Technological Change Govindan Parayil, 2002 Technological change has been rightfully identified as the single most important factor for improving material well being Yet despite its centrality in our lives we seem to know very little about technology and how it develops and changes both spatially and temporally In this original and thoughtful book Govindan Parayil draws together current scholarship from disciplines ranging from history to economics to sociology as he develops a cohesive theory of technological change Drawing on a detailed case study of the Green Revolution in Indian agriculture Parayil convincingly argues that technological change is contingent upon the social historical process of knowledge change Thus he explores the policy implications of analyzing technological change as a problem solving activity An innovative contribution to the literature on technological change this ambitious book will also be valuable for those interested in such practical applications as understanding the process of technology transfer

An Introduction to the Sociology of Work and Occupations Rudi Volti, 2011-10-11 In 15 chapters Rudi Volti succinctly but comprehensively covers the changes in the world of work encompassing everything from gathering and hunting to working in today's Information Age

The Evolution of Technology George Basalla, 1989-02-24 This book presents an evolutionary theory of technological change based upon recent scholarship in the history of technology and upon relevant material drawn from economic history and anthropology It challenges the popular notion that technology advances by the efforts of a few heroic individuals who produce a series of revolutionary inventions owing little or nothing to the technological past Therefore the book's argument is shaped by analogies taken selectively from the theory of organic evolution and not from the theory and practice of political revolution Three themes appear and reappear with variations throughout the study The first is diversity an acknowledgment of the vast numbers of different kinds of made things artifacts that have long been available to humanity the second is necessity the belief that humans are driven to invent new artifacts in order to meet basic biological requirements such as food shelter and defense and the third is technological evolution an organic analogy that explains both the emergence of novel artifacts and their subsequent selection by society for incorporation into its material life without invoking either biological necessity or technological progress Although the book is not intended to provide a strict chronological account of the development of technology historical examples including many of the major achievements of Western technology the waterwheel the printing press the steam engine automobiles and trucks and the transistor are used extensively to support its theoretical framework The Evolution of Technology will be of interest to all readers seeking to learn how and why technology changes including both students and specialists in the history of technology and science

Reframing Human Endeavors Bagoes Wiryomartono, 2023-04-21 This ambitious text is a monograph about human experiences concerning the potentialities capacities and features of humankind from the wholeness

of the collective mind body spirit The purpose in reframing human endeavors is for enhanced alignment for livability and sustainability This book departs from the concept and practice of design and technology and argues that most crises that endanger and destruct our ecological livability and sustainability come from our way of thinking and doing with design and technology based on the necessity for control It is the control for overcoming the fear of scarcity starvation and the unknown This book is rather an attempt to find alternate way of decision making thru holistic methods It appeals to researchers working in design sustainability architecture and urban studies **A Bibliography of Museum Studies** Simon J.

Knell,2016-12-05 A comprehensive bibliographic reference for students and others wishing to investigate the contemporary literature on museums and collections The references are systematically arranged into sections including collections management communication and exhibitions museum education material culture the museums profession and museum management Compiled from the research and teaching materials of the Department of Museum Studies at the University of Leicester it provides an essential resource for anyone studying or working in museums Containing more than 4 000 references this new bibliography provides ready access to the literature whether you are developing a disaster plan or visitor survey or studying the history of museum education

Nukak Gustavo Politis,2016-09-17 From Gustavo Politis one of the most renowned South American archaeologists comes the first in depth study in English of the last undiscovered people of the Amazon His work is groundbreaking and urgent both because of encroaching guerrilla violence that makes Nukak existence perilously fragile and because his work with the Nukak represented one of the last opportunities to conduct research with hunter gatherers using contemporary methodological and the theoretical tools Through a rich and comprehensive ethno archaeological portrait of material culture in the making this work makes methodological and conceptual advances in the interpretation of hunter gather societies Politis s conclusions based on six years of original research and on comparative analysis are integrative and contribute to the identification of the multiple factors involved in the formation of hunter gatherer archaeological assemblages **Zooarchaeology** Elizabeth J. Reitz,Elizabeth S.

