Economic Issues Of Disarmament Contributions From Peace Economics Peace Science:

Economic Issues of Disarmament Jurgen Brauer, Manas Chatterji, 1993-01-01 **IBSS: Economics: 1993 Vol 42**, 1994 This bibliography lists the most important works published in economics in 1993 Renowned for its international coverage and rigorous selection procedures the IBSS provides researchers and librarians with the most comprehensive and scholarly bibliographic service available in the social sciences The IBSS is compiled by the British Library of Political and Economic Science at the London School of Economics one of the world's leading social science institutions Published annually the IBSS is available in four subject areas anthropology economics political science and sociology **The Economics of John Kenneth Galbraith** Stephen P. Dunn, 2010-11-11 The recent financial crisis has once again seen John Kenneth Galbraith return to the bestseller lists Yet despite the continued popular success of his works Galbraith's contribution to economic theory is rarely recognized by today's economists This book redresses the balance by providing an introductory and sympathetic discussion of Galbraith's theoretical contributions introducing the reader to his economics and his broader vision of the economic process The book highlights and explains key features of Galbraith's economic thought including his penetrating critique of society his distinctive methodology his specific brand of Keynesianism and his original but largely ignored contribution to the theory of the firm It also presents for the first time a detailed examination of Galbraith's monetary economics and revisits his analysis of financial euphoria This unique work seeks to rehabilitate Galbraith's contribution setting out several directions for possible future research in the Galbraithian tradition The Economics of International Security Manas Chatterji, Henk Jager, Annemarie Rima, 2016-07-27 The objective of this book is to present an integrated set of original papers from leading authorities in the field related to optimal balance between arms reduction and regional and international security The emphasis is on economics and management rather than politics and diplomacy The Political Economy of Defence Ron Matthews, 2019-05-09 A contemporary and comprehensive analysis of national and supranational defence governance in an uncertain and increasingly dangerous world This book will appeal to policymakers analysts graduate students and academics interested in defence economics political economy public economics and public policy *Eclipse: Living in the Shadow of China's Economic Dominance* Arvind Subramanian, 2011 By most accounts China has quickly grown into the second largest economy in the world In this controversial new book Subramanian argues that China has already become the most economically dominant country in the world in terms of wealth trade and finance Its dominance and eclipsing of US global economic power is more imminent more broad based and larger in magnitude than anyone has anticipated Subramanian compares the economic dominance of China with that of the two previous economic superpowers the United States and the United Kingdom and highlights similarities and differences One corollary is that the fundamentals are strong for the Chinese currency to replace the dollar as the world's reserve currency The final chapter forecasts how the international economic system is likely to evolve as a result of Chinese dominance Clinton's Foreign

Policy in Russia George A. MacLean, 2017-11-30 Some of Bill Clinton's most basic foreign policy elements democratic peace the post Cold War peace dividend geopolitics and state society relations are epitomized in the US Russian Highly Enriched Uranium HEU Purchase Agreement It was one of the most remarkable initiatives of Clinton's presidency but oddly one of the most obscure that still continues under George W Bush This agreement illustrates how successfully the US and Russia could work together to reduce global nuclear fears but also how a series of decisions pitted global designs over American domestic interests Illustrating one of the most compelling decisions Clinton made as President this remarkable book elucidates the theory of democratic peace and demonstrates a new and more advanced nuclear restraint regime from reduction to elimination The story behind Clinton's decision has repercussions for our understanding of arms control foreign policy decision making and US Russian relations This is a book about the intersection of levels of analysis international security concerns and domestic political economy and as such is ideal as a supplementary text for advanced courses in security and foreign policy

Rethinking Market Regulation John N. Drobak, 2021 Introduction The theory of competitive markets Lack of competition in U S markets The effects of mega mergers Corporate stakeholders Outsourcing in the U S and Europe Legitimization of greed Heartbreak to workers Belief systems and confirmation bias Recommendations Postscript

Castles, Battles, & Bombs Jurgen Brauer, Hubert van Tuyll, 2024-05-31 Castles Battles and Bombs reconsiders key episodes of military history from the point of view of economics with dramatically insightful results For example when looked at as a question of sheer cost the building of castles in the High Middle Ages seems almost inevitable though stunningly expensive a strong castle was far cheaper to maintain than a standing army The authors also reexamine the strategic bombing of Germany in World War II and provide new insights into France's decision to develop nuclear weapons Drawing on these examples and more Brauer and Van Tuyll suggest lessons for today's military from counterterrorist strategy and military manpower planning to the use of private military companies in Afghanistan and Iraq In bringing economics into assessments of military history the authors also bring illumination The authors turn their interdisciplinary lens on the mercenary arrangements of Renaissance Italy the wars of Marlborough Frederick the Great and Napoleon Grant's campaigns in the Civil War and the strategic bombings of World War II The results are invariably stimulating Martin Walker Wilson Quarterly This study is serious creative important As an economist I am happy to see economics so professionally applied to illuminate major decisions in the history of warfare Thomas C Schelling Winner of the 2005 Nobel Prize in Economics

The Future of the United Nations System Chadwick F. Alger, 1998 What does the future hold for the UN In this book twenty two scholars from all continents contribute twelve chapters that cover prevention of violence creating economic and social structures that sustain human fulfillment sharing and protecting the commons and peace education The search for future potential based on experience in these twelve laboratories leads to sixty six recommendations for new institutions and programs on issues that include controlling weapons humanitarian intervention collaboration between UN peacekeepers and

