From Rights To Management Contract New Public Management Employment:

From Rights to Management: Vol. 18: Contract, New Public Management and Employment Services Terry Carney, 2002-07-31 From Rights to Management presents a powerful and thoroughly documented new thesis about the transformation of the concept of work during the period 1970-2000. The authors remind us of what we now easily forget that not so long ago the right of an unemployed person to social security benefits and services was not questioned. Over the years this right has been gradually replaced by a two-way bargain with the state. And in the place of this old social citizenship there has arisen a government-corporate alliance that manages job seekers by contract. The shift from the needs of the person to the demands of business is complete. Those tempted to argue with this provocative thesis will find a formidable array of evidence assembled in this well-researched book. Focusing primarily on Australia where the marketisation of welfare and employment services has gone farther than in any other country, Professors Carney and Ramia draw not only on the recent literature of several relevant disciplines but also on in-depth interviews with thirty unemployed people from a wide range of backgrounds and situations. By assessing the inner workings and impacts of public management transformations on the lives of those most deeply affected, the authors provide a keen understanding of how the management theories, initiatives and pretexts economic and legal work out in actuality. The interdisciplinary discussion incorporates debates about civil society, social capital and other germane topics of great concern to scholars, policymakers and administrators in this era of globalisation. A deep analysis of the new policy network of social services examines the types of contracts that govern the various parts of the system. The analysis concludes with a proposed new framework that reinstalls citizenship as the basis for welfare policy but in a way that places real obligations and accountability on government and does not leave disadvantaged persons to fight a losing battle. No lawyer, professional, academic or official in the social policy environment can afford to ignore this challenging work.

The Protection of Working Relationships Frans Pennings, Claire Bosse, 2011-01-01 In recent years it has become clear that many businesses motivated by avoiding the rigidity and the price tag associated with labour law and social security have succeeded in eroding the protection of labour law by creating numerous categories of workers classified as non-employees. In 1996 the International Labour Organisation (ILO) adopted Recommendation 198 which asks its Members to undertake action to reduce disguised employment relationships with the goal of ensuring that those actually working in an employment relationship are actually given the corresponding legal status. Though these are from a legal approach two conceptually different phenomena, they are closely related from a social policy point of view. In order to make a substantial contribution to the discussion on these developments, a group of noted European labour law scholars has undertaken the research assembled in this book, recommending labour law reforms based on a close examination of existing conditions. The eight authors analyse measures and legal instruments offered by the European Union and the ILO to cover persons performing personal work as well as specific developments in Belgium, France, The Netherlands, Poland, Germany and

the United Kingdom In each case they describe viable ways in which categories of persons not treated as employees can be brought under the protection of labour law and how the distinction between employees and self employed can become more clear In a concluding final Chapter comparative conclusions are drawn on the basis of this study and recommendations are given to the EU the ILO and the individual Member States Among the specific issues covered are the following redefining the subordination criterion the role of the courts determination of the contract of employment forms of labour involving more than two contracting parties e g employment agency arrangements the legal position of temporary workers employee like persons e g home workers or commercial representatives the bogus self employed introduction and effect of legal presumptions in labour law and or social security developing uniform criteria for the employment relationship criteria for identifying self employed but economically dependent workers extension of protection of labour law to persons other than employees or the self employed and social rights applicable to all work contracts irrespective of their formal qualification floor of core rights This study seriously contributes toward overcoming the reluctant and piecemeal measures commonly taken to extend the protection of the employment contract Although the authors acknowledge the continuing tension between labour law protection and the need for a flexible workforce they also recognize the positive effects of best practices that lead to more certainty fewer disputes and clear but still flexible if necessary agreements The book will be warmly welcomed as a signal contribution to addressing what one labour law scholar has called the most important industrial relations issue of our time

