together of the nation's digital health community to discuss, share and showcase current and future initiatives that support the progression of digital health but in 2020 it took the form of satellite events culminating with an online Digital Health Institute Summit. The papers presented here reflect highly topical themes across various areas and disciplines including digital health in the care of the elderly, mental health, COVID-19, public health and workforce. Familiar topics such as wearables, mobile health and remote monitoring, interoperability and data privacy are also covered as well as telehealth, automation, bots and other AI applications. The book will be of interest to all health professionals, especially those working in the fields of digital health, informatics and telemedicine.

Law and Language in the European Union Richard L. Creech, 2005. The European Economic Community founded in 1957 consisted of six Member States with a combined total of four official languages. By 2004 this organization had evolved into a European Union of twenty-five Member States with more than twenty official languages among them. This increase has presented numerous challenges to the EU's internal linguistic regime where formal policy has been with some notable exceptions to treat all of these languages equally. Some of these languages, English in particular, have been more equal than others. Languages that lack nation-wide official status in any Member State such as Catalan and Welsh have been overtly denied equal treatment. Furthermore, the multilingual nature of the EU has had significant implications for any Member State that wishes to regulate the use of language within its territory as such regulation can interfere with the rights accorded to citizens of other Member States to participate in free commercial movement throughout the Union.

Law and Language in the European Union now in paperback examines how in the linguistic realm the EU has responded to the tensions that lie behind this paradoxical motto.
