Factors That Contribute to Successful Schools: A Caribbean Perspective Eulalie Daley Semper,2014-10-17 This book explores various factors that contribute to successful schools in the Caribbean Based on my own personal and professional experience I define successful schools as those schools where high quality teaching takes place in a supportive environment In these schools spiritual leaders seek to work with educational stakeholders to develop and facilitate a culture of excellence Therefore I have decided to examine teacher development community involvement spiritual leadership servant leadership

and an established culture of success as additional factors that can contribute to successful schools in the Antiguan context. However, this study can yield valuable information that can be used to assess educational practices within different types of schools regionally and globally since one of its main aims is to explore stakeholders' perceptions on the contributing factors to schools' academic success. In this book, educational practitioners, policy makers, and institutional leaders will find principles of success that will affect principal leadership, classroom learning, and student achievement.

Effective Educational Leadership Nigel Bennett, Megan Crawford, Marion Cartwright, 2008-03-25. Keith Grint's persuasive essay on the art of leadership in *Effective Educational Leadership* is uncannily accurate. Tim Brighouse, *Times Educational Supplement*, its unique contribution is the exploration of links between leadership discourses and the themes that have emerged from the school effectiveness movements since the 1980s. Riley and MacBeath provide one of the most valuable contributions to the volume by arguing that there are no generic recipes for educational leadership, but ingredients which need to be carefully selected with a knowledge of specific contexts and needs. I would use this book with graduate students and practitioners seeking to develop a perspective about contemporary educational leadership. Its greatest contribution is its exploration of the links between effective leadership and effective education. The book also provides optimism in that many of the authors have not capitulated to the reductionist visions of the past two decades. There is still hope that educational theorists and practitioners view the life world as the true source of educational inspiration. *Journal of Educational Administration Leadership* is the theme of this decade. This series provides an enormously valuable overview of all the critical issues involved in designing leadership as the main strategy for educational
