From Patron To Partner The Development Of U S Korean Business And Trade Relations:

From Patron to Partner Karl Moskowitz, 1984 Corporatism and Korean Capitalism Dennis L. McNamara, 2012-10-02
Corporatism and Korean Capitalism employs corporatist theory to examine the Korean experience of state business ties. It includes theoretical chapters on Asian and Korean corporatism, case studies of agriculture industry and industrial relations, and an introduction to comparative corporatism. It helps to push the study of Korean political and economic change from description on to theoretical analysis. This volume will challenge researchers and students of Asian studies, economics, and politics to extend and refine their understanding of both corporatism and Korea. Moreover, this book offers a guide to policymakers confounded by the curious mix of collusion and competition in Korean political economy. Making Capitalism
Roger L. Janelli, Dawnhee Yim, 1995-03-01 This pathbreaking work extends the boundaries of contemporary anthropological research by presenting in one cohesive, meticulously researched work an original theoretical perspective on the relationships between the cultural, political, and economic dimensions of a large modern business organization, the first anthropological work on South Korean management and its white collar workers in a case study of one of South Korea's big four conglomerates, and an innovative delineation of how modern business practices are enmeshed in past and present structure and agency and local and international systems. Based largely on the author's nine months of participant observation in the offices of one of South Korea's largest conglomerates with annual sales of about 15 billion and approximately 80,000 employees, the book is also enriched by the author's previous fieldwork in rural Korea where many of the conglomerate's white collar personnel spent their formative years. These vantage points are used to explore constructions of traditional Korean culture and transformations of cultural knowledge prompted by new political economic conditions and how both inform practices prevailing in the large conglomerates and ultimately shape South Korea's capitalism. The work focuses on South Korea's new middle class. It explains how office workers' identities and often contradictory interests present them with choices between alternative interpretations and actions affecting both themselves and their conglomerates. Much attention is paid to ideological and more coercive means of controlling white collar employees to subordinate strategies of resistance and to ways in which cultural understandings and moral claims inform the assessment and pursuit of material advantage.

Race to the Swift Jung-en Woo, Meredith Woo-Cumings, 1991 A comprehensive and original account of the rise of Korea's developmental state. *Race to the Swift* by Jung-en Woo argues that Korea's industrial growth is neither a miracle nor a cultural mystery but the outcome of a previously misunderstood political economy. *Education and Social Change in Korea*
Don Adams, Esther E. Gottlieb, 2017-12-12 This book, first published in 1993, provides students and scholars with an introduction to Korean education and the dynamics of interchange between the educational system and rapidly changing Korean society. Severe political, social, and educational problems may be found in modern Korea; these conditions, together with certain persistent issues pertaining to the purposes, structure, and pedagogical characteristics of schooling, make for

Brazinsky,2009-11-20 In this ambitious and innovative study Gregg Brazinsky examines American nation building in South Korea during the Cold War Marshaling a vast array of new American and Korean sources he explains why South Korea was one of the few postcolonial nations that achieved rapid economic development and democratization by the end of the twentieth century Brazinsky contends that a distinctive combination of American initiatives and Korean agency enabled South Korea's stunning transformation On one hand Americans supported the emergence of a developmental autocracy that spurred economic growth in a highly authoritarian manner On the other hand Americans sought to encourage democratization from the bottom up by fashioning new institutions and promoting a dialogue about modernization and development Expanding the framework of traditional diplomatic history Brazinsky examines not only state to state relations but also the social and cultural interactions between Americans and South Koreans He shows how Koreans adapted resisted and transformed American influence and promoted socioeconomic change that suited their own aspirations Ultimately Brazinsky argues Koreans capacity to tailor American institutions and ideas to their own purposes was the most important factor in the making of a democratic South Korea