Wing,1999-02-04 Zooarchaeology is a detailed reference manual for students and professional archaeologists interested in identifying and analysing animal remains from archaeological sites Drawing on material from all over the world and covering a time span from the Pleistocene to the nineteenth century AD the emphasis is on animals whose remains inform us about many aspects of the relationships between humans and their natural and social environments especially site formation processes subsistence strategies and paleoenvironments The authors discuss suitable methods and theories for all vertebrate classes and molluscs and include hypothetical examples to demonstrate these There are extensive references and illustrations to help in the process of identification **Material Culture** Victor Buchli,2004 Publisher description

Evidence-Based Inquiries in Ethno-STEM Research Iman C Chahine,Josef de Beer,2021-01-01 The purpose of the edited volume is to provide an international lens to examine evidence based investigations in Ethno STEM research Ethno

science Ethno technology Ethno engineering and Ethno mathematics These themes grew out of multi national multi institutional and multi disciplinary efforts to preserve as well as epitomize the role that Indigenous Knowledge Systems IKS play in cognitive development and its vital contributions to successful and meaningful learning in conventional and non conventional contexts Principled by the Embodied Situated and Distributed Cognition ESDC this innovative book will provide evidence supporting the embeddedness of a thinking in acting model as a fundamental framework that explains and supports students acquisition of scientific knowledge So often western science curricula are experienced as irrelevant since it does not take cognizance of the daily experiences and world in which the learner finds himself This book takes a socio cultural look at IKS and applies research in neuroscience to make a case its incorporation in the STEM Science Technology Engineering and Mathematics classroom We use the Embodied Situated Distributed Cognition ESDC Model as conceptual framework in this book Although the value of IKS is often acknowledged in curriculum policy documents teachers are most often not trained in incorporating IK in the classroom Teachers lack of the necessary pedagogical content knowledge PCK in effectively incorporating IK in their classrooms is a tremendous problem internationally Another problem is that IK is often perceived as pseudo science and scholars advocating for the incorporation of IK in the school curriculum often do not contextualize their arguments within a convincing theoretical and conceptual framework The Magic of Technology Alf Hornborg, 2022-10-20

This book examines our understanding of technology and suggests that machines are counterfeit organisms that seem to replace human bodies but are ultimately means of displacing workloads and environmental loads beyond our horizon It emphasises that technology is not the politically neutral revelation of natural principles that we tend to think but largely a means of accumulating through physically asymmetric exchange the material means of harnessing natural forces to reinforce social relations of power Alf Hornborg reflects on how our cultural illusions about technology appeared in history and how they continue to stand in the way of visions for an equal and sustainable world He argues for a critical reconceptualisation of modern technology as an institution for redistributing human time resources and risks in world society The book highlights a need to think of world trade in other terms than money and raises fundamental questions about the role of human artifact relations in organising human societies It will be of interest to a range of scholars working in anthropology sociology economics development studies and the philosophy of technology CHOICE Outstanding Academic Title for 2023

this Glassie has provided new insights into the intellectual and social currents of the period and has rescued a heretofore little known people from historiographical oblivion Combining a fresh perceptive approach with a broad interdisciplinary body of knowledge Glassie has made an invaluable breakthrough in showing the way to understand the people of history who have left their material things as their only legacy *Studying Native America* Russell Thornton,1998 This book addresses for the first time in a comprehensive way the place of Native American studies in the university curriculum Provided by publisher **The Handloom Industry of Begampur in Transition** Abhradip Banerjee,2024-09-05 The Handloom Industry of Begampur in Transition Technology Disjuncture and Development provides an ethnographic description of the handloom industry of the Begampur region Hooghly district West Bengal India While explaining the process of transformation within the industry Abhradip Banerjee explores the uneasy relationship between technology disjuncture and development that has impacted the lives of this particular group of artisans for more than two decades The novelty of this book lies in Banerjee s approach which allowed him to perceive and analyze the process of transition within the handloom weaving tradition of Begampur region from a more inclusive perspective miles away from the pitfall of gross technological determinism The sociotechnical approach allowed him to gauge analyze and incorporate several important but neglected dimensions of this transformation which were otherwise missing in many historiographic or empirical accounts regarding the process of industrialization deindustrialization and class formation in India Tarascan Copper Metallurgy: A Multiapproach Perspective Blanca Estela Maldonado,2018-10-31 A study which provides valuable insights into the nature of metal production and the development of technology and political economy in ancient Mesoamerica offering a contribution to general anthropological theories of the emergence of social complexity
