From Strangers to Neighbors Ryan Alaniz, 2017-12-06 Natural disasters the effects of climate change and political upheavals and war have driven tens of millions of people from their homes and spurred intense debates about how governments and nongovernmental organizations NGOs should respond with long term resettlement strategies Many resettlement efforts have focused primarily on providing infrastructure and have done little to help displaced people and communities rebuild social structure which has led to resettlement failures throughout the world So what does it take to transform a resettlement into a successful community This book offers the first long term comparative study of social outcomes through a case study of two Honduran resettlements built for survivors of Hurricane Mitch 1998 by two different NGOs Although residents of each arrived from the same affected neighborhoods and have similar demographics twelve years later one resettlement wrestles with high crime low participation and low social capital while the other maintains low crime a high degree of social cohesion participation and general social health Using a multi method approach of household surveys interviews ethnography and analysis of NGO and community documents Ryan Alaniz demonstrates that these divergent resettlement trajectories can be traced back to the type and quality of support provided by external organizations and the creation of a healthy cohesive community culture His findings offer important lessons and strategies that can be utilized in other places and in future resettlement policy to achieve the most effective and positive results From Stranger to Strangers, Neighbors, Friends Kelly James Clark, Aziz Abu Sarah, Nancy Fuchs Kreimer, 2018-08-06 From Neighbor, 1986 9 11 to Israel Palestine to ISIS the fear of the religious stranger is palpable Conservative talk show hosts and liberal public intellectuals are united in blaming religion usually Islam for the world's instability If religion is part of the problem it can and should be part of the solution Strangers Neighbors Friends co authored by a Muslim a Christian and a Jew aims to inform and inspire Abraham's children that God calls us to extend our love beyond family and fellow believer to the stranger

explores the mutual influences structural analogies shared dilemmas as well as the historical roots of such a post secular constellation as seen through the lens of European cinema Bringing together scholars from film theory and political science ethics and philosophy of religion philosophy of film and theology this volume casts new light on the relationship between the religious and secular experience after the death of the death of God Advances in the Study of Behavior ,2014-05-16 Advances in the Study of Behavior was initiated over 40 years ago to serve the increasing number of scientists engaged in the study of animal behavior That number is still expanding This volume makes another important contribution to the development of the field by presenting theoretical ideas and research to those studying animal behavior and to their colleagues in neighboring fields Initiated over 40 years ago to serve the increasing number of scientists engaged in the study of animal behavior Makes another important contribution to the development of the field Presents theoretical ideas and research to those studying animal behavior and to their colleagues in neighboring fields Ants at Work Deborah Gordon, Deborah M. Gordon, 2000 Ants have long been regarded as the most interesting of the social insects With their queens and celibate workers these intriguing creatures have captured the imaginations of scientists and children alike for generations Yet until now no one had studied intensely the life cycle of the ant colony as a whole An ant colony has a life cycle of about fifteen years it is born matures and dies But the individual ants that inhabit the colony live only one year So how does this system of tunnels and caves in the dirt become so much more than the sum of its parts Leading ant researcher Deborah Gordon takes the reader to the Arizona desert to explore this question The answer involves the emerging insights of the new science of complexity and contributes to understanding the evolution of life itself From Neighbor to Stranger Virginia R. Clifton Spargo, 2006-09 Vigilant Memory focuses on the particular role of Emmanuel Levinas s thought in reasserting the ethical parameters for poststructuralist criticism in the aftermath of the

Holocaust More than simply situating Levinas s ethics within the larger context of his philosophy R Clifton Spargo offers a new explanation of its significance in relation to history In critical readings of the limits and also the heretofore untapped possibilities of Levinasian ethics Spargo explores the impact of the Holocaust on Levinas s various figures of injustice while examining the place of mourning the bad conscience the victim and the stranger neighbor as they appear in Levinas s work Ultimately Spargo ranges beyond Levinas s explicit philosophical or implicit political positions to calculate the necessary function of the memory of injustice in our cultural and political discourses on the characteristics of a just society In this original and magisterial study Spargo uses Levinas s work to approach our understanding of the suffering and death of others and in doing so reintroduces an essential ethical element to the reading of literature culture and everyday life