NGOs human rights economic policies advancement of women refugees ecological security communications and peace education These recommendations are brought together in a concluding chapter and summarized in the appendix Most of the recommendations do not require amendments to the UN Charter or to the treaties establishing the UN Specialized Agencies Instead their implementation would require creative efforts of Member States secretariats NGOs and dedicated individuals that are pointed toward attainment of multilateral capacity for coping with an array of global problems that increasingly threaten the quality of human life This is stimulating reading for anyone who wants to be challenged to think creatively about the potential for coping with a growing array of global problems

Economics of Arms Reduction and the Peace Process W. Isard, C.H. Anderton, 2014-06-28 The subject of peace economics and its ramifications are comprehensively and deeply attacked in this book First of all the book presents a compact survey of significant contributions already made and then it provides a broad theoretical background for examining the subject by evaluating four different approaches those of 1 neoclassical welfare theory 2 Keynesian and modern versions of macroeconomics 3 modern growth theory and 4 political choice theory A number of contributions deal with major questions on issues such as the impact of military cutbacks in the Eastern European economies upon their growth trade between nations arms trade nuclear defense and the benefits and costs of war as highlighted by the recent Gulf War Issues of a more general nature but equally significant are also discussed including the age old negotiations problem of two mature political leaders of major powers in conflict the determinants of military expenditures and the problems of developing countries In the last chapter the findings of the studies reported in the book are summarized and key directions for further research are identified This book is indispensable for any economist or analyst conducting research on peace economics and the peace process or concerned with the impacts of recent arms reduction and conversion by the major powers and the escalation of military expenditures elsewhere

Exploding the Myth? Derek Braddon, 2014-02-25 From a cold war peak of some 1000 billion per annum world military expenditure has declined by about 40% since 1990 reaching its lowest level for thirty years With such significant decline in global public expenditure commitments to the defence sector a substantial and lasting peace dividend was anticipated Most governments believed that market forces left more or less to their own devices would deal effectively with this major exogenous shock and generate sufficient new economic activity to allow increased public expenditure on health education and welfare The approach of this book is to challenge the fundamental but flawed belief that a substantial and lasting peace dividend could be secured through market solution alone The principal assertion is that market adjustment by itself cannot deliver such a dividend The book focuses on the major aspects of the economic business and security consequences of post Cold War defence expenditure reduction Key problems obstructing optimal market response are identified and possible remedial action by government and others is considered

War and Nature Jurgen Brauer, 2009-10-15 The inherent dangers of war zones constrain even the most ardent researchers with the consequence that little has been known for certain about the effects of war on stable

environments War and Nature sifts through the available data from past wars to evaluate the actual impact that combat has on natural surroundings Examining conflicts of various kinds the long war in tropical Vietnam the relatively brief and highly technical wars in the Persian Gulf and various civil wars in Africa and South Central Asia fought with small arms Brauer asks whether differences in technology location and duration are critical in causing environmental and humanitarian harm A number of unexpected conclusions are drawn from this data including practical agendas for collecting scientific evidence in future wars and suggestions about what the world s environmental and conservation organizations can do One thing War and Nature does is to show us how globalization can be a force harnessed for good ends *The Legacy of John Kenneth Galbraith* STEVEN PRESSMAN,2013-10-18

When John Kenneth Galbraith passed away on April 29 2006 the economics profession lost one of its true giants And this is not just because Galbraith was an imposing figure at 6 feet 9 inches tall Throughout his life Galbraith advised Presidents made important professional contributions to the discipline of economics and also tried to explain economic ideas to the general public This volume pays tribute to Galbraith s life and career by explaining some of his major contributions to the canon of economic ideas The papers describe the series of unique contributions that Galbraith made in many different areas He was a founder of the Post Keynesian view of money and a proponent of the Post Keynesian view that price controls were necessary to deal with the problem of inflation in a modern economy where large firms already control prices and prices are not determined by the market He promulgated the view that firms manipulate individual preferences and tastes through advertising and other means of persuasion and he drew out the economic implications of this view He was a student of financial frauds and euphoria and a forerunner of the Post Keynesian Minskean view of finance and how financial markets really work This book was published as a special issue of the Review of Political Economy Leading Contemporary Economists Steven Pressman,2008-10 This collection of essays offers an extensive critical review of the major contributions of key figures in contemporary heterodox economics including comprehensive bibliographies of their writings and lists of vital secondary material **Special Bibliography Series** ,1957

The Indian Economic Journal ,2008 **The American Bibliography of Slavic and East European Studies** Patt Leonard,Rebecca Routh,2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union Organised by discipline it covers the arts humanities social sciences life sciences and technology International Bibliography of the Social Sciences ,1994 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences *Arming the South* J. Brauer,P. Dunne,2002-05-10 After marked reductions in military spending in the 1990s military budgets around the world are on the increase In this book renowned authorities re examine the economics of military expenditure arms production and arms trade in developing nations It includes analysis of military spending in Africa Asia and Latin America

and new forms of civil conflict as well as nine case studies Saudi Arabia South Africa Mozambique Angola Subsaharan Africa Greece Turkey Guatemala and Chile The book will serve as a valuable contribution to the fields of both development economics and security studies
