Frontiers Gaining The Flow:

Frontier Computing Jia-Wei Chang, Neil Yen, Jason C. Hung, 2022-01-01 This book gathers the proceedings of the 10th International Conference on Frontier Computing held in Singapore on July 10-13 2020 and provides comprehensive coverage of the latest advances and trends in information technology science and engineering. It addresses a number of broad themes including communication networks, business intelligence and knowledge management, web intelligence and related fields that inspire the development of information technology. The respective contributions cover a wide range of topics: database and data mining, networking and communications, web and Internet of things, embedded systems, soft computing, social network analysis, security and privacy, optical communication and ubiquitous pervasive computing. Many of the papers outline promising future research directions and the book benefits students, researchers and professionals alike. Further, it offers a useful reference guide for newcomers to the field.

Recovering the Frontier State Rasul Bakhsh Rais, 2008-03-20 This book examines the prospects for rebuilding state and nation in Afghanistan with regard to Operation Enduring Freedom carried out by the international coalition. It starts off by delineating the conceptual basis of Afghanistan's status as a frontier state. Looking at geo-strategic aspects, Afghanistan's position as an historical buffer between empires and its internal characteristics—weak authority, structure, internal conflicts, interventions by neighbors, legitimacy of internal conquest and trans-national ethnicities—the book provides insights into the unique geo-political context of Afghanistan. Whilst the author deems the legacy of the previous intervention for containment as a major contributing factor to the disorder in Afghanistan's state and society, he draws on lessons from the past intervention to assuage current obstacles and stalemate that is hindering political, social and economic development in Afghanistan. Focusing on the impediments to development in Afghanistan, the background against which the problem needs to be analyzed and consequently countered is effectively set out. Incessant war and insurgency has led to mobilization along ethnic and religious lines in Afghanistan and has had profound effects on the kinds of intuitions that have perpetuated over time. Ethnic and religious groups have applied constant pressure on the state and this dissonance has had enduring negative consequences on nation building, social cohesion and state-society relationships. Pre-emptive and reactive intervention by neighboring states and their links to ethnic groups inside Afghanistan is another dimension which is analyzed. An extensive exploration into the geo-political history of social groups of Afghanistan with an intensive account of the rise of various power contenders as a function of their history, their links with external actors and their traditional position in the indigenous vertical hierarchy are made. Unconventional war and counter-insurgency operations funded by foreign and local elements are examined and policy guidelines for negotiations and conflict resolution are discussed. The work provides fresh insights into the rise of the Taliban and adds further to the scholarly debate about the causes for the consolidation of Taliban power. It traces the history of the Afghan crisis and critically evaluates the roles played by different national and international actors. A major contribution of the work is the articulation of the need for an

integrated nation and state building strategy which takes into account the sensitivities of the Afghanistan experience instead of treating it like other post conflict zones

Alabama's Frontiers and the Rise of the Old South Daniel Dupre, 2017-11-30 A well written nicely comprehensive and inclusive social history of Alabama before and immediately after statehood H AmIndian Alabama endured warfare slave trading squatting and speculating on its path to becoming America's twenty second state and Daniel S Dupre brings its captivating frontier history to life in Alabama's Frontiers and the Rise of the Old South Dupre's vivid narrative begins when Hernando de Soto first led hundreds of armed Europeans into the region during the fall of 1540 Although this early invasion was defeated Spain

France and England would each vie for control over the area's natural resources struggling to conquer it with the same intensity and ferocity that the Native Americans showed in defending their homeland Although early frontiersmen and Native Americans eventually established an uneasy truce the region spiraled back into war in the nineteenth century as the newly formed American nation demanded more and more land for settlers Dupre captures the riveting saga of the forgotten struggles and savagery in Alabama's and America's frontier days An introduction to the interaction of European powers the United States and Indian tribes in Alabama and the Southeast Western Historical Quarterly **Essentials of Economics**

Erickson,Leonard Waverman,1974-12-15 The so called energy crisis that burst upon the world in 1973 was not easily understood by many people It was neither the beginning of the end nor the first encounter by modern man with the natural result of his prodigality These papers collected in two volumes from energy economists in the United States Canada and Britain all indicate that the crisis was and is a short run problem caused by government action or inaction The problem may be complex but it was mishandled particularly by the United States in terms of government policy The rise in the price of and the embargo on oil came into being because of a successful producers cartel outside North America oil buyers nations and companies did not respond in kind but scurried around the world in separate planes in order to ensure supplies for themselves at any price That price became many times the cost of production price despite the fact that cool analysis reveals

an increase in both production and reserves in most areas of the world The shortage of refined oil products for consumers are attributable partly to the embargo but also to a shortage of refineries and bottlenecks in transportation some of which have been induced by government uncertainties over recent years Proper government policies are now required The thirty six papers in the two books treat a multitude of topics related to the question of energy as seen from the stance of the economist All sources of energy are considered as are the markets in major areas of the world past policies are analysed and future policies recommended It is hoped that the volumes giving the background to the energy problems of the immediate future and a menu of prescriptions for their solution will interest businessmen market analysts and policy makers as well as economists teaching or learning in many parts of the world **The New Investment Frontier III** Howard J.
