterns of ditransitive verbs in the British component of the International Corpus of English ICE GB and also takes into account selected data from the British National Corpus BNC In the second part of the study the complementation of ditransitive verbs e g give send is analysed quantitatively and qualitatively Special emphasis is placed here on the identification of significant principles of pattern selection i e factors that lead language users to prefer specific patterns over other patterns in given contexts e g weight focus pattern flow in text lexical constraints In the last part some general aspects of a network like usage based model of ditransitive verbs their patterns and the relevant principles of pattern selection are sketched out thus bridging the gap between the performance related description of language use and a competence related model of language cognition

Corpora, Grammar and Discourse Nicholas Groom, Maggie Charles, Suganthi John, 2015-10-15 Corpus linguistics has had a revolutionary impact on grammar and discourse research Not only has it opened up entirely new theoretical perspectives and methodological possibilities for both fields but it has also to a considerable extent erased the boundaries that have traditionally been drawn between them This book showcases a variety of current corpus based approaches to the study of grammar and discourse and makes a case for seeing grammar and discourse as fundamentally interrelated phenomena The book features contributions from leading experts in cognitive linguistics construction grammar critical discourse studies genre and register analysis phraseology language learning and teaching languages for specific purposes second language acquisition sociolinguistics systemic functional linguistics and text linguistics An essential reference point for future research

Corpora Grammar and Discourse has been edited in honour of Susan Hunston whose own work has consistently pushed at the boundaries of corpus based research on grammar and discourse for over three decades

Translanguaging and the Bilingual Brain Nina Dumrukcic, 2022-04-19 Multilingual classrooms and online communication are becoming increasingly linguistically diverse due to globalization and new discourse

patterns are emerging Many of these patterns include the use of linguistic resources from multiple languages in the same utterance Translanguaging a recent theoretical framework is gaining prominence among scholars interested in studying these multilingual discursive practices and the concept of a unitary language system for lexical processing The aim of this book is to gain a better understanding of the bilingual brain and how words and sentences that use features from socially distinct languages are processed Using examples provided by multilingual study participants a categorization of the various forms of translanguaging is developed to build a translanguaging model Psycholinguistic methods such as eye tracking are combined with conventional sociolinguistic survey methodology to provide rich qualitative and quantitative data that address the cognitive effects of translanguaging and the underlying structure of translingual word formations This monograph shows how language biography exposure and attitude towards multilingual discursive practices all affect cognitive processing It also demonstrates how multilingual speakers are setting the patterns for novel word formations to be produced thus having a social cultural and cognitive impact on how we communicate