Decent Flexibility Dr Fred C. A. van Haasteren, 2017-07-30 Within the context of social law temporary agency work has always been subject of debate The pursuit of more flexible forms of labour is at odds with maintaining decent labour relations For that reason ever since it was established the UN organisation for labour issues ILO has focused on private work placement In its early years it tended to prohibit or severely restrict private work placement but gradually it came to acknowledge that for instance temporary agency work had positive aspects and that a total ban was pointless In 1997 this culminated in ILO convention 181 which was widely supported This did not end the debate on non standards forms of paid work Which forms of work can be considered decent How do they relate to human rights What are the effects of globalisation In the European context too cross border temporary agency work has attracted extensive attention Lastly the Netherlands has its own unique form of public private regulation The guiding principle in this book is whether Convention 181 still has value in this day and age What are the developments in temporary agency work in the social domain How do they relate to the wide range of flexible work forms that are increasingly catching up with temporary agency work Decent flexibility is the challenge Dr Fred van Haasteren 1949 started his career as a scientific associate at the Society and Enterprise Foundation SMO From 1978 onward he worked in the Dutch temporary agency sector In 1982 he became a board member of Randstad Nederland in 1991 he became Vice President of Randstad Holding Among other things he was also President of the platform of European temporary agency employers and of the global temporary agency employer

umbrella organisation CIETT He is still a board member of the Dutch Labour Standards Foundation SNA and an independent member of the NCP OECD The social policy pursued by temporary employment agencies has always been at the centre of his activities

EU Industrial Relations v. National Industrial Relations Mia Ronnmar, 2008-08-26 The relationship between the national and international has been central in the debate on the impact of globalisation on national patterns of employment relations While some industrial relations researchers in recent years have put forward evidence not of convergence but rather of continuing national diversity in employment relations others see a complex power sharing interplay emerging for which Europe is the laboratory This ground breaking book asks Do EU or European industrial relations exist What characterises EU industrial relations and their development What are the differences between EU industrial relations and national industrial relations Twelve outstanding authorities from seven countries discuss the theme from a variety of perspectives Originally presented at an international and interdisciplinary research workshop held at the Faculty of Law at Lund University in November 2007 the essays probe a range of highly topical and important legal and industrial relations issues and developments including the implications of the epochal and much debated Laval and Viking cases from the European Court of Justice The focus is on the EU dimension of industrial relations common to the Member States and not on comparative European industrial relations The authors raise and discuss such crucial issues as the following the power relationship and interactions between the social partners within the framework of the social dialogue growing problems of posting of workers low wage competition and social dumping approaches to creating an EU legal framework for transnational collective agreements the right to take industrial action in order to achieve collective agreements the fundamental asymmetry between the scope of action of players in companies and territories affected by restructurings information consultation and worker participation potential benefits of increased tripartite co operation between the social partners and governments compatibility of the Swedish or Nordic system with the four freedoms and its eligibility as a European model and issues of private international law arising from collective actions with transnational implications An appendix includes relevant EC legislation and the ECJ opinions in Laval and Viking EU Industrial Relations vs National Industrial Relations explores an emerging and still inchoate realm of law that is heavily fraught with implications for the near future of social relations not only in Europe but worldwide Labour lawyers and policymakers will greatly appreciate its precise stocktaking its insightful analysis and its well informed recommendations on how to proceed in the realm of practical law

Recommendation on Social Protection Floors Tineke Dijkhoff, Letlhokwa George Mpedi, 2016-04-24 Despite the international community's recognition of social protection as a human right the vast majority of the world's population still has no access to social protection In a major effort to address this situation the International Labour Conference unanimously adopted the Social Protection Floors Recommendation 202 of 2012 However because of the wide variety of possible schemes and techniques that can be employed to administer them there is a genuine risk that important values

relating to social protection will be overlooked in implementing the Recommendation This collection of expert essays contains an in depth clarification and analysis of the Recommendation and sets forth a clear and practicable set of principles that can be used both as a policy tool and as an assessment framework for the creation maintenance and supervision of a national social protection floor This book pays detailed attention to each of the Recommendation s key principles including the following state responsibility universality of protection entitlement based in law adequacy and predictability of benefits non discrimination financial solidarity good governance coherence of policies and social participation A special feature of the book is its inclusion of case studies that display innovative social protection schemes focusing on children and families persons of working age particularly informal sector workers and elderly persons A concluding section offers useful insights on measures that can be taken and lessons learned As a deeply informed and practical guide to ways in which states can and do establish and maintain a social protection floor as a fundamental element of their national social protection systems this book has no peers It will be warmly welcomed by jurists concerned with social protection throughout the world by pertinent government agencies at all levels by non governmental organizations and by academics in the field
